Works of Jules Verne Jules Verne,1911 A Journey Into the Interior of the Earth Jules Verne,2020-01-02 On the 24th of May 1863 my uncle Professor Liedenbrock rushed into his little house No 19 K nigstrasse one of the oldest streets in the oldest portion of the city of Hamburg Martha must have concluded that she was very much behindhand for the dinner had only just been put into the oven Well now said I to myself if that most impatient of men is hungry what a disturbance he will make M Liedenbrock so soon cried poor Martha in great alarm half opening the dining room door Yes Martha but very likely the dinner is not half cooked for it is not two yet Saint Michael s clock has only just struck half past one Then why has the master come home so soon Perhaps he will tell us that himself Here he is Monsieur Axel I will run and hide myself while you argue with him And Martha retreated in safety into her own dominions I was left alone But how was it possible for a man of my undecided turn of mind to argue successfully with so irascible a person as the Professor With this persuasion I was hurrying away to my own little retreat upstairs when the street door creaked upon its hinges heavy feet made the whole flight of stairs to shake and the master of the house passing rapidly through the dining room threw himself in haste into his own sanctum But on his rapid way he had found time to fling his hazel stick into a corner his rough broadbrim upon the table and these few emphatic words at his nephew Axel follow me I had scarcely had time to move when the Professor was again shouting after me What not come yet And I rushed into my redoubtable master s study Otto Liedenbrock had no mischief in him I willingly allow that but unless he very considerably changes as he grows older at the end he will be a most original character He was professor at the Johann um and was delivering a series of lectures on mineralogy in the course of every one of which he broke into a passion once or twice at least Not at all that he was over anxious about the improvement of his class or about the degree of attention with which they listened to him or the success which might eventually crown his labours Such little matters of detail never troubled him much His teaching was as the German philosophy calls it subjective it was to benefit himself not others He was a learned egotist He was a well of science and the pulleys worked uneasily when you wanted to draw anything out of it In a word he was a learned miser Germany has not a few professors of this sort Works of Jules Verne, V.4 Jules Verne, **JULES VERNE 7 BOOKS SET COLLECTION.** JULES.
