

YAMAHA WaveRunner

Wear a USCG-approved Personal Flotation Device (PFD) suitable for PWC use. Never exceed capacity (see manual) or water in forced entry facility (such as motor or engine) as a result of falling into water or being wet at these words. Wear wet suit bottom or equivalent clothing (see Owner's Manual).

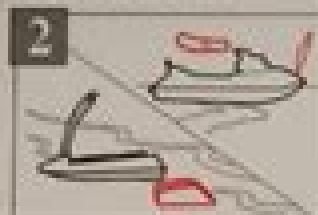

Adjust engine shut-off (kill) switch to start and keep it free of handrails so that the engine stops if the operator falls off. The engine will not start when the clip is removed from the engine shut-off switch. After taking, remove clip from the PWC to avoid unauthorized use by children or others.

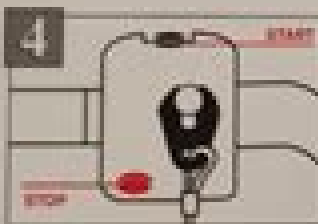

Adjust the throttle lever to increase engine speed. Release the throttle lever to decrease engine speed or to return to the idle position. Always check throttle and steering controls for proper operation before starting engine.

Riding Instructions

Adjust the engine compartment before each use. Do not start the engine if there is a fuel leak or a loose electrical connection.

Push the start switch (green button) to start the engine. Push the engine stop switch (red button) to stop the engine.

Steering control depends upon the combination of handrail position and the amount of throttle. The amount of gas flow, in addition to the position of the handrails, determines how sharply you turn. Do not release throttle when turning to avoid losing control. (See Owner's Manual).
