The Interwar World Andrew Denning, Heidi J.S. Tworek, 2023-08-29 *The Interwar World* collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume s contributors challenge the era s accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this

pivotal period in global history El Terrible: Life and Labor in Pueblonuevo, 1887-1939 Patricia A. Schechter, 2024-07-12
 This book is a biography of Pueblonuevo del Terrible a mining town located in Andalusia Spain Based on previously unexamined sources the study paints a fresh portrait of industrial workers and their families in Córdoba province enriching our understanding of this mostly agricultural region Previous studies of laboring communities in Spain have identified radical workers miners among them as a destabilizing element due to their insurgent protest activity including lethal violence This study by contrast describes both worker activism and cross class organizing as constructive not destructive and aimed at integration into Spanish society Economically the mining zone was dominated by a French company in the Rothschild portfolio But by running their own city waging peaceful labor strikes raising a church building housing and honoring their dead residents turned a quasi colonial outpost into a pueblo worth defending and they rallied in defense of the Republic at the outbreak of the Spanish Civil War In the making of Pueblonuevo del Terrible Spanish men and women contended with the perils of mine work the jolts of industrial capitalism creeping fascism and civil war As such this book tells a village scale story of global events that defined the twentieth century **The First Age of Industrial Globalization** Maartje Abbenhuis, Gordon Morrell, 2019-10-17 This book offers an accessible and lively survey of the global history of the age of industrialization and globalization that arose in the wake of the Napoleonic Wars and collapsed in the maelstrom of the First World War Through a combination of industrialization technological innovation and imperial expansion the industrializing powers of the world helped to create inter connected global space that left few regions untouched In ten concise chapters this book relays the major shifts in global power economics and society outlining the interconnections of global industrial imperial and economic change for local and regional experiences identities and politics It finishes with an expos on the catastrophic impact of the First World War on this global system The First Age of Industrial Globalization weaves together the histories of industrialization world economy imperialism international law diplomacy and war which historians usually treat as separate developments and integrates them to offer a new analysis of an era of fundamental historical change It shows that the revolutionary changes in politics society and international affairs experienced in the 19th century were inter connected developments It is essential reading for any student of modern global history **Sideways Migration** Deborah Reed-Danahay, 2024-11-29 This book examines the relationship between migration and socioeconomic status In particular it charts a set of middle class aspirations that lead people to move to a nearby nation that is similar in wealth and social indicators a type of horizontal relocation that it terms sideways migration It chronicles the experiences of a diverse group of French middle class citizens who moved to London during the late 20th and early 21st centuries Based on longitudinal ethnographic fieldwork over a ten year period this book engages at length with their strategies of emplacement through the lens of Pierre Bourdieu's concept of social space Against a backdrop of heightened anxieties about immigration the disruptions of the Brexit process and more recently a pandemic it shows how middle class migration is affected by processes

of dislocation and relocation settling and unsettling and the search for belonging This book points to new directions for understanding transnationalism among middle class migrants through its consideration of the French emigration apparatus and the role of the multisite French nation in the lives of its citizens living abroad It will be key reading for scholars and students interested in emigration and migration from anthropology sociology geography political science history and international studies

Old-Fashioned Modernism Andy Oler, 2019-06-12 The Midwest holds two conflicting positions in the American cultural imagination both of which rob the region of its distinctiveness Often it is seen as the heartland a pastoral ideal standing in for all of American culture Alternatively the Midwest can represent flyover country part of an expansive undifferentiated mass between the coasts In *Old Fashioned Modernism Rural Masculinity and Midwestern Literature* Andy Oler challenges both views by pairing fiction and poetry from the region with cultural and material texts that illustrate the processes by which regional modernism both opposes and absorbs prevailing models of twentieth century manhood Although it acknowledges a tradition of Midwestern urban literature *Old Fashioned Modernism* focuses on representations of life on farms and in small towns that generate specific forms of rural modernity Oler considers a series of male protagonists who both fulfill and resist conventional American narratives of economic advancement spatial experience and gender roles The writers he studies portray the onset of socioeconomic and mechanical modernity by merging realist and naturalist narratives with upwellings of modernist form and style His analysis charts a trajectory in which Midwestern literature depicts experiences that appear dependent on nostalgic pastoralism but actually foreground the ongoing fragmentation and emerging anxieties of the countryside In detailed readings of novels by Sherwood Anderson William Cunningham Langston Hughes Wright Morris and Dawn Powell as well as the poetry of Lorine Niedecker Oler highlights images of men from the rural Midwest who face the tensions between agricultural production and mass industrialization These works of literature which Oler examines alongside pieces of material culture like advertisements for farm implements and record labels feature communities that support self made as well as corporate identities As portraits of the Midwest that resist the totalizing trajectory of industrialization these texts generate spaces that meld rural and urban economics land use and affective experiences *Old Fashioned Modernism* reveals how Midwestern regionalism negotiates the anxieties and dominant narratives of early and midcentury rural masculinities as regional literature and culture alter the forms and spaces of literary modernism

