Architecture and Violence Bechir Kenzari, 2011 In today's turbulent times few subjects deserve a closer scrutiny than the interactions between violence and constructed environment Modernity's contradictory histories laid bare the fact that it is impossible to consider architecture simply a benign passive victim of humanity's violent vices Built space is as capable of incarnating violent acts as enacting them disciplining and silencing the subject in the process In this compelling volume some of the most incisive thinkers of contemporary architectural theory make manifest the intricacies of interrelations between architecture and violent events Employing a wide variety of perspectives and methodical approaches the authors examine some of the most dramatic and unexpected instances of these vexing relations Back cover

Out of Place John B. Lyon, 2016-11-17 In late nineteenth century Germany the onset of modernity transformed how people experienced place In response to increased industrialization and urbanization the expansion of international capitalism and the extension of railway and other travel networks the sense of being connected to a specific place gave way to an unsettling sense of displacement Out of Place analyzes the works of three major representatives of German Realism Wilhelm Raabe Theodor Fontane and Gottfried Keller within this historical context It situates the perceived loss of place evident in their texts within the contemporary discourse of housing and urban reform but also views such discourse through the lens of twentieth century theories of place Informed by both phenomenological Heidegger and Casey as well as Marxist Deleuze Guattari and Benjamin approaches to place John B. Lyon highlights the struggle to address issues of place and space that reappear today in debates about environmentalism transnationalism globalization and regionalism

Walter Benjamin and the Arcades Project Beatrice Hanssen, 2006-07-27 One of the most significant cultural documents of the Weimar Republic and Nazi era Walter Benjamin's unfinished Arcades Project has had a remarkable impact on present day cultural theory urban studies cultural studies and literary interpretation Originally designed as a panoramic study chronicling the rise and decline of the Parisian shopping arcades Benjamin's work combines imaginative peregrinations through the changing cityscape of nineteenth century Paris with passages that read like a blueprint for a new cultural theory of modernity Walter Benjamin and the Arcades Project provides the first comprehensive introduction to this extraordinary work accessible to English language readers The diverse range of issues explored include the nature of collecting the anatomy of melancholy the flâneur the physiognomy of ruins the dialectical image Benjamin's relation to Baudelaire the practice of history writing and modernity and architecture Contributors include Susan Buck-Morss

Stanley Cavell Jonathan Culler Brigid Doherty Barbara Johnson Esther Leslie Gerhard Richter Andrew Benjamin Howard Caygill Beatrice Hanssen Detlef Mertins Elissa Marder Tyrus Miller and Irving Wohlfarth Daniel Libeskind, Radix-Matrix Daniel Libeskind, Andrea P. A. Belloli, 1997 Daniel Libeskind represents a unique attempt to provide a comprehensive critical analysis of Libeskind's architecture and philosophy Libeskind serves as the mediator of his own work exploring various projects through an illuminating juxtaposition of textual commentary with illustrations of competition models concept drawings and site photos of realized works Essays by Jacques Derrida and Mark C Taylor among others provide a critical analysis of Libeskind's architecture identifying his place within the context of contemporary architecture and theory The book concludes with a collection of Libeskind's most important essays many of which are published here in English for the first time Myth and Metropolis Graeme Gilloch, 2013-04-30 This is a lucid study of Walter Benjamin's lifelong fascination with the city and forms of metropolitan experience highlighting the relevance of Benjamin's work to our contemporary understanding of modernity *Walter Benjamin and the Aesthetics of Change* A. M. Pusca, 2010-01-20 Following the spirit of Benjamin's Arcades Project this book acts as a kaleidoscope of change in the 21st century tracing its different reflections in the international contemporary while seeking to understand individual collective reactions to change through a series of creative methodologies *Diagrams of Power in Benjamin and Foucault* Mark Laurence Jackson, 2022-09-04 This book's overarching premise is that discussion and critique in the discourses of architecture and urbanism have their primary focus on engagements with form particularly in the sense of the question as to what planning and architecture signify with respect to the forms they take and how their meanings or content what is contained is considered in relation to form as container While significant critical work in these disciplines has been published over the past 20 years that engages pertinently with the writings of Walter Benjamin and Michel Foucault there has been no address to the coincidence in the work of Benjamin and Foucault of an architectural figure that is pivotal to each of their discussions of the emergence of modernity The arcade for Benjamin and the panoptic prison for Foucault have a parallel role In Foucault's terms panopticism is a diagram of power The parallel for Benjamin would be his understanding of constellation In more recent architectural writings the notion of the diagram has emerged as a key motif Yet and in as much as it supposedly relates to aspects of the work of Foucault along with Gilles Deleuze this notion of diagram amounts for the most part to a thinly veiled reinstatement of geometry as idea This book redresses the emphasis given to form within the cultural philosophy of modernity and particularly with respect to architecture and urbanism inflects on the agency of force that opens a reading of their productive capacities as technologies of power It is relevant to students and scholars in poststructuralist critical theory architecture and urban studies This is a book about Foucault and Benjamin and it is grounded in a deep knowledge of and reflection upon their works but it is also underpinned by an impressive erudition There are reflections on Hegel and Heidegger central to the author and Derrida along with Kierkegaard and others This leads to a rich and suggestive discussion in staging a spatial architectural political

conversation between Foucault and Benjamin Anonymous Reviewer Mark Jackson's *Diagrams of Power in Benjamin and Foucault: The Recluse of Architecture* juxtaposes and interrogates its two leading actors so as to draw from and through them a theory of architecture which is inseparable from its recluse. In doing so it elaborates a series of complex connections with their various interlocutors and inspirations: Hegel, Heidegger, Derrida, the Kabbalah, Agamben, allegory, Marx, Deleuze, Klossowski, tragedy, capitalism, modernity and so on. The list is long and impressive. This is not only done with an extremely high degree of scholarship but is presented in a light, lucid and very compelling manner in a voice both personal and authoritative. The recluse is the figure of mimesis itself: the appearance of a withdrawal always already a ruin. This book not only contributes a highly astute reading of its philosophical objects but it enacts the ontology of the recluse through its own unfolding simultaneously revealing and withholding the meaning of architecture as such so that we not only understand its meaning but feel the pulsing differential of the book's object as if it were alive within us.

Walter Benjamin and History Andrew Benjamin, 2005-12-01

The first book to examine in detail Benjamin's *Theses on the Philosophy of History*. Benjamin's collection of fragments, *Theses on the Philosophy of History*, play a determining role in how Benjamin's thought is understood as well as in the debate about the interplay between politics, history and time. *Walter Benjamin and History* is the first volume to give access to the themes and problems raised by the *Theses*, providing valuable exegetical and historical work on the text. The essays collected here are all the work of noted Benjamin scholars and pursue the themes central to the *Theses*.

The Dialectics of Seeing Susan Buck-Morss, 1991-07-01

Walter Benjamin's magnum opus was a book he did not live to write. In *The Dialectics of Seeing* Susan Buck-Morss offers an inventive reconstruction of the *Passagen Werk* or *Arcades Project* as it might have taken form. Working with Benjamin's vast files of citations and commentary which contain a myriad of historical details from the dawn of consumer culture, Buck-Morss makes visible the conceptual structure that gives these fragments philosophical coherence. She uses images throughout the book to demonstrate that Benjamin took the debris of mass culture seriously as the source of philosophical truth. The Paris Arcades that so fascinated Benjamin as they did the Surrealists whose materialist metaphysics he admired were the prototype the
