Time Emergence Grammar Talk Interaction:

Emergent Syntax for Conversation Yael Maschler, Simona Pekarek Doehler, Jan Lindström, Leelo Keevallik, 2020-02-15 This volume explores how emergent patterns of complex syntax that is syntactic structures beyond a simple clause relate to the local contingencies of action formation in social interaction It examines both the on line emergence of clause combining patterns as they are patched together on the fly as well as their routinization and sedimentation into new grammatical patterns across a range of languages English Estonian Finnish French German Hebrew Italian Mandarin and Swedish The chapters investigate how the real time organization of complex syntax relates to the unfolding of turns and actions focusing on i how complex syntactic patterns or routinized fragments of canonical patterns serve as resources for projection ii how complex syntactic patterns emerge incrementally moment by moment out of the real time trajectories of action iii how formal variants of such patterns relate to social action and iv how all of these play out within the multimodal ecologies of action formation The empirical findings presented in this volume lend support to a conception of syntax as fundamentally temporal emergent dialogic sensitive to local interactional contingencies and interwoven with other semiotic resources *Current Approaches to Syntax* András Kertész, Edith Moravcsik, Csilla Rákosi, 2019-05-06 Even though the range of phenomena syntactic theories intend to account for is basically the same the large number of current approaches to syntax shows how differently these phenomena can be interpreted described and explained The goal of the volume is to probe into the question of how exactly these frameworks differ and what if anything they have in common Descriptions of a sample of current approaches to syntax are presented by their major practitioners Part I followed by their metatheoretical underpinnings Part II Given that the goal is to facilitate a systematic comparison among the approaches a checklist of issues was given to the contributors to address The main headings are Data Goals Descriptive Tools and Criteria for Evaluation The chapters are structured uniformly allowing an item by item survey across the frameworks The introduction lays out the parameters along which syntactic frameworks must be the same and how they may differ and a final paper draws some conclusions about similarities and differences The volume is of interest to descriptive linguists theoreticians of grammar philosophers of science and studies of the cognitive science of science *The Routledge Handbook of Discourse Analysis* Michael Handford, James Paul Gee, 2023-05-15 The Routledge Handbook of Discourse Analysis covers the major approaches to discourse analysis from critical discourse analysis to multimodal discourse analysis and their applications in key educational and institutional settings The handbook is divided into eight sections Approaches to Discourse Analysis Gender Race and Sexualities Narrativity and Discourse Genre and Register Spoken Discourse Social Media and Online Discourse Educational Applications and Institutional Applications The chapters are written by a wide range of contributors from around the world each a leading researcher in their respective field With a focus on the application of discourse analysis to real life problems the contributors introduce the reader to a topic and analyse authentic data This fully revised second edition includes new sections on Gender

Constructions Peter Auer, Stefan Pfänder, 2011-08-29 This volume embarks on an exploration of the processual and dynamic character of grammatical constructions in emergence both from an emergent and an emerging perspective Emerging constructions develop out of their discourse contexts Talking of emerging constructions is compatible with a view of grammar as a stable system of rules and structures which may emerge i.e. come into existence out of a pool of previously unordered elements

Emergent constructions on the contrary are due to the on line production of grammar in time The term emergent emphasises the fact that a grammatical structure is always temporary and ephemeral In both senses grammar is modelled as a highly adaptive resource for interaction On the basis of empirical studies on spoken English German Hebrew Swedish and French the volume addresses the following questions How can what initially appears to be construction x end up being construction y in on line syntax What are the local interactional needs which such processes respond to in the process of their emergence Does the on line re modelling of a construction concern its syntactic or semantic side or both And finally Should emergent grammatical structures as they unfold in real time be seen as stages in the emerging of grammar **Temporality in**

Interaction Arnulf Deppermann, Susanne Günthner, 2015-03-20 Time is a constitutive element of everyday interaction all verbal interaction is produced and interpreted in time However it is only recently that research in linguistics has started to take the temporality of linguistic production and reception in interaction into account by studying the real time and on line dimension of spoken language This volume is the first systematic collection of studies exploring temporality in interaction and its theoretical foundations It brings together researchers focusing on how temporality impinges on the production and interpretation of linguistic structures in interaction and how linguistic resources are designed to deal with the exigencies and potentials of temporality in interaction The volume provides new insights into the temporal design of a range of heretofore unexplored linguistic phenomena from various languages as well as into the temporal aspects of linguistic structures in embodied interaction **The Talking Heads experiment** Luc Steels, 2015-05-11 The Talking Heads Experiment conducted

in the years 1999 2001 was the first large scale experiment in which open populations of situated embodied agents created for the first time ever a new shared vocabulary by playing language games about real world scenes in front of them The agents could teleport to different physical sites in the world through the Internet Sites in Antwerp Brussels Paris Tokyo London Cambridge and several other locations were linked into the network Humans could interact with the robotic agents either on site or remotely through the Internet and thus influence the evolving ontologies and languages of the artificial agents The present book describes in detail the motivation the cognitive mechanisms used by the agents the various installations of the Talking Heads the experimental results that were obtained and the interaction with humans It also provides a perspective on what happened in the field after these initial groundbreaking experiments The book is invaluable reading for anyone interested in the history of agent based models of language evolution and the future of Artificial Intelligence A Conversation Analysis Approach to French L2 Learning Clelia König, 2019-12-06 This book offers a critical examination of second language L2 learning outside institutional contexts with a focus on the way second language learners introduce close and manage conversational topics in everyday settings König adopts a Conversation Analysis for Second

Language Acquisition CA SLA approach in analyzing oral data from a longitudinal study of L2 learners of French au pairs in Swiss families over several years With this approach the author presents insights into the ways in which L2 learners

introduce and close conversational topics in ongoing conversations and how these strategies evolve over time setting the stage for future research on this little documented process in second language acquisition This volume contributes toward a greater understanding of L2 learning in the wild making this key reading for students and researchers in second language acquisition applied linguistics and French language learning and teaching Teaching and Researching Speaking Rebecca Hughes, Beatrice Szczepek Reed, 2016-12-19 Teaching and Researching Speaking provides an overview of the main approaches to researching spoken language and their practical application to teaching classroom materials and assessment The history and current practices of teaching and researching speaking are presented through the lens of bigger theoretical issues about the object of study in linguistics social attitudes to the spoken form and the relationships between spoken and written language A unique feature of the book is the way it clearly explains the nature of speaking and how it is researched and puts it into the context of a readable and holistic overview of language theory This new edition is fully updated and revised to reflect the latest developments on classroom materials and oral assessment as well as innovations in conversation analysis The resources section is brought up to date with new media and currently available networks online corpora and mobile applications This is a key resource for applied linguistics students English language teachers teacher trainers and novice researchers
