What Webs We Weave 4 Dont Look Back:

The God Who Doesn't Exist Fergus McGinley, 2025-02-01 Welcome to The God Who Doesn't Exist Drawing on insights from parenting education theoretical physics evolutionary philosophy psychology comparative religion biblical exegesis and political theory an eclectic and original approach the author playfully describes as anti theology The amazing story unfolds of two Gods one who doesn't exist whom we created ourselves and one who does exist whom we didn't create The first of these gods is the familiar God of human history the God or gods we believed in just about forever then very recently dumped An unpredictable and judgmental God who seemed occasionally to do right by us but more often went AWOL just when we needed them the most We lived in constant fear of offending them and were terrified that if we didn't play our cards right in this life they'd consign us to hell in a handcart in the next Good riddance to the God who doesn't exist The God who exists however is a very different god to the one who doesn't Their primary quality seems to be something vastly more urgent for the human race than providing daily bread saving us from enemies and forgiving our sins it is selfless love teaching Yes the acquisition of the capacity for intentional selfless cooperation is a fundamental evolutionary imperative essential for our survival and flourishing generally especially critical right now when we seem to be on the brink of self destruction Self destruction yes will we survive the latest threats of global warming nuclear pandemic uncontrolled development of AI Will the selfless love teaching God who exists ride to our rescue just in the nick of time Read on then if you dare and find out

The Tangled Web We Weave James Ball, 2020-10-06 We all see what the internet does and increasingly don't like it but do we know how and more importantly who makes it work that way That's where the real power lays The internet was supposed to be a thing of revolutions As that dream curdles there is no shortage of villains to blame from tech giants to Russian bot farms But what if the problem is not an issue of bad actors ruining a good thing What if the hazards of the internet are built into the system itself That's what journalist James Ball argues as he takes us to the root of the problem from the very establishment of the internet's earliest protocols to the cables that wire it together He shows us how the seemingly abstract and pervasive phenomenon is built on a very real set of materials and rules that are owned financed designed and regulated by very real people In this urgent and necessary book Ball reveals that the internet is not a neutral force but a massive infrastructure that reflects the society that created it And making it work for and not against us must be an endeavor of the people as well

The Web We Weave Jeff Jarvis, 2024-10-08 A bold defense of the internet arguing attempts to fix and regulate it are often misguided essential reading for anyone who cares about the future of the internet Taylor Lorenz author of *Extremely Online* The internet stands accused of dividing us spying on us making us stupid and addicting our children In response the press and panicked politicians seek greater regulation and control which could ruin the web before we are finished building it Jeff Jarvis is convinced we can have a saner conversation about the internet Examining the web's past present and future he shows that many of the problems the media lays at the internet's door are the result of our own failings

The internet did not make us hate we brought our bias bigotry and prejudice with us online That s why even well intentioned regulation will fail to fix hate speech and misinformation and may instead imperil the freedom of speech the internet affords to all Once we understand the internet for what it is a human network we can reclaim it from the nerds pundits and pols who are in charge now and turn our attention where it belongs to fostering community conversation and creativity online The Web We Weave offers an antidote to today s pessimism about the internet outlining a bold vision for a world with a web that works for all of us
