Culture Sanna Karkulehto, Aino-Kaisa Koistinen, Essi Varis, 2019-07-10 The time has come for human cultures to seriously think to severely conceptualize and to earnestly fabulate about all the nonhuman critters we share our world with and to consider how to strive for more ethical cohabitation *Reconfiguring Human Nonhuman and Posthuman in Literature and Culture* tackles this severe matter within the framework of literary and cultural studies The emphasis of the inquiry is on the various ways actual and fictional nonhumans are reconfigured in contemporary culture although as long as the domain of nonhumanity is carved in the negative space of humanity addressing these issues will inevitably clamor for the reconfiguration of the human as well The Open Access version of this book available at <https://www.taylorfrancis.com/books/reconfiguring-human-nonhuman-posthuman-literature-culture-sanna-karkulehto-aino-kaisa-koistinen-essi-varis-e-10-4324-9780429243042> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Cultural Studies and Anti-Consumerism Sam Binkley, Jo Littler, 2014-02-25 Anti consumerism has become a conspicuous part of contemporary activism and popular culture from culture jams and actions against Esso and Starbucks through the downshifting and voluntary simplicity movements the rise of ethical consumption and organic and the high profile of films and books like *Supersize Me* and *No Logo* A rising awareness of labor conditions in overseas plants the environmental impact of intensified consumer lifestyles and the effects of neo liberal privatization have all stimulated such popular cultural opposition However the subject of anti consumerism has received relatively little theoretical attention particularly from cultural studies which is surprising given the discipline's historical investments in extending radical politics and exploring the complexities of consumer desire This book considers how the expanding resources of contemporary cultural theory might be drawn upon to understand anti consumerist identifications and practices how railing against the social and cultural effects of consumerism has a complex past as well as present and it pays attention to the interplays between the different movements of anti consumerism and the particular modes of consumer culture in which they exist In addition as well as using cultural studies to analyse anti consumerism it also asks how such anti consumerist practices and discourse challenges some of the presumptions and positions currently held in cultural studies This book was previously published as a special issue of *Cultural Studies*

Dictionary of Critical Realism Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism

Handbook of Ecocriticism and Cultural Ecology Hubert

Zapf,2016-05-10 Ecocriticism has emerged as one of the most fascinating and rapidly growing fields of recent literary and cultural studies From its regional origins in late twentieth century Anglo American academia it has become a worldwide phenomenon which involves a decidedly transdisciplinary and transnational paradigm that promises to return a new sense of relevance to research and teaching in the humanities A distinctive feature of the present handbook in comparison with other survey volumes is the combination of ecocriticism with cultural ecology reflecting an emphasis on the cultural transformation of ecological processes and on the crucial role of literature art and other forms of cultural creativity for the evolution of societies towards sustainable futures In state of the art contributions by leading international scholars in the field this handbook maps some of the most important developments in contemporary ecocritical thought It introduces key theoretical concepts issues and directions of ecocriticism and cultural ecology and demonstrates their relevance for the analysis of texts and other cultural phenomena Populations, Biocommunities, Ecosystems George P. Stamou,2012 Discussions on historical and philosophical issues in ecology have been rather limited This volume presents an enriched and comprehensive review on ecological issues The topics covered in this e book include the emergence of the field of life history st **The Poetics and Politics of the Desert** Catrin Gersdorf,2009-01-01 This study explores the ways in which the desert as topographical space and cultural presence shaped and reshaped concepts and images of America Once a territory outside the geopolitical and cultural borders of the United States the deserts of the West and Southwest have since emerged as canonical American landscapes Drawing on the critical concepts of American studies and on questions and problems raised in recent debates on ecocriticism The Poetics and Politics of the Desert investigates the spatial rhetoric of America as it developed in view of arid landscapes since the mid nineteenth century Gersdorf argues that the integration of the desert into America catered to the entire spectrum of ideological and political responses to the history and culture of the US maintaining that the Americanization of this landscape was and continues to be staged within the idiomatic parameters and in reaction to the discursive authority of four spatial metaphors garden wilderness Orient and heterotopia Post-Growth Living Kate Soper,2020-09-29 The reality of runaway climate change is inextricably linked with the mass consumerist capitalist society in which we live And the cult of endless growth and endless consumption of cheap disposable commodities isn t only destroying the world it is damaging ourselves and our way of being How do we stop the impending catastrophe and how can we create a movement capable of confronting it head on In Alternative Prosperity philosopher Kate Soper offers an urgent plea for a new vision of the good life one that is capable of delinking prosperity from endless growth Instead she calls for a renewed emphasis on the joys of being one that is capable of collective happiness not in consumption but by creating a future that allows not only for more free time and less conventional and more creative ways of using it but also for more fulfilling ways of working and existing This is an urgent and necessary intervention into debates on climate change **Realism and Racism** Bob Carter,2002-01-04 There are continuing difficulties within social science surrounding concepts of race This book

suggests that these difficulties stem from the uncertain ontological and epistemological status of ideas about race itself a consequence of the recognition that concepts of race have all but lost their relevance as sociologically significant descriptions This book surveys ways in which social scientists have attempted to come to terms with this situation before developing an alternative approach based on recent work by realist authors This approach offers a radical revision of orthodox debates about race concepts about the possibility of a social science and about the nature of empirical research This illustrated through two policy examples an account of post war migration to the UK and debates about trans racial adoption in the UK and the USA
