Understanding Boko Haram James J. Hentz, Hussein Solomon, 2017-05-08 The primary objective of this book is to understand the nature of the Boko Haram insurgency in northeast Nigeria Boko Haram's goal of an Islamic Caliphate starting in the Borno State in the North East that will eventually cover the areas of the former Kanem Borno Empire is a rejection of the modern state system forced on it by the West The central theme of this volume examines the relationship between the failure of the state building project in Nigeria and the outbreak and nature of insurgency At the heart of the Boko Haram phenomenon is a country racked with cleavages making it hard for Nigeria to cohere as a modern state Part I introduces this theme and places the Boko Haram insurgency in a historical context There are however multiple cleavages in Nigeria ethnic regional cultural and religious and Part II examines the different state society dynamics fuelling the conflict Political grievances are common to every society however what gives Boko Haram the space to express such grievances through violence Importantly this volume demonstrates that the insurgency is in fact a reflection of the hollowness within Nigeria's overall security Part III looks at the responses to Boko Haram by Nigeria neighbouring states and external actors For Western actors Boko Haram is seen as part of the global war on terror and the fact that it has pledged allegiance to ISIS encourages this framing However as the chapters here discuss this is an over simplification of Boko Haram and the West needs to address the multiple dimension of Boko Haram This book will be of much interest to students of terrorism and political violence insurgencies African politics war and conflict studies and IR in general 1976

Drones and Responsibility Ezio Di Nucci, Filippo Santoni de Sio, 2016-07-01 How does the use of military drones affect the legal political and moral responsibility of different actors involved in their deployment and design This volume offers a fresh contribution to the ethics of drone warfare by providing for the first time a systematic interdisciplinary discussion of different responsibility issues raised by military drones The book discusses four main sets of questions First from a legal point of view we analyse the ways in which the use of drones makes the attribution of criminal responsibility to individuals for war crimes more complicated and what adjustments may be required in international criminal law and in military practices to avoid responsibility gaps in warfare From a moral and political perspective the volume looks at the conditions under which the use of military drones by states is impermissible permissible or even obligatory and what the responsibilities of a state in the use of drones towards both its citizens and potential targets are From a socio technical

perspective what kind of new human machine interaction might and should drones bring and which new kinds of shared agency and responsibility Finally we ask how the use of drones changes our conception of agency and responsibility The book will be of interest to scholars and students in military ethics and to those in law politics and the military involved in the design deployment and evaluation of military drones
