Image Brokers Zeynep Devrim Gursel, 2016-04-12 Image Brokers is an in depth ethnography that reveals the labor and infrastructure behind news images and how they are circulated Zeynep Devrim Geursel presents an intimate look at the ways image brokers the people who manage the distribution or restriction of images construct and culturally mediate the images they circulate Through this framework news images become commodities that impact how politics and culture are visualized in the world Set against the backdrop of the War on Terror and based on fieldwork conducted at the photojournalism industry s centers of power in New York and Paris Image Brokers explores the transition from analog to digital technologies and shows how new digital and social media platforms continue to change photojournalism and create ever widening distribution networks The book is a powerful investigation of the processes of decision making amid the changing infrastructures of representation Provided by publisher Photojournalism and Citizen Journalism Stuart Allan, 2017-06-26

This volume brings together leading researchers concerned with ordinary citizens contributions to photojournalism particularly where capturing images of breaking news events is crucial to reportage It offers an evaluation of how photojournalism is evolving in digital contexts examining how today s emergent forms of co operation collaboration and connectivity between professional and amateur news photographers promise to improve photojournalism for tomorrow This book was originally published as two special issues in Digital Journalism and Journalism Practice **Women and**

Photography in Apartheid South Africa Marie Meyerding, 2025-04-29 Tracing the lives and works of five women in four case studies author Marie Meyerding examines the representation of women in the field of photography in South Africa in the second half of the twentieth century All of them are critically understudied with no existing scholarship dedicated exclusively to their photographic contributions Focusing on the representation of women on two different levels as agents behind the camera and as subjects in photographs it showcases women photographers portraying their female contemporaries and analyses to what extent they adhered to or subverted common forms of gender representation In recuperating their forgotten archives the book argues that none of these women are marginal figures but rather that each of them played a leading role in the field of photography in their own time The book will be of interest to scholars working in art history history of photography gender studies intersectionality and African studies **Recentering Africa in**

International Relations Marta Iñiguez de Heredia, Zubairu Wai, 2018-02-22 This innovative book responds to an existing demand for taking Africa out of a place of exception and marginality and placing it at the center of international relations and world politics Bringing together a number of scholars from various disciplinary backgrounds to stage a critical intervention into the problematic ways Africa is accounted for in the dominant discourses of international relations and global politics it challenges the structural and epistemic biases of IR that render the contributions of the continent invisible and situates the continent as a global region that exists beyond notions of lack disorder and failure Through these interventions the volume
