Vieira, 2015-03-17 This book is the fourth production from the ESREA Gender network and the third in the ESREA Sense bookseries Once more there is an opportunity for readers to gain a better understanding of questions related to gender and adult learning from researchers deeply involved in this specific field of adult education The notion of informal learning has already been treated as a chapter in the 2003 book but it becomes central and relevant in this new book with the growing complexity of our society The editors emphasise private world s s in the book title but the content of the book proves that informal learning processes aside from the self are combined with contextual opportunities which have been chosen or not Their introduction covers the essential concepts of gender and informal learning The contributors enlighten the debate with their geographical diversity all over Europe but also with their diverse theoretical systems of references to the diverse social contexts that have been analysed The first part of this book entitled private spheres presents and analyses painful gendered discriminations and injustices We can't escape to the emotions it evokes from the soldiers after the war to men's breast cancer both relate to men and the specificity of their suffering This is an interesting and quite new opportunity to question gender In the second part related to minorities and activism we discover groups who learn through their organised fight against discriminations Emotions give way to a positive energy when we discover the strategies that feminists or migrants or also retired men find to question the society in which they live The authors show us not only what is learned by such communities but also what their environment can learn from them The last part of the book leads us to different contexts of informal learning mostly related to opportunities and obstacles in education and work situations Community training social work studies scientist's work and management school are the contexts chosen to clarify stereotypes and the discrimination along the lifespan for women From East to West and North to South of Europe it seems once more that the debate presents a lot of similarities This book can be considered as original in its area and useful mostly because it presents a mixture of sadness and hope within gendered learning processes In this book it seems that men take their place in the gender debate and its analysis with a new vision of the male realities More than anything else this book is a reminder of what has to be done in our society specifically in adult education to imagine and to create better pathways conditions and issues to respect all learners women as well as men Edmee Ollagnier Ex University of Geneva Switzerland

imagination The Routledge Companion to the Cultural Industries Kate Oakley, Justin O'Connor, 2015-05-22 The Routledge Companion to the Cultural Industries is a collection of contemporary scholarship on the cultural industries and seeks to reassert the importance of cultural production and consumption against the purely economic imperatives of the creative industries. Across 43 chapters drawn from a wide range of geographic and disciplinary perspectives, this comprehensive volume offers a critical and empirically informed examination of the contemporary cultural industries. A range of cultural industries are explored from videogames to art galleries, all the time focussing on the culture that is being produced and its wider symbolic and socio-cultural meaning. Individual chapters consider their industrial structure, the policy that governs them, their geography, the labour that produces them, and the meaning they offer to consumers and participants. The collection also explores the historical dimension of cultural industry debates, providing context for new readers as well as critical orientation for those more familiar with the subject. Questions of industry structure, labour, place, international development, consumption, and regulation are all explored in terms of their historical trajectory and potential future direction. By assessing the current challenges facing the cultural industries, this collection of contemporary scholarship provides students and researchers with an essential guide to key ideas, issues, concepts, and debates in the field.

Collective Wisdom Katerina Cizek, William Uricchio, 2022-11-01 How to co-create and why: the emergence of media co-creation as a concept and as a practice grounded in equity and justice. Co-creation is everywhere. It's how the internet was built, it generated massive prehistoric rock carvings, it powered the development of vaccines for COVID-19 in record time. Co-creation offers alternatives to the idea of the solitary author privileged by top-down media. But co-creation is easy to miss as individuals often take credit for and profit from collective forms of authorship, erasing whole cultures and narratives as they do so. **Collective Wisdom** offers the first guide to co-creation as a concept and as a practice, tracing co-creation in a media making that ranges from collaborative journalism to human-AI partnerships. Why co-create and why now? The many coauthors, drawing on a remarkable array of professional and personal experience, focus on the radical, sustained practices of co-creating media within communities and with social movements. They explore the urgent need for co-creation across disciplines and organization, and the latest methods for collaborating with nonhuman systems in biology and technology. The idea of collective intelligence is not new and has been applied to such disparate phenomena as decision making by consensus and hived insects. **Collective Wisdom** goes further. With conceptual explanation and practical examples, this book shows that co-creation only becomes wise when it is grounded in equity and justice. With Coauthors

commanded every Christian's attention. Historians and liturgists alike have been fascinated by the Church but deterred from researching it because of the notorious difficulty of access to material. This account of the church's growth and decline draws on archival sources from several countries many not hitherto used for research and publications in German as well as English. Previous accounts in English have focused on the Church in the English speaking world but this book breaks fresh ground by covering the Church's development in every country where it was active. Surveying Catholic Apostolic history polity and ministry it seeks to tell the story rather than using the Church as a test case for a preconceived hypothesis. In so doing it opens up a range of lines of inquiry for future researchers.

Design and Culture Maurice Barnwell, 2021-06-15 *Design and Culture: A Transdisciplinary History* offers an inclusive overview that crosses disciplinary boundaries and helps define the next phase of global design practice. This book examines the interaction of design with advances in technology developments in science and changing cultural attitudes. It looks to the past to prepare for the future and is the first book to offer an innovative transdisciplinary design history that integrates multidisciplinary sources of knowledge into a mindful whole. It shows design as a process that expresses goals through values and beliefs functioning as a major factor in contemporary cultural life. Starting with the development of the Industrial Revolution the book focuses on the evolution of design and culture in the twentieth century to predict where design will go in the future. Given the major social and political shifts currently unfolding across the globe and the resulting changing demographics and environmental degradation *Design and Culture* encourages collaboration and communication between disciplines to prepare for the future of design in a rapidly changing world.

Learning from Logistics Clare Lyster, 2016-02-22 In the 19th century railroads and canals provided both structure and motor for city development. This role has been taken over today by the global flow of data and products as the author argues. Flow of material and communication is the DNA of contemporary environments. This development has enormous and partially unfathomable implications for our city fabric. Logistics networks and their complex structure increasingly bear upon many urban spheres. Counter trends to the ubiquitous internet retail trade to name one of the most palpable phenomena are gaining momentum as well exemplified by the criticism of labor conditions in e-commerce and the trend to buy regional products from local stores. The author describes the current development and its impact on architecture landscape architecture and urbanism. Aspects such as today's hypermobility of both products and people have repercussions in design work and create new paradigms for architecture and urban design. Concepts for the integration of these new issues are introduced by a number of exemplary urban design projects.
