California. Court of Appeal (2nd Appellate District). Records and Briefs California (State)., **Reinventing the Factory** Roy L. Harmon,Leroy D. Peterson,1990 The factory of the future is here We have the technology and professional knowledge say leading manufacturing consultants Roy Harmon and Leroy Peterson to implement revolutionary concepts that many managers might regard as futuristic In this path breaking book Harmon and Peterson move beyond theory to document more than a hundred real life applications of productivity improvement from the focused factory and assembly process design to the plantwide plan gathered from Andersen Consulting Arthur Andersen Co s offices around the world The reorganization of existing plants into multiple factories within a factory is the single most important feature of productivity improvement according to Harmon and Peterson These smaller units known as subplants are honed to the smallest practical size to ensure the highest level of productivity Multiple subplants can be clustered to focus accountability and authority for production of product families into easily managed groups of processes With hundreds of diagrams and using examples of companies that operate focused factories in dozens of countries Harmon and Peterson detail both the physical and organizational changes required to make the focused factory a successful and profitable feature of a plant s modernization In addition to creating subplants and subplant clusters Harmon and Peterson show how manufacturers can dramatically increase productivity by adopting a plantwide plan In its most basic form the plantwide plan is a layout of a single factory It includes to the extent practical not only the ideal layout but also step by step strategies for movement of individual processes from their current locations in the factory to final target destinations Harmon and Peterson explain how

managers can use the plantwide plan to eliminate the common problem of compromising ideals too early to accommodate assumed constraints and turn an existing factory into a competitive factory of the future today Flexibility creativity and dynamic planning are key concepts for attaining superior manufacturing results For plant modernization to be profitable the organizational structure must keep pace Achieving world class status is not enough The new hallmark of excellence must be continuous improvement to maintain a superior position The plans and suggestions outlined in Reinventing The Factory allow the entrepreneur the responsibility and authority to effect ongoing improvements and render processes adaptable to reflect additions or removals of product lines changes in sales volume over time and modifications resulting from previous or concurrent improvements Harmon and Peterson provide the valuable tools and methods necessary to attain such goals They highlight the dynamic nature of progress itself and show how managers can overcome the most tenacious habit the resistance to change Kuensel ,1988 *Advances in Manufacturing and Mechanical Engineering* Wahyu Kuntjoro,Aidah Jumahat,Farrahshaida Mohd Salleh,Rosnadiyah Bahsan,2013-09-03 Selected peer reviewed papers from the International Conference on Advances in Mechanical Engineering 2013 ICAME 2013 August 28 29 2013 Malacca Malaysia *The Cumulative Book Index* ,1995 A world list of books in the English language Cumulated Index to the Books ,1999
