

The book cover features a collage of various images related to vertebrate anatomy and evolution. At the top, there's a sketch of a dinosaur. Below it, a blue, translucent, star-shaped structure, possibly a fossil or a biological specimen, is prominently displayed. To the right, there's a detailed illustration of a fish's internal anatomy, showing the digestive tract and other organs. The background is a mix of warm, earthy tones and darker, more abstract patterns.

Comparative Anatomy Dale Wade Fishbeck, Aurora M. Sebastiani, 2001 **The Dissection of Vertebrates** Gerardo De Iuliis, Dino Pulerà, 2006-08-03 The Dissection of Vertebrates Second Edition provides students with a manual that combines pedagogical effective text with high quality accurate and attractive visual references. Using a systemic approach within a systematic framework for each vertebrate, this book covers several animals commonly used in providing an anatomical transition sequence. Seven animals are covered: lamprey, shark, perch, mudpuppy, frog, pigeon, and cat. This updated version includes a revised systemic section of the introductory chapter, corrections to several parts of the existing text, and images. New comparative skull sections are included as part of the existing vertebrates, and a companion site with image bank. This text is designed for 2nd or 3rd year university level comparative vertebrate anatomy courses. Such courses are usually two semester courses and may either be a required course or an elective. It is typically a required course for Biology and Zoology majors as well as for some Forensics and Criminology programs and offered as an elective for many other non zoology science majors. Winner of the NYSM Jury award for the Rock Dove Air Sacs Lateral and Ventral Views illustration. Expertly rendered award winning illustrations accompany the detailed clear dissection direction. Organized by individual organism to facilitate classroom presentation. Offers coverage of a wide range of vertebrates. Full color strong pedagogical aids in a convenient lay flat presentation. Expanded and updated features on phylogenetic coverage, mudpuppy musculature, and comparative mammalian skulls. Comparative Anatomy Dale W. Fishbeck, Aurora Sebastiani, 2015-03-01 This full color manual is a unique guide for students conducting the comparative study of representative vertebrate animals. It is appropriate for courses in comparative anatomy, vertebrate zoology, or any course in which the featured vertebrates are studied. Comparative Anatomy Dale W. Fishbeck, Aurora M.
