This global world history text emphasizes the major stages in societies different interactions and assesses the development of
major societies Encompassing social cultural political and economic history the authors examine key civilizations in world
history World Civilizations balances the discussion of independent developments in the world s major civilizations with
comparative analysis of the results of global contact MyHistoryLab is an integral part of the Stearns Adas Schwartz Gilbert
program An integrated etext and and engaging resources bring history to life for students *World Civilizations* Peter N.
Stearns,Michael Adas,Stuart B. Schwartz,Marc Jason Gilbert,2020 World history explores the human past around the globe
to help us understand the world we live in today It seeks to identify how major forces like patterns of migration or world
trade have developed over time It explores the cultures and political institutions of different regions to help explain
commonalities and differences World history builds on a growing body of historical scholarship some of which has truly
altered the picture of the past It involves a rich array of stories and examples of human variety intriguing in themselves It
helps develop skills that are vital not just to the history classroom but to effective operation in a global society skills like
comparing different societies appreciating various viewpoints and identifying big changes and continuities in the human
experience Always however it uses the past as a prologue to the present World historians argue that no one society past or
present can be understood without reference to other societies and to larger global forces They argue even more vigorously
that the present which clearly involves relationships that embrace the whole world cannot be grasped without a sense of the
global historical record From its first edition World Civilizations The Global Experience has aimed at capturing a truly global
approach by discussing and comparing major societies and focusing on their interactions The goal is to present a clear
factual framework while stimulating analysis about global contacts regional patterns and the whole process of change and
continuity on a world stage This kind of world history focused on the development over time of the forces that shape the
world today helps students make sense of the present and prepare to meet the challenges of the future It is hard to imagine a
more important topic Embracing the whole world s history obviously requires selectivity and explicit points of emphasis This
text gains coherence through decisions about time about place and about topic In all three cases the book encourages
analysis relating facts to vital issues of interpretation Through analysis and interpretation students become active engaged
learners rather than serving as passive vessels for torrents of historical facts Underpinning analysis the issues of time place
and topic are the three keys to an intelligible global past *World Civilizations* Peter N. Stearns,Michael Adas,2004
Examines all the world s civilizations including those in the Western tradition but also those civilizations sometimes
neglected in world history texts Maintaining a focus on social history explores gender class economic and intellectual issues
