

VidyoGateway

Adopting revolutionary technologies can be a double edged sword. On one hand, you have compelling new benefits and economies afforded by the new technology, while on the other hand you have an existing investment in legacy technology that you may not be ready to retire. Vidyo understands that a flash out from "old" to "new" is typically not practical and that there is need for your new VidyoRouter™ based personal telepresence solution to interoperate with your existing H.323 and SIP based videoconferencing equipment. The VidyoGateway provides the migration path you need. You can retain the use of your legacy room systems and MCUs and let them interoperate with your VidyoConferencing™ future. Like VidyoRooms, calls through the VidyoGateway do not consume VidyoLine™ licenses, making integration with legacy endpoints not only easy, but affordable.

▲ *Best of both worlds - The VidyoGateway provides interoperability with the legacy endpoints while participating as an SVC based endpoint from the VidyoRouter's perspective.*

VidyoGateway Benefits:

- Extend existing room system deployments to the desktop
- Protects H.323 & SIP endpoint investment while migrating to next generation architecture
- Connects VidyoConferencing to legacy MCUs
- Eliminates need for expensive QoS networks between remote locations for legacy room systems when VidyoGateway is provisioned on the same LAN
- Facilitates data sharing with legacy endpoints via H.239

The VidyoGateway™ appliance connects to legacy videoconferencing endpoints and MCUs such as Polycom and Tandberg, and enables them to interoperate with Vidyo's breakthrough architecture. The VidyoGateway supports both H.264 and H.263 video conferencing using SIP and H.323 signaling as well as H.239 for data sharing.

There are two models of the VidyoGateway to help optimize price per H.323 or SIP port based upon deployment configuration and capacity requirements.