Rubber Materials Marianella Hernández Santana, Saul Utrera-Barrios, 2025-06-27 *Rubber Materials Fundamentals Sustainability and Applications* provides a fresh perspective on the potential of rubber materials in the 21st century when our global society faces unprecedented challenges related to resource consumption waste management and environmental impact The book begins with an overview of the foundation of rubber science covering fundamental principles recent advancements and future challenges Sections discuss sustainability aspects and emerging trends within elastomer science and technology all within the context of the 7Rs of the circular economy Finally the book presents advanced

Chasing Archipelagic Dreams David R. Saunders, 2024-12-15 In *Chasing Archipelagic Dreams* David R. Saunders demonstrates that the withdrawal of the British imperial state from Sabah did not result in the decolonization of the territory From the late 1940s to the 1960s international anti colonialism interacted with regional competition over Sabah to result in a paradoxical increase of British power and influence on the ground Meanwhile ethnic social and political heterogeneity in Sabah contributed to fragmentation and disunity undermining the development of a local anti colonial movement Instead a class of influential local elites seized power as competing attempts by the Philippines Indonesia and Malaya to incorporate the territory into their respective archipelagic spheres grew in strength Due to these local and international rivalries Saunders argues Sabah's eventual merger with the Federation of Malaysia in 1963 prompted an extension of colonial style rule resource extraction the suppression of local autonomy and the imposition of an externally configured national identity *Chasing Archipelagic Dreams* underscores the significance of regional rivalries in the South China Sea and highlights the fate of subaltern communities bisected by post colonial borders

Fewer, Better Things Glenn Adamson, 2018-08-07 From the former director of the Museum of Arts and Design in New York a timely and passionate

case for the role of the well designed object in the digital age Curator and scholar Glenn Adamson opens *Fewer Better Things* by contrasting his beloved childhood teddy bear to the smartphones and digital tablets children have today He laments that many children and adults are losing touch with the material objects that have nurtured human development for thousands of years The objects are still here but we seem to care less and know less about them In his presentations to groups he often asks an audience member what he or she knows about the chair the person is sitting in Few people know much more than whether it s made of wood plastic or metal If we know little about how things are made it s hard to remain connected to the world around us *Fewer Better Things* explores the history of craft in its many forms explaining how raw materials tools design and technique come together to produce beauty and utility in handmade or manufactured items Whether describing the implements used in a traditional Japanese tea ceremony the use of woodworking tools or the use of new fabrication technologies Adamson writes expertly and lovingly about the aesthetics of objects and the care and attention that goes into producing them Reading this wise and elegant book is a truly transformative experience

The Oxford Handbook of Commodity History Jonathan Curry-Machado, Jean Stubbs, William Gervase Clarence-Smith, Jelmer Vos, 2024 The Oxford Handbook of Commodity History features contributions from scholars involved in the field s development across a range of countries and linguistic regions Each of the handbook s thirty one chapters focuses on an important theme within commodity history essential approaches global histories modes of production people and land environmental impact consumption and new methodologies

Overseas Economic Relations and Statehood in Europe, 1860s-1970s Gerold Krozewski, 2023-04-06 Drawing on official archival and published sources this book explores how the formative history of the European nation state was embedded within economic globalization and associated with conceptions of the world overseas With a particular focus on France Germany Italy and Britain this research investigates how overseas relationships shaped state governance The argument departs from conventional histories by linking together the analysis of economic relationships and political cultures examining the ways in which state agency formed in different areas such as national economy building the organization of overseas raw material and food supplies labour migration and national identity Spanning over a century the book discusses the changing role of overseas colonies in European national development Once a means to complete economic liberalization colonies were then envisaged as tools of crisis management before in the mid twentieth century complementarities in imperial colonial economies shifted away from empire This volume covers neglected aspects of the transnational history of European nation states and is an ideal resource for students and researchers interested in the ties between Europe Africa and Asia as well as connections between political economic and social relations and their conceptualizations

Automotive Empire Andrew Denning, 2024-07-15 Winner of the 2025 Nicolas Joseph Cugnot Award In *Automotive Empire* Andrew Denning uncovers how roads and vehicles began to transform colonial societies across Africa but rarely in the manner Europeans expected Like seafaring ships and railroads automobiles and roads were more than a mode of transport they organized colonial spaces and structured the political economic and social relations of empire both within African colonies and between colonies and the European metropole European officials in French Italian British German Belgian and Portuguese territories in Africa shared a common challenge the transport problem While they imagined that roads would radiate commerce and political hegemony by collapsing space the pressures of constructing and maintaining roads rendered colonial administration thin ineffective and capricious Automotive empire emerged as the European solution to the transport problem but revealed weakness as much as it extended power As Automotive Empire reveals motor vehicles and roads seemed the ideal solution to the colonial transport problem They were cheaper and quicker to construct than railroads overcame the environmental limitations of rivers and did not depend on the recruitment and supervision of African porters At this pivotal moment of African colonialism when European powers transitioned from claiming territories to administering and exploiting them automotive empire defined colonial states and societies along with the brutal and capricious nature of European colonialism itself

