McElroy, 2010 How the world evolved to its present dependence on carbon based fossil fuels the problems that ensued including the threat of disruptive global climate change and hazards

associated with our increasing dependence on unreliable but currently indispensable sources of energy such as oil and the opportunities for a more sustainable energy future

Ordering America William H. Young, 2010 *Ordering America* painting a felicitous portrait of Western civilization shows that its defining ideals rooted in man's common human nature a perception newly substantiated by modern evolutionary psychology were best fulfilled by realization of the American founding order Twentieth century progressivism and postmodern multiculturalism detoured America down the way of social constructionism human nature and equality are produced by culture and the state through groups The book sets a course to revive the Western ideals and return to an opportune center right American order applying latest scientific insights and restoring individual responsibility and reciprocity under more limited still energetic government befitting our century

Abortion Rights as the Free Exercise of Religion Peter S. Wenz, 2025-07-18 This book is the first to analyze Supreme Court decisions related to religious freedom and abortion rights showing that the Court gives women a religious right to abortions at least during the first half of pregnancy The Court considers any sincerely claimed religious belief to be worthy of accommodation if it causes no great harm Therefore a woman who claims that having a child would interfere with work dedicated to God's glory should receive an accommodation that exempts her from state laws restricting abortion as that is the kind of relief accorded by the Court to others seeking religious exemptions from generally applicable laws and other rules The Court cannot claim in this case that abortion causes great harm because it maintains even in its most recent abortion decision that it is neutral on the question of when the unborn attains a right to life and loss of the unborn's life is the central harm claimed by others regarding abortion The book argues that 21 weeks of gestation is the earliest point at which a right to life can be attributed to the fetus on a scientific basis
