Proceedings of the 25th Annual Cognitive Science Society Richard Alterman, David Kirsch, 2013-12-16 This volume features the complete text of the material presented at the Twenty Fifth Annual Conference of the Cognitive Science Society. As in previous years the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals presenting a multifaceted view of cognitive science. This volume includes all papers, posters and summaries of symposia presented at the leading conference that brings cognitive scientists together. The theme of this year's conference was the social, cultural and contextual elements of cognition including topics on collaboration, cultural learning, distributed cognition and interaction. [Proceedings of the Fifteenth Annual Conference of the Cognitive Science Society](#) Science Society Cognitive, Con, POLSON, 1993 This volume features the complete text of all regular papers, posters and summaries of symposia presented at the 15th annual meeting of the Cognitive Science Society. [Cognitive Lexicography](#) Carolin Ostermann, 2015-07-31 English lexicography and linguistics have always shared close ties yet the potential of cognitive linguistics for lexicography has only been hesitantly acknowledged in the literature. This is what cognitive lexicography attempts to change by using insights gained in cognitive semantic research for the development of new dictionary features. After a short survey of the history and practice of English monolingual learner lexicography as well as an outline of the relationship between linguistics and lexicography three new dictionary features are developed. They cover three different cognitive semantic theories as well as three different parts of the monolingual dictionary entry each time for a new set of lexemes. Frame semantics, conceptual metaphor theory as well as cognitive conceptions of polysemy are used to create a new example section for agentive nouns, a new defining structure for emotion terms and a new microstructural arrangement for particle entries. Dictionary analyses on all as well as user studies on two of the features complement these suggestions. The monograph thus presents a new approach to lexicography that incorporates into its description of lexical items how humans perceive and conceptualise language. *Insights in Neurocognitive Aging and Behavior: 2021* Kristy A.