Arguing about Empire Martin Thomas, Richard Toye, 2019-02-21 *Arguing about Empire* analyses the most divisive arguments about empire between Europe's two leading colonial powers from the age of high imperialism to the post war era of decolonization Focusing on the domestic contexts underlying imperial rhetoric *Arguing about Empire* adopts a case study approach treating key imperial debates as historical episodes to be investigated in depth The episodes in question have been selected both for their chronological range their variety and above all their vitriol Some were straightforward disputes others involved cooperation in tense circumstances These include the Tunisian and Egyptian crises of 1881-2 which saw France and Britain establish new North African protectorates ostensibly in co operation but actually in competition the Fashoda Crisis of 1898 when Britain and France came to the brink of war in the aftermath of the British reconquest of Sudan the Moroccan crises of 1905 and 1911 early tests of the Entente Cordiale when Britain lent support to France in the face of German threats the 1922 Chanak crisis when that imperial Entente broke down in the face of a threatened attack on Franco British forces by Kemalist Turkey World War Two which can be seen in part as an undeclared colonial war between the former allies complicated by the division of the French Empire between De Gaulle's Free French forces and those who remained loyal to the Vichy Regime and finally the 1956 Suez intervention when far from defusing another imperial crisis Britain colluded with France and Israel to invade Egypt the culmination of the imperial interference that began some eighty years earlier

Vanilla Eric T. Jennings, 2025-08-26 The fascinating and wide ranging history of vanilla from the sixteenth century to today Vanilla is one of the most expensive of flavorings so valuable that it was

smuggled or stolen by pirates in the early days and yet it is everywhere It is a key ingredient in dishes ranging from cr me br l e to Japanese purin It is the quintessential ice cream flavor in the United States Eric T Jennings explains how the world s only edible orchid originally endemic to Central America became embedded in the international culinary and cultural landscape In tracing vanilla s rise Jennings describes how in the 1840s an enslaved boy named Edmond Albius discovered a way to pollinate vanilla orchids with a toothpick or needle an ingenious process that is still in use This method transformed the vanilla sector by enabling the plant to be grown outside of its natural range Jennings also looks at how the vanilla craze led to the search for now pervasive substitutes and how a vanilla lobby has fought back He further unravels how vanilla the world s most expensive crop and once considered its most refined fragrance came to mean bland This tale of botany production techniques consumption habits and colonial rivalry connects the Atlantic Indian and Pacific Oceans revealing how vanilla has become a potent symbol of the modern global village

On Savage Shores Caroline Dodds Pennock, 2024-10-15

AN ECONOMIST AND SMITHSONIAN BEST BOOK OF THE YEAR A landmark work of narrative history that shatters our previous Eurocentric understanding of the Age of Discovery by telling the story of the Indigenous Americans who journeyed across the Atlantic to Europe after 1492 We have long been taught to presume that modern global history began when the Old World encountered the New when Christopher Columbus discovered America in 1492 But as Caroline Dodds Pennock conclusively shows in this groundbreaking book for tens of thousands of Aztecs Maya Totonacs Inuit and others enslaved people diplomats explorers servants traders the reverse was true they discovered Europe For them Europe comprised savage shores a land of riches and marvels yet perplexing for its brutal disparities of wealth and quality of life and its baffling beliefs The story of these Indigenous Americans abroad is a story of abduction loss cultural appropriation and as they saw it of apocalypse a story that has largely been absent from our collective imagination of the times From the Brazilian king who met Henry VIII to the Aztecs who mocked up human sacrifice at the court of Charles V from the Inuk baby who was put on show in a London pub to the mestizo children of Spaniards who returned home with their fathers from the Inuit who harpooned ducks on the Avon river to the many servants employed by Europeans of every rank here are a people who were rendered exotic demeaned and marginalized but whose worldviews and cultures had a profound impact on European civilization Drawing on their surviving literature and poetry and subtly layering European eyewitness accounts against the grain Pennock gives us a sweeping account of the Indigenous American presence in and impact on early modern Europe

International Law and the History of Resource Extraction in Africa George Forji Amin, 2023-09-22 This book investigates the historical economic and legal regimes that legitimated the resource extraction and exploitation of Africa between the 15th and 19th centuries and led to the continent s trajectory of underdevelopment in the world system The book interrogates the economic and legal structures that supported European intervention in Africa It explores the trade and private property rights which were to shape the economic future of the continent most notably the trade in human beings as legitimate private

property by European powers The book then looks at the techniques used to submerge African sovereignty under European sovereignty during the scramble for territorial control in the 19th century concluding with the validation of occupation in international law following the 1884 85 Berlin Conference The book argues that the doctrines of trade and property rights sanctioned by international law led to a trend of African dispossession that set the continent on a path to underdevelopment with long reaching consequences This book will be of interest to researchers and students across law history economics international relations and African studies
