Tricky Design Tom Fisher, Lorraine Gamman, 2018-12-13 Tricky Design responds to the burgeoning of scholarly interest in the cultural meanings of objects by addressing the moral complexity of certain designed objects and systems. The volume brings together leading international designers, scholars and critics to explore some of the ways in which the practice of design and its outcomes can have a dark side even when the intention is to design for the public good. Considering a range of designed objects and relationships including guns, eyewear, assisted suicide kits, anti rape devices, passports and prisons, the contributors offer a view of design as both progressive and problematic, able to propose new material and human relationships yet also constrained by social norms and ideology. This contradictory, tricky quality of design is explored in the editors' introduction, which positions the objects, systems, services and things discussed in the book in relation to the idea of the trickster that occurs in anthropological literature as well as in classical thought, discussing design interventions that have positive and negative ethical consequences. These will include objects both material and immaterial, systems with both local and global scope and also different processes of designing. This important new volume brings a fresh perspective to the complex nature of things and makes a truly original contribution to debates in design ethics, design philosophy and material culture.

[Lemon-Aid New Cars and Trucks 2012](#) Phil Edmonston, 2011-12-03 Phil Edmonston Canada's automotive Dr. Phil pulls no punches. He says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases and free auto maintenance programs. In this all new guide, he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring and mind boggling depreciation. Many 2011-12 automobiles have chin to chest head restraints, blinding dash reflections and dash gauges that can't be seen in sunlight, not to mention painful wind tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save 2,000 by cutting freight fees and
