Methods and Models of the Fourth Assessment Christoph Fischer,Berthold Traub,2019-09-24 The Swiss National Forest
Inventory NFI is a forest survey on national level which started in 1982 and has already reached its 5th survey cycle NFI5 It
can be characterized as a multisource and multipurpose inventory where information is mainly collected from terrestrial field
surveys using permanent sample plots In addition data from aerial photography GIS and forest service questionnaires are
also included The NFI s main objective is to provide statistically reliable and sound figures to stakeholders such as politicians
researchers ecologists forest service timber industry national and international organizations as well as to international
projects such as the Forest Resources Assessment of the United Nations For Switzerland NFI results are typically reported
on national and regional level State of the art methods are applied in all fields of data collection which have been proven to
be of international interest and have even served as a basis for other European NFIs The presented methods are applicable
to any sample based forest inventory around the globe In 2001 the Swiss NFI published its methods for the first time Since
then many methodological changes and improvements have been introduced This book describes the complete set of
methods and revisions since NFI2 It covers various topics ranging from inventory design and statistics to remote sensing
field survey methods and modelling It also describes data quality concepts and the software framework used for data storage
statistical analysis and result presentation
