Universality In Set Theories Philosophische Analyse Philosophical Analysis:

Universality in Set Theories Manuel Bremer, 2013-05-02 The book discusses the fate of universality and a universal set in several set theories The book aims at a philosophical study of ontological and conceptual questions around set theory Set theories are ontologies They posit sets and claim that these exhibit the essential properties laid down in the set theoretical axioms Collecting these postulated entities quantified over poses the problem of universality Is the collection of the set theoretical entities itself a set theoretical entity What does it mean if it is and what does it mean if it is not To answer these questions involves developing a theory of the universal set We have to ask Are there different aspects to universality in set theory which stand in conflict to each other May inconsistency be the price to pay to circumvent ineffability And most importantly How far can axiomatic ontology take us out of the problems around universality

Triangulation Maria Cristina Amoretti, Gerhard Preyer, 2013-05-02 This volume breaks new

grounds by bringing together a great variety of innovative contributions on triangulation epistemology and mind The notion of triangulation developed by Donald Davidson 1917 2003 during the last two decades of his life has changed our understanding of the relationship between subjective intersubjective and objective and shed new light on concepts such as externalism internalism communication interpretation and language At the same time however it has been strongly criticized for several aspects The papers collected in this volume written by established contributors aim to provide new insights into the contemporary debate on triangulation The upshot is not only a deeper understanding of Davidson s ideas but also a new appreciation of some central problems of epistemology and the philosophy of mind with regard to adjoining disciplines such as for instance cognitive sciences and the philosophy of language The Philosopher's Index ,2008 Vols for 1969 include a section of abstracts *Robust Reality* George Englebretsen,2013-05-02 Contemporary analytic philosophy can generally be characterized by the following tendencies commitment to first order predicate logic as the only viable formal logic rejection of correspondence theories of truth a view of existence as something expressed by the existential quantifier a metaphysics that doesn t give the world as a whole its due This book seeks to offer an alternative analytic theory one that provides a unified account of what there is how we speak about it the underlying logic of our language how the truth of what we say is determined and the central role of the real world in all of this The result is a robust account of reality The inspiration for many of the ideas that constitute this overall theory comes from such sources as Aristotle Leibniz Ryle and Sommers

Truth in Fiction Franck Yann Lihoreau,2013-05-02 The essays collected in this volume are all concerned with the connection between fiction and truth This question is of utmost importance to metaphysics philosophy of language philosophical logic and epistemology raising in each of these areas and at their intersections a large number of issues related to creation existence reference identity modality belief assertion imagination pretense etc All these topics and many more are addressed in this collection which brings together original essays written from various points of view by philosophers of diverse trends These essays constitute major contributions to the current debates that the connection between truth and fiction continually enlivens and give a sense of the directions in which research on this question is heading **Property**

Possession as Identity Patrick X. Monaghan,2013-05-02 In this essay Monaghan argues for an account of property possession as strict numerical identity According to this account for an entity to possess a property is for that entity and that property to be numerically identical to each other To defend this view he argues against two views he call Externalism and Internalism about property possession Monaghan argues that it is impossible for one entity to possess a second entity as a property He provides replies to variety of objections one might raise against his account **Tome 1 Philosophie du**

langage, Logique philosophique / Volume 1 Philosophy of language, Philosophical logic Guttorm Fløistad,G.H. Von Wright,2012-12-06 The present publication is a continuation of two earlier series of chronicles Philosophy in the Mid Century Firenze 1958 59 and Contemporary Philosophy Firenze 1968 edited by Raymond KJibansky As with the earlier series the

present chronicles purport to give a survey of significant trends in contemporary philosophical discussion. The time space covered by the present series is approximately 1966-1978. The need for such surveys has, I believe, increased rather than decreased over the last years. The philosophical scene appears for various reasons more complex than ever before. The continuing process of specialization in most branches, the emergence of new schools of thought, particularly in philosophical logic and the philosophy of language, the convergence of interest, though not necessarily of opinion, of different traditions upon certain problems, and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors. Surveys of the present kind are a valuable source of knowledge of this complexity and may, as such, be an assistance in renewing the understanding of one's own philosophical problems. The surveys, it is to be hoped, may also help to strengthen the Socratic element of modern philosophy: the dialogue or *Kommunikationsgemeinschaft*. So far, four volumes have been prepared for the new series. The present chronicles in the Philosophy of Language and Philosophical Logic (Vol. I) are followed by chronicles in the Philosophy of Science (Vol. II) and Philosophy of Action (Vol. III).
