Handbook of Alternative Theories of Economic Development Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo classical tenets With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields this volume represents a landmark in the field of economic development It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition The subject matter is approached from several complementary perspectives From a historical angle the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment From a geographical angle it includes chapters on African Chinese Indian and Muslim approaches to economic development Different schools are also explored and discussed including nineteenth century US development theory Marxist Schumpeterian Latin American structuralism regulation theory and world systems theories of development In addition the Handbook has chapters on important events and institutions including The League of Nations The Havana Charter and UNCTAD as well as on particularly influential development economists Contemporary topics such as the role of finance feminism the agrarian issue and ecology and the environment are also covered in depth This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development It should be read by all serious scholars teachers and students of development studies and indeed anyone interested in alternatives to development orthodoxy

The Emergence of Routines Daniel M. G. Raff, Philip Scranton, 2016-12-06 This book is a collection of essays about the emergence of routines and more generally about getting things organized in firms and in industries in early stages and in transition These are subjects of the greatest interest to students of entrepreneurship and organizations as well as to business historians but the academic literature is thin The chronological settings of the book's eleven substantive chapters are historical reaching as far back as the late 1800s right up to the 1990s but the issues they raise are evergreen and the historical perspective is exploited to advantage The chapters are organized in three broad groups examining the emergence

of order and routines in initiatives studying the same subject in ongoing operations and a third focusing specifically on the phenomena of transition The topics range from the Book of the Month Club to industrial research at Alcoa from the evolution of procurement and coordination to project based industries such as bridge and dam building and the governance of defence contracting and from the development of project performance appraisal at the World Bank to the way the global automobile industry collectively redesigned the internal combustion engine to deal with after the advent of environmental regulation The chapters are vivid and thought provoking in themselves and for pedagogical purposes offer excellent jumping off points for discussion of relevant experiences and cognate academic literature Global 1968 A. James McAdams,Anthony P.

Monta,2021-06-01 Global 1968 is a unique study of the similarities and differences in the 1968 cultural revolutions in Europe and Latin America The late 1960s was a time of revolutionary ferment throughout the world Yet so much was in flux during these years that it is often difficult to make sense of the period In this volume distinguished historians filmmakers musicologists literary scholars and novelists address this challenge by exploring a specific issue the extent to which the period that we associate with the year 1968 constituted a cultural revolution They approach this topic by comparing the different manifestations of this transformational era in Europe and Latin America The contributors show in vivid detail how new social mores innovative forms of artistic expression and cultural religious and political resistance were debated and tested on both sides of the Atlantic In some cases the desire to confront traditional beliefs and conventions had been percolating under the surface for years Yet they also find that the impulse to overturn the status quo was fueled by the interplay of a host of factors that converged at the end of the 1960s and accelerated the transition from one generation to the next These factors included new thinking about education and work dramatic changes in the self presentation of the Roman Catholic Church government repression in both the Soviet Bloc and Latin America and universal disillusionment with the United States The contributors demonstrate that the short and long term effects of the cultural revolution of 1968 varied from country to country but the period s defining legacy was a lasting shift in values beliefs lifestyles and artistic sensibilities Contributors A James McAdams Volker Schlöndorff Massimo De Giuseppe Eric Drott Eric Zolov William Collins Donahue Valeria Manzano Timothy W Ryback Vania Markarian Belinda Davis J Patrice McSherry Michael Seidman Willem Melching Jaime M Pensado Patrick Barr Melej Carmen Helena T Ilez Alonso Cueto and Ignacio Walker **The Governance of**

Infrastructure Kai Wegrich,Genia Kostka,Gerhard Hammerschmid,2017 In addressing this perennial question this volume the fourth edition in an annual series tackling different aspects of governance around the world makes the case for a governance perspective on infrastructure This implies moving beyond rational economic analysis of what should be done towards an analysis of the political institutional and societal mechanisms that shape decision making about infrastructure investment planning and implementation **Historicizing Self-Interest in the Modern Atlantic World** Christine

Zabel,2021-03-15 This volume historicizes the use of the notion of self interest that at least since Bernard de Mandeville and

Adam Smith's theories are considered a central component of economic theory. Having in the twentieth century become one of the key features of rational choice models and thus is seen as an idealized trait of human behavior, self-interest has despite Albert O. Hirschman's pivotal analysis of self-interest only marginally been historicized. A historicization of self-interest however offers new insights into the concept by asking why, when, for what reason, and in which contexts the notion was discussed or referred to, how it was employed by contemporaries, and how the different usages developed and changed over time. This helps us to appreciate the various transformations in the perception of the notion and also to explore how and in what ways different people at different times and in different regions reflected on or realized the act of considering what was in their best interest. The volume focuses on those different usages, knowledges, and practices concerned with self-interest in the modern Atlantic World from the seventeenth to twentieth centuries by using different approaches including political and economic theory, actuarial science, anthropology, or the history of emotions. Offering a new perspective on a key component of Western capitalism, this is the ideal resource for researchers and scholars of intellectual, political, and economic history in the modern Atlantic World.

To Reform the World Guy Fiti Sinclair, 2017. This book explores how international organizations (IOs) have expanded their powers over time without formally amending their founding treaties. IOs intervene in military, financial, economic, political, social, and cultural affairs and increasingly take on roles not explicitly assigned to them by law. Sinclair contends that this mission creep has allowed IOs to intervene internationally in a way that has allowed them to recast institutions within and interactions among states, societies, and peoples on a broadly Western liberal model. Adopting a historical and interdisciplinary socio-legal approach, Sinclair supports this claim through detailed investigations of historical episodes involving three very different organizations: the International Labour Organization in the interwar period, the United Nations in the two decades following the Second World War, and the World Bank from the 1950s through to the 1990s. The book draws on a wide range of original institutional and archival materials, bringing to light little-known aspects of each organization's activities, identifying continuities in the ideas and practices of international governance across the twentieth century, and speaking to a range of pressing theoretical questions in present-day international law and international relations.

International Development Corinna R. Unger, 2018-09-06. *International Development: A Postwar History* offers the first concise historical overview of international development policies and practices in the 20th century. Embracing a longue durée perspective, the book describes the emergence of the development field at the intersection of late colonialism, the Second World War, the onset of decolonization, and the Cold War. It discusses the role of international organizations, colonial administrations, national governments, and transnational actors in the making of the field and analyzes how the political, intellectual, and economic changes over the course of the postwar period affected the understanding of and expectations toward development. By drawing on examples of development projects in different parts of the world and in different fields, Corinna R. Unger shows how the plurality of development experiences shaped the notion of development as we know it today.
