Meeting the Needs of Student Users in Academic Libraries Michele Crump, LeiLani Freund, 2012-10-04 Meeting the Needs of Student Users in Academic Libraries surveys and evaluates the current practice of learning commons and research services within the academic library community in order to determine if these learning spaces are functioning as intended To evaluate their findings the authors examine the measurement tools that libraries have used to evaluate usage and satisfaction including contemporary anthropological studies that provide a more detailed view of the student s approach to research The book takes a candid look at these redesigns and asks if improvements have lived up to expectations of increased service and user satisfaction Are librarians using these findings to inform the evolution and implementation of new service models or have they simply put a new shade of lipstick on the pig Takes an honest look at learning commons in academic libraries and discusses what is working and what is not Explores behind the statistics as to why users come to the library does the librarians concept of the library as place match user perception Looks at the anthropology of the user to gauge satisfaction with the services and space provided by the library via recent survey findings Stress-Free Success Heinrich Morgenthau, The photography world has long perpetuated a dangerous myth that suffering and stress are prerequisites for artistic excellence Walk into any photography forum art school or professional gathering and you ll hear stories of sleepless nights missed family dinners financial struggles and the constant pressure to produce the next groundbreaking image This narrative suggests that only through sacrifice exhaustion and relentless pursuit can a photographer achieve true success This belief system is not only false but actively harmful to both the individual photographer and the craft itself The romanticization of the tortured artist has created a culture where photographers feel guilty for taking breaks ashamed of prioritizing their mental health and convinced that work life balance is incompatible with artistic achievement The result is a community plagued by burnout anxiety depression and a host of physical ailments stemming from chronic stress The truth is that sustainable success in photography requires exactly the opposite approach When we operate from a place of wellbeing clarity and balance our creative vision sharpens our technical skills improve and our ability to connect with subjects and audiences deepens The stressed exhausted photographer may produce work but it rarely reaches the heights of what that same artist could achieve when operating from a foundation of health and happiness **Success Under Stress** Sharon Melnick, 2012-11-15 Sharon Melnick provides a flexible array of stress busting strategies to help you overcome the things that are weighing you down From overflowing priority lists to power hungry colleagues to nagging parental guilt stress is the defining characteristic of most of our lives Business psychologist Sharon Melnick teaches you how to gain control and exude
