Graduate Studies, 1979 The University of Oxford L. W. B. Brockliss, 2016-04-15 This fresh and readable account gives a complete history of the University of Oxford from its beginnings in the eleventh century to the present day Written by one of the leading authorities on the history of universities internationally it traces Oxford's improbable rise from provincial backwater to one of the world's leading centres of research and teaching Laurence Brockliss sees Oxford's history as one of discontinuity as much as continuity describing it in four distinct parts First he explores Oxford as The Catholic University in the centuries before the Reformation when it was principally a clerical studium serving the needs of the Western church Then as The Anglican University in the years from 1534 to 1845 when Oxford was confessionally closed to other religions it trained the next generation of ministers of the Church of England and acted as a finishing school for the sons of the gentry and the well to do After 1845 The Imperial University saw the emergence over the following century of a new Oxford a university which was still elitist but now non-confessional became open to women as well as men took students from all round the Empire and was held together at least until 1914 by a novel concept of Christian service The final part The World University takes the story forward from 1945 to the present day and describes Oxford's development as a modern meritocratic and secular university with an ever growing commitment to high quality academic research Throughout the book Oxford's history is placed in the wider context of the history of higher education in the UK Europe and the world This helps to show how singular Oxford's evolution has been a story not of entitlement but of hard work difficult decisions and a creative use of limited resources and advantages to keep its destiny in its own hands *Peterson's Annual Guides to*
