World Mineral Exploration John E. Tilton, Roderick G. Eggert, Hans H. Landsberg, 2015-10-16 Mineral exploration is an economic activity of worldwide importance. This volume originally published in 1988 makes a substantial contribution to the understanding of mineral exploration and the major economic, political and geologic forces that govern it. Some chapters examine the behaviour and performance of particular participants in the exploration process while others focus on specific countries. This is a valuable title for any student interested in environmental studies and the global impact of economics.

The Green Case (Routledge Revivals) Steven Yearley, 2014-06-23 First published in 1991, this title provides a comprehensive and objective account of the basis of green arguments and their social and political implications. By the beginning of the 1990s, environmental awareness had become widespread, popular and fashionable throughout the West, adopted by politicians, manufacturers and advertising agencies. The book sets out to explain why and how the green wave developed and examines the forces still shaping green politics and policies at an international level. With important implications across the fields of Sociology, Development Studies and Environment and Sustainability, this reissue will be valuable to a broad student and academic readership.

Metallic Mineral Exploration Roderick G. Eggert, 2015-09-16 How has exploration for minerals evolved in recent years? Is it as productive an activity as it once was? Why have changes occurred? Roderick G. Eggert explores these and other questions about the complex set of circumstances surrounding metallic mineral exploration. Originally published in 1987, Eggert documents trends in the level and the distribution of expenditures by mining companies for metallic mineral exploration and examines a number of factors that may be responsible for these trends. This significant study serves as a handy introduction to the subject for students interested in environmental studies, natural resources and economics.
