**World Economic Outlook, October 2013** International Monetary Fund. Research Dept.,2013-10-08 Global growth is in low gear and the drivers of activity are changing These dynamics raise new policy challenges Advanced economies are growing again but must continue financial sector repair pursue fiscal consolidation and spur job growth Emerging market economies face the dual challenges of slowing growth and tighter global financial conditions This issue of the World Economic Outlook examines the potential spillovers from these transitions and the appropriate policy responses Chapter 3 explores how output comovements are influenced by policy and financial shocks growth surprises and other linkages Chapter 4 assesses why certain emerging market economies were able to avoid the classical boom and bust cycle in the face of volatile capital flows during the global financial crisis World Economic Outlook, October 2016 International Monetary

Fund. Research Dept.,2016-10-04 According to the October 2016 World Economic Outlook global growth is projected to slow to 3.1 percent in 2016 before recovering to 3.4 percent in 2017 The forecast revised down by 0.1 percentage point for 2016 and 2017 relative to April's report reflects a more subdued outlook for advanced economies following the June U.K. vote in favor of leaving the European Union Brexit and weaker than expected growth in the United States These developments have put further downward pressure on global interest rates as monetary policy is now expected to remain accommodative for longer Although the market reaction to the Brexit shock was reassuringly orderly the ultimate impact remains very unclear as the fate of institutional and trade arrangements between the United Kingdom and the European Union is uncertain Financial market sentiment toward emerging market economies has improved with expectations of lower interest rates in advanced economies reduced concern about China's near term prospects following policy support to growth and some firming of commodity prices But prospects differ sharply across countries and regions with emerging Asia in general and India in particular showing robust growth and sub-Saharan Africa experiencing a sharp slowdown In advanced economies a subdued outlook subject to sizable uncertainty and downside risks may fuel further political discontent with anti integration policy platforms gaining more traction Several emerging market and developing economies still face daunting policy challenges in adjusting to weaker commodity prices These worrisome prospects make the need for a broad based policy response to raise growth and manage vulnerabilities more urgent than ever **Economic Report of the President**

called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes The Handbook of BRICS and Emerging Economies presents a comprehensive and multi faceted analysis of the BRICS countries and other emerging economies exploring their economic social environmental and governance dimensions and other challenges It brings together multi disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS how BRICS are impacting African economies and how other emerging economies including Chile Mexico Turkey and others in Africa and Central Asia compare It observes the impact of governance challenges both within individual countries and in the forum for co operation amongst them what issues related to gender and identity based violence are prevalent and what the security implications are and the role of BRICS is in contributing to peace keeping operations

Tax Effort and Tax Potential in Timor-Leste Asian Development Bank,2024-09-01 New empirical analysis shows that fiscal policy in Timor Leste has been unable to stabilize macroeconomic fluctuations over the last couple of decades Timor Leste collects relatively little non oil tax revenue and the large public expenditure envelope relies heavily on withdrawals from the Petroleum Fund Characterized by low tax collection and low tax effort Timor Leste s tax system simultaneously displays long run buoyancy of greater than one suggestive that growth has improved fiscal sustainability over time This study concludes that tax policy reforms are important to support domestic resource mobilization efforts The introduction of a modern value added tax VAT can complement other tax administration reforms Finally greater mobilization of domestic resources should go together with more efficient public spending

**The State of African Cities, 2014** United Nations Publications,2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
