

2.2.2.2.2 Remote W3 Model Control Head Installation

Figure 2-24 shows the W3 control head model.

Figure 2-24. W3 Control Head

For the remote handheld control unit, mount the control cable with the screws provided. Connect the control cable as shown in Figure 2-11 or Figure 2-12. Connect the speaker to the accessory cable harness.

2.2.2.2.3 Remote Radio Control Cable Installation

The radio control cable should go from the rear of the control head to the radio. Route the cables in the vehicle's wiring troughs (where available) or route the cables where they are protected from pinching, sharp edges, or crushing. One suggested route is along one side of the driveshaft hump under the carpet. Use grommets in any holes where the cable passes through metal panels.

Figure 2-28 shows how the cables and components are connected.

Caution

CAUTION: To ensure a proper water seal, the jackscrews on the radio cable connector must be tight. If the accessory port on a remote mounted radio is not used, the cover gasket assembly (HLN6233_) must be installed and torqued to 6 to 8 inch-pounds.

2.2.2.2.4 Transmit/Receive Control Cable Installation (W4, W5, W7, W9 Remote Control Heads)

The radio system includes two separate wires, one orange (66") and one green (106"). The HLN4952_ Fuse Kit contains crimp-on ring tongue lugs and crimp-on spade lugs. The spade lugs allow connection to hot leads at the fuse block of the vehicle, and the ring tongue lugs permit attachment to screw terminals. Determine from Table 2-1 which radio functions are to be switched through the vehicle ignition switch.

A typical system allows the receiver to operate with the radio switched on while the ignition switch is in the off position, but the transmitter will not operate unless the ignition switch is in the on position. In this case, connect the orange wire to the accessory terminal of the ignition switch and the green wire to the ungrounded terminal of the battery or starter solenoid.
