GENERAL INFORMATION

WARNING

BEFORE BEGINNING INSTALLATION OF THIS MURPHY PRODUCT

- ✓ Disconnect all electrical power to the machine.
- ✓ Make sure the machine cannot operate during installation.
- ✓ Follow all safety warnings of the machine manufacturer.
- ✓ Read and follow all installation instructions.

Description

Generally, pressure and temperature Switchgag[®] contacts are wired to a central nerve center called a Magnetic Switch or Tattletale[®] annunciator. This nerve center is essentially a relay and, when signaled by a Switchgag contact operation, it either makes or breaks a circuit to operate an alarm or engine shutdown device. Various nerve centers are used

depending upon the operation to be performed, the type of electrical power available and the type of alarm or shutdown device used. Typical wiring diagrams for the popular Tattletale annunciators and magnetic switches are included in this instructions. If a drawing of the specific model number is enclosed, refer to that drawing for specific wiring.

CAUTION: Certain dangers to human safety and to equipment may occur if some equipment is stopped without pre-warning. It is recommended that monitored functions be limited to alarm only or to alarm before shutdown.

INSTALLATION INFORMATION

Mounting the Panel

WARNING: Perform mounting operation with power source OFF. Disable the engine so it cannot start. Remove the battery ground cable.

1. Select a suitable mounting location on or near the engine. The location should provide easy access to the panel and provide unobstructed viewing of the Switchgag instruments.
2. The mounting location should avoid shock and vibration to the extent possible. Generally, a location low on the engine is preferred. Avoid mounting on top of the engine if possible. Shockmounts are suggested where possible to dampen shock and vibration.

IMPORTANT: Use of improper shockmounts can accelerate the shock and vibration effects. Consult the factory if you are in doubt.

NOTE: If shockmounts are used, it is suggested that a separate ground wire be attached to the panel assembly and to the engine. This assures electrical continuity between the Switchgag contacts and the battery ground across the shockmounts (see mounting detail below).

WD300-LV

Connecting the Pressure Switchgag

1. Pressure tubing is generally not provided. Use of good quality flexible pressure tubing/hose and fittings is strongly suggested. Use at least 3/16 in. (5 mm) I.D. tubing. If using copper or rigid tubing, install at least 12 in. (305 mm) flexible hose from the pressure Switchgag instrument to the rigid tubing. This prevents damaging vibration from reaching the Switchgag instrument.
2. Connect the pressure tubing to the 1/8-27 NPT pressure port of the pressure Switchgag instrument. Use of a non-hardening thread sealing compound is recommended although the thread is "dry seal". Be sure that thread sealant does not foul the pressure orifice.

NOTE: The orifice can be removed for cleaning.

3. Connect the pressure tubing to the pressure galley of the engine. Generally this is at the oil filter housing. Use of non-hardening thread sealant is recommended. Avoid droops or sink traps in routing of the pressure line.

Installation Accessories

Tools and equipment needed:

- Thread sealant or Teflon[®] tape.
- Straight edge screwdriver (medium).
- Wire stripping and terminal crimping tools.
- Electrical wire for use on power connections.
- Adjustable wrench or open end wrench set.
