

The dual focus of this volume is on the plastic nanoparticles (PNPs) that result from the embrittlement and abrasion of the plastic debris illustrated below, as well as the nanoparticles, including nanoplastics, which are the ubiquitous, if invisible, product of the Age of Nanotechnology. Plastic nanoparticles (PNPs) are derived from plastic wastes and become a hazardous material due to declining size and increasing surface to mass ratio, which results in the rapid increase of the sorption (absorption and/or adsorption) of environmental chemicals. Ecotoxic PNPs are then ingested by heterotrophic grazing microbes and are biomagnified in marine and other food webs. Plastic nanoparticles are an additional invisible vector for the movement of environmental chemicals throughout the biosphere, and raise public safety issues of compelling contemporary interest to all concerned citizens.

A riverine environment contaminated with plastic debris after a minor flooding event

The plastics in this photo will gradually abrade and disintegrate into mesoplastics (≤ 10 mm), then into microplastics (< 1 mm) that become increasingly invisible and difficult to quantify as they continue to devolve into plastic nanoparticles (≈ 100 nm).

"Nanoparticles in the environment could constitute a completely new class of non-biodegradable pollutants... [They are] highly reactive nanoparticles which, because of their small size, can have a total surface area measuring up to 1,000 square meters per gram." (Hett 2004)

Where Have Plastics Gone Biocatastrophe:

Plastic Surgery in Wars, Disasters and Civilian Life Anthony Roberts, 2023-04-20 The specialty of plastic surgery was developed and named by Sir Harold Gillies following his work between the two world wars reconstructing severely damaged servicemen from the First World War Sir Harold went on to inspire and train other surgeons from around the world Among them was his cousin Sir Archibald McIndoe who in the Second World War set up the unit at East Grinstead Hospital which looked after severely burned airmen and some other servicemen The airmen themselves set up the famous Guinea Pig Club which gave enormous social and often financial support to the severely injured After the Second World War specialized burn units were created throughout the UK including one at Stoke Mandeville Hospital where Anthony Roberts served After the number of war injuries had reduced the burn unit for all three services was set up at RAF Halton a few miles from Stoke Mandeville A close relationship between the hospitals developed which led to military surgeons being posted to Stoke Mandeville for training in the care of burns and an introduction to plastic surgery Most doctors will never be involved in a disaster during their working lives Anthony Roberts was involved in treating casualties from the Bradford City football stadium fire in 1985 that claimed 56 lives and resulted in hundreds more being injured many of them with severe burns It had a major effect on him and on all those involved It started his appearances on the media and his overseas visits to other countries to talk about it And subsequently he was asked to join and to lead other international efforts to provide help He led the first British team from Stoke Mandeville that gave aid in Sarajevo during the war He returned several times and has also given aid in three other war zones and six major disasters Because of this involvement in all these situations Professor Roberts taught junior trainee surgeons from the three British services and those of several foreign countries As well as his military involvement Anthony Roberts spent sixteen years working with the Royal Protection Group at State occasions and thirty years working as a motor racing track doctor including at Formula One level providing immediate and vital treatment to drivers who suffered serious injuries and burns following accidents on the track and to spectators There have been enormous changes in the specialty over the past fifty years and a detailed view of these is given in an absorbing account of this life enhancing surgery by one who served on the frontline in difficult and dangerous situations around the world [How to Avoid a Climate Disaster](#) Bill Gates, 2021-02-16 1 NEW YORK TIMES BEST SELLER In this urgent authoritative book Bill Gates sets out a wide ranging practical and accessible plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe Bill Gates has spent a decade investigating the causes and effects of climate change With the help of experts in the fields of physics chemistry biology engineering political science and finance he has focused on what must be done in order to stop the planet's slide to certain environmental disaster In this book he not only explains why we need to work toward net zero emissions of greenhouse gases but also details what we need to do to achieve this profoundly important goal He gives us a clear eyed description of the challenges we face Drawing on his understanding of innovation

and what it takes to get new ideas into the market he describes the areas in which technology is already helping to reduce emissions where and how the current technology can be made to function more effectively where breakthrough technologies are needed and who is working on these essential innovations Finally he lays out a concrete practical plan for achieving the goal of zero emissions suggesting not only policies that governments should adopt but what we as individuals can do to keep our government our employers and ourselves accountable in this crucial enterprise As Bill Gates makes clear achieving zero emissions will not be simple or easy to do but if we follow the plan he sets out here it is a goal firmly within our reach

Sustainability Politics and the Media. Sustainability issues in the face of media based agenda setting Nicholas Gudrich, 2016-08-23 Essay from the year 2016 in the subject Politics Environmental Policy grade 1 3

Leuphana Universit t L neburg course Umweltpolitik language English abstract While there can be no doubt that the modern information society does much to strengthen the global sustainability movement the mass media s shifting focus can also lead to serious problems when it comes to promoting those sustainability topics which do not make for interesting headlines and draw very little mediatic repercussion In this context one can distinguish several different problematic scenarios to each of which I will devote a short passage of this essay
