Circuit TeleVision CCTV cameras have been increasingly deployed pervasively in public spaces including retail centres and shopping malls Intelligent video analytics aims to automatically analyze content of massive amount of public space video data and has been one of the most active areas of computer vision research in the last two decades Current focus of video analytics research has been largely on detecting alarm events and abnormal behaviours for public safety and security applications However increasingly CCTV installations have also been exploited for gathering and analyzing business intelligence information in order to enhance marketing and operational efficiency For example in retail environments surveillance cameras can be utilised to collect statistical information about shopping behaviour and preference for marketing e g how many people entered a shop how many females males or which age groups of people showed interests to a particular product how long did they stay in the shop and what are the frequent paths and to measure operational efficiency for improving customer experience Video analytics has the enormous potential for non security oriented commercial applications This book presents the latest developments on video analytics for business intelligence applications It provides both academic and commercial practitioners an understanding of the state of the art and a resource for potential applications and successful practice *Computational Intelligence Applications in Business Intelligence and Big Data Analytics* Vijayan Sugumaran, Arun Kumar Sangaiah, Arunkumar Thangavelu, 2017-06-26 There are a number of books on computational intelligence CI but they tend to cover a broad range of CI paradigms and algorithms rather than provide an in depth exploration in learning and adaptive mechanisms This book sets its focus on CI based architectures modeling case studies and applications in big data analytics and business intelligence The intended audiences of this book are scientists professionals researchers and academicians who deal with the new challenges and advances in the specific areas mentioned above Designers and developers of applications in these areas can learn from other experts and colleagues through this book

Object Tracking Technology Ashish Kumar, Rachna Jain, Ajantha Devi Vairamani, Anand Nayyar, 2023-09-25 With the increase in urban population it became necessary to keep track of the object of interest In favor of SDGs for sustainable smart city with the advancement in technology visual tracking extends to track multi target present in the scene rather estimating location for single target only In contrast to single object tracking multi target introduces one extra step of detection Tracking multi target includes detecting and categorizing the target into multiple classes in the first frame and provides each individual target an ID to keep its track in the subsequent frames of a video stream One category of multi target algorithms exploits global information to track the target of the detected target On the other hand some algorithms consider present and past information of the target to provide efficient tracking solutions Apart from these deep learning based algorithms provide reliable and accurate solutions But these algorithms are computationally slow when applied in real

time This book presents and summarizes the various visual tracking algorithms and challenges in the domain The various feature that can be extracted from the target and target saliency prediction is also covered It explores a comprehensive analysis of the evolution from traditional methods to deep learning methods from single object tracking to multi target tracking In addition the application of visual tracking and the future of visual tracking can also be introduced to provide the future aspects in the domain to the reader This book also discusses the advancement in the area with critical performance analysis of each proposed algorithm This book will be formulated with intent to uncover the challenges and possibilities of efficient and effective tracking of single or multi object addressing the various environmental and hardware challenges The intended audience includes academicians engineers postgraduate students developers professionals military personals scientists data analysts practitioners and people who are interested in exploring more about tracking Another projected audience are the researchers and academicians who identify and develop methodologies frameworks tools and applications through reference citations literature reviews quantitative qualitative results and discussions

Handbook of Research on Cloud and Fog Computing Infrastructures for Data Science Raj, Pethuru,Raman, Anupama,2018-05-18 Fog computing is quickly increasing its applications and uses to the next level As it continues to grow different types of virtualization technologies can thrust this branch of computing further into mainstream use The Handbook of Research on Cloud and Fog Computing Infrastructures for Data Science is a key reference volume on the latest research on the role of next generation systems and devices that are capable of self learning and how those devices will impact society Featuring wide ranging coverage across a variety of relevant views and themes such as cognitive analytics data mining algorithms and the internet of things this publication is ideally designed for programmers IT professionals students researchers and engineers looking for innovative research on software defined cloud infrastructures and domain specific analytics

Big Data Analytics and Data Science Vikrant Bhateja,Hong Lin,Milan Simic,Jinshan Tang,Vustikayala Sivakumar Reddy,2024-12-23 This book presents a collection of high quality peer reviewed research papers from the 8th International Conference on Information System Design and Intelligent Applications ISDIA 2024 held in Dubai UAE from 3 4 January 2024 It covers a wide range of topics in computer science and information technology including data mining and data warehousing high performance computing parallel and distributed computing computational intelligence soft computing big data cloud computing grid computing cognitive computing and information security

Intelligent Wavelet Based Techniques for Advanced Multimedia Applications Rajiv Singh,Swati Nigam,Amit Kumar Singh,Mohamed Elhoseny,2020-02-27 This book contains high quality research articles and reviews that promote research and reflect the most recent advances in intelligent wavelet based techniques for advanced multimedia applications as well as other emerging areas In recent time wavelet transforms have become useful in many signal image and video processing applications especially for multimedia security and surveillance A few applications of wavelets in security and surveillance are watermarking fusion steganography object

detection tracking motion recognition and intention recognition etc Wavelets are well capable of analyzing signal image and video at different resolution levels popularly known as multiresolution analysis The multiresolution analysis is advantageous in multimedia security and surveillance applications It provides flexibility in selection of different resolution levels that leads to better accuracy Furthermore recently sparse representation has become an advancement to analyze wavelet coefficients It is observed that wavelet transforms possess the invariance property which makes them suitable for many vision applications This book provides a concise overview of the current state of the art and disseminates some of the novel and exciting ideas and techniques In addition it is also helpful for the senior undergraduate and graduate students researcher academicians IT professional and providers citizens customers as well as policy makers working in this area as well as other emerging applications demanding state of the art wavelet based multimedia applications
