Voice And V Lessons From Acehnese Linguistic Inquiry Monographs:

Voice and v Julie Anne Legate, 2014-10-24 An investigation of the syntactic structure of voice and v using Acehnese Malayo Polynesian as the empirical starting point In *Voice and v* Julie Anne Legate investigates the syntactic structure of voice using Acehnese as the empirical starting point A central claim is that voice is encoded in a functional projection VoiceP which is distinct from and higher than vP Legate further claims that VoiceP may be associated with phi features that semantically restrict the external argument position but do not saturate it Through minor variations in the properties of VoiceP Legate explains a wide range of non canonical voice constructions including agent agreeing passives grammatical object passives impersonals object voice constructions and applicative voice in causatives Her analysis draws on data from a typologically diverse set of languages not only Malayo Polynesian but also Celtic Scandinavian and Slavic *Voice and v* provides a detailed investigation into the syntactic structure of an understudied Malayo Polynesian language and thereby reveals important insights for the theoretical analysis of voice and the verb phrase Moreover the work applies and broadens these insights to a range of related passive like constructions crosslinguistically *Voice and v* thus joins a handful of model volumes that enlist typological depth and breadth to further our development of modern linguistic theory

Voice at the interfaces Itamar Kastner, This book presents the most comprehensive description and analysis to date of Hebrew morphology with an emphasis on the verbal templates Its aim is to develop a theory of argument structure alternations which is anchored in the syntax but has systematic interfaces with the phonology and the semantics Concretely the monograph argues for a specific formal system centered around possible values of the head Voice The formal assumptions are as similar as possible to those made in work on non Semitic languages The first part of the book four chapters is devoted to Hebrew the second part two chapters compares the current theory with other approaches to Voice and argument structure in the recent literature

Stative Inquiries Alfredo García-Pardo, 2020-11-15 This monograph studies stative predicates from a neo constructionist perspective and integrates them in a comprehensive theory of event and argument structure It focuses on two sets of stative verbs govern type verbs and object experiencer psychological verbs For govern verbs it shows how notions such as causativity and resultativity can also be ingredients of stative predicates and be derived syntactically The consequences of this proposal are further pursued in a crosslinguistic investigation of adjectival passives which are stative predicates of sorts For object experiencer psychological verbs it is shown that their Experiencer theta role can and should be derived as an aspectual entailment mediated by prepositional structure In defending this view this monograph reveals a syntactic parallelism between location verbs and object experiencer psychological verbs in many languages that has hitherto gone unnoticed This book will primarily appeal to researchers interested in lexical aspect and its connection to morphosyntax

Nominalization Artemis Alexiadou, Hagit Borer, 2020 This volume explores the progress of cross linguistic research into the structure of complex nominals since the publication of Chomsky's Remarks on Nominalization in 1970 The contributors

take stock of developments in this area and offer new perspectives based on data from a wide range of typologically diverse languages

Unraveling the complexity of SE Grant Armstrong, Jonathan E. MacDonald, 2021-05-22 This book makes a novel contribution to our understanding of Romance SE constructions by combining both diachronic and synchronic theoretical perspectives along with a range of empirical data from different languages and dialects The collection divided into four sections proposes that SE constructions may be divided into one class that is the result of grammaticalization of a reflexive pronoun up the syntactic tree from Voice and above and another class that has resulted from the reanalysis of reflexive and anticausative morphemes as an argument expletive or verbal morpheme generated in positions from Voice and below The contributions while varied in both empirical content and theoretical approach all serve to highlight different aspects of the overarching idea that SE constructions have evolved from these two distinct grammaticalization paths The book appeals to researchers and academics in the field and closes with a unified approach to various SE constructions that makes important use of its status as a verbal morpheme In addition to aligning a novel string of empirical contributions under a new theoretical umbrella a clear research direction emerges from this volume based on the morphosyntactic nature of SE itself Is it a clitic an agreement morpheme or a verbal morpheme

A Two-Tiered Theory of Control Idan Landau, 2015-05-22 A theory of control equally grounded in syntax and semantics that argues that obligatory control is achieved either through predication or through logophoric anchoring This book revives and reinterprets a persistent intuition running through much of the classical work that the unitary appearance of Obligatory Control into complements conceals an underlying duality of structure and mechanism Idan Landau argues that control complements divide into two types In attitude contexts control is established by logophoric anchoring while non attitude contexts it boils down to predication The distinction is also syntactically represented Logophoric complements are constructed as a second tier above predicative complements The theory derives the obligatory de se reading of PRO as a special kind of de re attitude without ascribing any inherent feature to PRO At the same time it provides a principled explanation based on feature transmission for the agreement properties of PRO which are stipulated on competing semantic accounts Finally it derives a striking universal asymmetry the fact that agreement on the embedded verb blocks control in attitude contexts but not in non attitude contexts This book is unique in being firmly grounded in both the formal semantic and the syntactic studies of control offering an integrated view that will appeal to scholars in both areas By bringing to bear current sophisticated grammatical analyses it offers new insights into the classical problems of control theory

Probes and Their Horizons Stefan Keine, 2020-02-25 A comprehensive theory of selective opacity effects configurations in which syntactic domains are opaque to some processes but transparent to others within a Minimalist framework In this book Stefan Keine investigates in detail selective opacity configurations in which syntactic domains are opaque to some processes but transparent to others and develops a comprehensive theory of these syntactic configurations within a contemporary Minimalist framework Although such configurations have traditionally been

analyzed in terms of restrictions on possible sequences of movement steps Keine finds that analogous restrictions govern long distance dependencies that do not involve movement He argues that the phenomenon is more widespread and abstract than previously assumed He proposes a new approach to such effects according to which probes that initiate the operation Agree are subject to horizons which terminate their searches Selective opacity effects raise important questions about the nature of locality in natural language the representation of movement type asymmetries correlations between clause structure and locality and possible interactions between syntactic dependencies With a focus on in depth case studies of Hindi Urdu and German Keine offers detailed investigations of movement dependencies long distance agreement wh dependencies the A A distinction restructuring freezing effects successive cyclicity and phase theory Keine s account offers a thorough understanding of selective opacity and the systematic overarching generalizations to which it is subject **A**
