interview and the assessment process itself Chapter five provides guidelines on report writing and chapters six through sixteen consist of detailed critical reviews of neuropsychological tests and address the topics of intelligence achievement executive function attention memory language visual perception somatosensory olfactory function mood personality and response bias A unique feature is the inclusion of tables that summarize salient features of tests within each domain so that readers can easily compare measures Additional tables within each test review summarize important features of each test highlight aspects of each normative dataset and provide an overview of psychometric properties Of interest to neuropsychologists neurologists psychiatrists and educational and clinical psychologists working with adults as well as pediatric populations this volume will aid practitioners in selecting appropriate testing measures for their patients and will provide them with the knowledge needed to make empirically supported interpretations of test results

The Quantified Process Approach to Neuropsychological Assessment Amir M. Poreh, 2012-12-06 Since the late 1800s psychologists have been interested in discerning the strategies subjects employ to solve psychological tests Piaget 1928 Werner 1940 Gesell 1941 Much of this work however has relied on qualitative observations In the 1970s Edith Kaplan adopted this approach to the analysis of standardized neuropsychological measures Unlike her predecessors Dr Kaplan and her colleagues emphasized the application of modern behavioral neurology to the analysis of the test data Her approach was later termed the Boston Process Approach to neuropsychological assessment While Edith Kaplan's work generates a great deal of enthusiasm the qualitative nature of her analyses did not allow for its adoption by mainstream neuropsychologists However in recent years this limitation has begun to be addressed Clinicians and researchers have developed new methodologies for quantifying the Boston Process Approach leading to the emergence of a new field which is collectively termed the Quantified Process Approach Quantified Process Approach to Neuropsychological Assessment outlines the rationale for the emergence of this new approach and reviews the state of the art research literature and up to date clinical applications as they pertain to the evaluation of neuropsychiatric head injured and learning disabled patients When available norms and scoring forms are included in the appendices
