Woven Into the Earth Else Østergård, 2004 One of the century's most spectacular archaeological finds occurred in 1921 a year before Howard Carter stumbled upon Tutankhamun's tomb when Poul Norlund recovered dozens of garments from a graveyard in the Norse settlement of Herjolfsnaes Greenland Preserved intact for centuries by the permafrost these mediaeval garments display remarkable similarities to western European costumes of the time Previously such costumes were known only from contemporary illustrations and the Greenland finds provided the world with a close look at how ordinary Europeans dressed in the Middle Ages Fortunately for Norlund's team wood has always been extremely scarce in Greenland and instead of caskets many of the bodies were found swaddled in multiple layers of cast off clothing When he wrote about the excavation later Norlund also described how occasional thaws had permitted crowberry and dwarf willow to establish themselves in the top layers of soil Their roots grew through coffins clothing and corpses alike binding them together in a vast network of thin fibers as if he wrote the finds had been literally sewn in the earth Eighty years of technical advances and subsequent excavations have greatly added to our understanding of the Herjolfsnaes discoveries Woven into the Earth recounts the dramatic story of Norlund's excavation in the context of other Norse textile finds in Greenland It then describes what the finds tell us about the materials and methods used in making the clothes The weaving and sewing techniques detailed here are surprisingly sophisticated and one can only admire the talent of the women who employed them especially considering the harsh conditions they worked under While Woven into the Earth will be invaluable to students of medieval archaeology Norse society and textile history both lay readers and scholars are sure to find the book's dig narratives and glimpses of life among the last Vikings fascinating

**Exploring Ancient Textiles** Alistair Dickey,Margarita Gleba,Sarah Hitchens,Gabriella Longhitano,2022-07-20 Over the past 30 years research on archaeological textiles has developed into an important field of scientific study It has greatly benefited from interdisciplinary approaches which combine the application of advanced technological knowledge to ethnographic textual and experimental investigations In exploring textiles and textile processing such as production and exchange in ancient societies archaeologists with different types and quality of data have shared their knowledge thus contributing to well established methodology In this book the papers highlight how researchers have been challenged to adapt or modify these traditional and more recently developed analytical methods to enable extraction of comparable data from often recalcitrant assemblages Furthermore they have applied new perspectives and approaches to extend the focus on less investigated aspects and artefacts The chapters embrace a broad geographical and chronological area ranging from South America and Europe to Africa and from the 11th millennium BC to the 1st millennium AD Methodological considerations are explored through the medium of three different themes focusing on tools textiles and

fibres and culture and identity This volume constitutes a reflection on the status of current methodology and its applicability within the wider textile field Moreover it drives forward the methodological debates around textile research to generate new and stimulating conversations about the future of textile archaeology     Textiles and the Medieval Economy Angela Ling Huang, Carsten Jahnke, 2014-06-30 Archaeologists and textile historians bring together 16 papers to investigate the production trade and consumption of textiles in Scandinavia and across parts of northern and Mediterranean Europe throughout the medieval period Archaeological evidence is used to demonstrate the existence or otherwise of international trade and to examine the physical characteristics of textiles and their distribution in order to understand who was producing using and trading them and what they were being used for Historical evidence mainly textual is employed to link textile names to places numbers and prices and thus provide an appreciation of changing economics patterns of distribution and the organisation of trade Different types and qualities of cloths are discussed and the social implications of their production and import export considered against a developing background of urbanism and increasing commercial wealth     **Viking Clothing** Thor Ewing, 2006 Contrary to popular myth the Vikings had a reputation for neatness and their fashions were copied far beyond the realms of Scandinavia Those who could afford to displayed a love of fine clothes made from silks from lightweight worsteds in subtly woven twills and from the finest of linens This accessible new book is the first to tackle the question of what the Vikings wore drawing on evidence from art and archaeology literature and linguistics to arrive at a fresh understanding of the nature of Viking clothing covering rich and poor men and women across Scandinavia It includes an overview of Viking textiles and dyeing and an exploration of cloth production and clothing in the context of Viking society as a whole as well as a detailed consideration of both male and female outfits and a new interpretation of the suspended dress     The Fantastic in Old Norse/Icelandic Literature John McKinnell, David Ashurst, Donata Kick, 2006     The British National Bibliography Arthur James Wells, 2005     Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004
