What is Life? Erwin Schrödinger, 2012-03-26 What Is Life is Nobel laureate Erwin Schrödinger's exploration of the question which lies at the heart of biology His essay Mind and Matter investigates what place consciousness occupies in the evolution of life and what part the state of development of the human mind plays in moral questions Autobiographical Sketches offers a fascinating fragmentary account of his life as a background to his scientific writings What is Life? Erwin Schrödinger, 2012 What Is Life is Nobel laureate Erwin Schrödinger's exploration of the question which lies at the heart of biology His essay Mind and Matter investigates what place consciousness occupies in the evolution of life and what part the state of development of the human mind plays in moral questions Autobiographical Sketches offers a fascinating fragmentary account of his life as a background to his scientific writings *Ambivalences of Creating Life* Kristin Hagen, Margret Engelhard, Georg Toepfer, 2015-08-27 Synthetic biology is the label of a new technoscientific field with many different facets and agendas One common aim is to create life primarily by using engineering principles to design and modify biological systems for human use In a wider context the topic has become one of the big cases in the legitimization processes associated with the political agenda to solve global problems with the aid of bio technological innovation Conceptual level and meta level analyses are needed we should sort out conceptual ambiguities to agree on what we talk about and we need to spell out agendas to see the disagreements clearly The book is based on the interdisciplinary summer school Analyzing the societal dimensions of synthetic biology which took place in Berlin in September 2014 The contributions address controversial discussions around the philosophical examination public perception moral evaluation and governance of synthetic biology **Information Studies And The Quest For Transdisciplinarity: Unity Through Diversity** Mark Burgin, Wolfgang Hofkirchner, 2017-03-27 This book is the second volume of a two volume edition based on the International Society for Information Studies Summit Vienna 2015 on The Information Society at the Crossroads Response and Responsibility of the Sciences of Information see summit.is4is.org The book gives an up to date multiaspect exposition of contemporary studies in the field of information and related areas It presents most recent achievements ideas and opinions of leading researchers in this domain reflecting their quest for advancing information science and technology With the goal of building a better society in which social and technological innovations help make information key to the flourishing of humanity we dispense with the bleak view of the dark side of information society It is aimed at readers that conduct research into any aspect of information information society and information technology who develop or implement social or technological applications It is also for those who have an interest in participating in setting the goals for the sciences of information and the social applications of technological achievements and the scientific results Essays on the Frontiers of Modern Astrophysics and Cosmology Santhosh Mathew, 2013-11-08 This book is a collection of fourteen essays that describe an inspiring journey through the universe and discusses popular science topics that modern physics and cosmology are

struggling to deal with What is our place in the universe and what happens in the magnificent cosmos where we exist for a brief amount of time In an unique way that incorporates mythological and philosophical perspectives the essays in this work address the big questions of what the universe is how it came into being and where it may be heading This exciting adventure is a rich scientific history of elegant physics mathematics and cosmology as well as a philosophical and spiritual pursuit fueled by the human imagination Nineteen Ways of Looking at Consciousness Patrick House,2022-10-11 A concise elegant and thought provoking exploration of the mystery of consciousness and the functioning of the brain Despite decades of research remarkable imagery and insights from a range of scientific and medical disciplines the human brain remains largely unexplored Consciousness has eluded explanation Nineteen Ways of Looking at Consciousness offers a brilliant overview of the state of modern consciousness research in twenty brief revealing chapters Neuroscientist and author Patrick House describes complex concepts in accessible terms weaving brain science technology gaming analogy and philosophy into a tapestry that illuminates how the brain works and what enables consciousness This remarkable book fosters a sense of mystery and wonder about the strangeness of the relationship between our inner selves and our environment

The Ghost in the Atom P. C. W. Davies, Julian R. Brown, 1993-07-30 In this book which has its origin in a series of radio broadcasts Paul Davies interviews eight physicists involved in debating and testing quantum theory with radically different views of its significance *World According To Quantum Mechanics, The: Why The Laws Of Physics Make Perfect Sense After All (Second Edition)* Ulrich Mohrhoff, Manu Jaiswal, 2018-10-12 The authors should be recognised for their efforts to present a mathematically rigorous introduction to Quantum Mechanics QM in a form that has broad appeal there are not many introductory QM texts that would cover for example decoherence I think many educators would appreciate this book especially those interested in courses that combine science and philosophy Contemporary Physics Apart from providing a lucid introduction to the mathematical formalism and conceptual foundations of quantum mechanics we explain why the laws of physics have the form that they do In addition we present a new and unique look at the quantum world steering clear of two common errors the error of the ontologists who reify a calculational tool and the error of the anti realists for whom physical theories are simply devices for expressing regularities among observations The new edition of this acclaimed text adds around 200 pages on a variety of topics such as how the founders sought to make sense of quantum mechanics Kant s theory of science QBism Everettian quantum mechanics de Broglie Bohm theory environmental decoherence contextuality nonlocality and the paradox of subjectivity the curious fact that the world seems to exist twice once for us in our minds and once by itself independently of us New Technical Books New York Public Library, 1992

Subject Guide to Books in Print ,1993 Forthcoming Books Rose Arny, 1992-10 What Is Life? Erwin Schrodinger, 2014-04-07 Nobel laureate Erwin Schrodinger s What is Life is one of the great science classics of the twentieth

century A distinguished physicist's exploration of the question which lies at the heart of biology it was written for the layman but proved one of the spurs to the birth of molecular biology and the subsequent discovery of the structure of DNA The philosopher Karl Popper hailed it as a beautiful and important book by a great man to whom I owe a personal debt for many exciting discussions It appears here together with Mind and Matter his essay investigating a relationship which has eluded and puzzled philosophers since the earliest times Schrodinger asks what place consciousness occupies in the evolution of life and what part the state of development of the human mind plays in moral questions Brought together with these two classics are Schrodinger's autobiographical sketches published and translated here for the first time They offer a fascinating fragmentary account of his life as a background to his scientific writings making this volume a valuable addition to the shelves of scientist and layman alike **New Scientist and Science Journal**, 1992 **TL·S, the Times Literary Supplement**, 1995 Books in Print, 1977 **J.
