Adults recall with clarity experiences with individual teachers; children are in contact with schoolteachers on a daily basis; parents know the importance of teachers in their children's lives. Teachers are the key component in the hotly debated heavily funded education systems across the country. There is a profession at the centre of often contradictory interests: pedagogic, political, professional and public. Alexander Lockhart offers a survey of elementary and secondary schoolteachers and presents a profile of the profession as a whole. Among the topics he discusses are the characteristics of today's teachers, the conditions in which they work, their professional associations, career patterns in teaching, the political environment, current pedagogy and the public interest. His findings reflect a profession in transition. In elementary schools two thirds of teaching staff are women; in secondary schools two thirds are men. Half of all Canada's teachers are at mid career, aged 35-49 and near the top of their salary levels. Teachers' salaries have risen faster than the industrial composite in recent years, yet teachers are frustrated in their aspirations. As a group, Lockhart says, teachers have less autonomy than other professionals. Current policy directions and public attitudes aggravate this situation. Lockhart warns that the teaching profession is moving into crisis. The implications are serious for our children and for the quality of life throughout Canada as we look toward the twenty first century. **Radiologic Technology Clinical Manual** Robert J. DeMitchell, Richard Fossey, Terri A. DeMitchell, 2022-10-28 Nearly 50 years ago a California court heard a complaint from a recent high school graduate who alleged that he could not read at a level that would allow him to apply for let alone hold a meaningful job He asserted that the public school district was negligent and that his prospects for a productive life were diminished by their negligence The court disagreed and educational malpractice was cast outside the schoolhouse gate and an educational malpractice wall was erected In sum both federal and state courts have constructed a sturdy wall against the recognition of educational malpractice lawsuits However recent advances in research on instruction statistical analyses that some have argued can identify substandard teaching may have cracked the wall Thus confluence of events may lead to demolishing the educational malpractice wall constructed over the past half century The authors of Raising a Cautionary Flag Educational Malpractice and the Professional Teacher explore the judicial reticence to recognize educational malpractice as a viable tort of negligence They review the concept of what constitutes a professional what is malpractice and how is it related to the professional malpractice of physicians and attorneys and the potential responses to education malpractice They conclude by raising a cautionary flag about breaching the judicial wall Public Sector Ethics Christopher Reddick, Tansu
