Using Technology in the Classroom Dee LaMont

Johnson, Cleborne D. Maddux, Leping Liu, 1997 To encourage teachers to share ideas and suggestions for integrating technology into the classroom *Using Technology in the Classroom* shows you how to change the way administrators, teachers, parents, and students think about the teaching and learning process. As this important book shows, technology can allow you to make the transition from teacher-directed learning to learner-centered learning, a change that will often draw in even hard-to-reach kids. More and more, society expects educators to incorporate computer and technology education into their classrooms. This book, with its specific planning and teaching strategies and advice on materials selection, implementation, and evaluation, will be your guide for making technology an integral part of your students' classroom experiences. Getting educators and school administrators to see technology as the key element in school restructuring can be an overwhelming task, but as this book shows, the practical value of getting students on computers at an early age is immense. You can accommodate a wider range of learning styles; you can guide students as they develop their problem-solving abilities and help them tap their creative energies. *Using Technology in the Classroom* shows you many practical ways for creating individualized, technology-based instructional programs and how to choose software that meets your teaching objectives, is developmentally appropriate, and can be adapted to each learning situation. To help you improve teaching and learning throughout the school years, this comprehensive guidebook discusses children's visual education, conceptual manipulation on the Internet, encouraging students to use computers in personally meaningful and practical ways, using sound in school projects, the need for culturally relevant learning activities, the spreadsheet as a problem-solving tool, cultural lag, and educational decisionmaking. *Using Technology in the Classroom* can show administrators, school board members, teachers, and university support faculty how to work together to design and use technology in the learning environment. As you will see, site-based professional development experiences that teach teachers how to use technology, multimedia, and telecommunications in the classroom are a first step for making technology a standard component of today's education system.

Computers in the Classroom Andrea R. Gooden, 1996-10-07 Since 1979 Apple Computer's Educational Grants program has provided computer equipment and training to schools through a nationwide competitive process. *Computers in the Classroom* tells the inspiring stories of some of these schools, showing how technology has revived the classroom. This illustrated book is an indispensable resource for teachers and parents, showing examples of students' work and with information on funding, resources, technical support, software, and where to find electronic and print data. 100 illus.

The Hybrid Teacher Emma Pass, 2021-06-23 A practical educational technology resource for educators teaching remotely or in the classroom. The most effective hybrid teachers are those that have a vast knowledge of instructional strategies, technologies, tools, and resources and can masterfully build meaningful relationships with students in person and through a screen. *The Hybrid Teacher: Using Technology to Teach In Person and Online* will teach educators to leverage the technology they have access to both in their traditional brick-and-mortar classrooms and in remote learning environments, including established online and hybrid schools.

emergency response models for pandemics natural disasters rural education and connecting with students who can't make it to school Many of us had to adapt to online teaching during the COVID 19 pandemic but we still need resources for optimizing our instruction and becoming the best teachers we can be This book is a practical guide for teachers who want to prepare for current and future remote instruction or leverage the best practices of remote instruction and EdTech tools to bring back to their brick and mortar classrooms Inside you'll learn about the impact of social and economic differences on classroom technology and you'll find strategies and advice for maximizing success in each situation Learn how best to leverage technology in traditional brick and mortar and remote classrooms with case studies of the hybrid school model Gain tips and techniques to ensure that your teachers students and parents have the skills to succeed with technology Discover strategies for setting norms and expectations and transitioning between online and traditional learning Put into place proven methods for accountability and assessment of classroom successes Gain resources to the most effective educational technologies available today in multiple subject areas including English language arts science math social studies visual arts dance drama music and general education View sample lesson plans for how to implement tools into your classroom build culture and community and adapt for different learners Given the current push to remote teaching during the pandemic and the uncertainty over what the return to school and the traditional brick and mortar classroom will look like *The Hybrid Teacher* will be an invaluable resource on the shelves of teachers and administrators alike

Teaching with Technology Priscilla Norton, Karin M. Wiburg, 2003 The distinctive characteristic of *TEACHING WITH TECHNOLOGY* Second Edition is its clear correlation between theory and practice This text focuses on ways to use technology to foster learning in K-12 classrooms instead of presenting the mechanics of computer operation Norton and Wiburg's chapters are not based on computer applications they are based instead on how technology can support student acquisition of literacy content knowledge problem solving participating in communities and student utilization of information and systems of assessment
