Waiting For The Wind:

Voices Waiting to Be Heard Stephen Darley, 2021-06-01 Lengthy eyewitness accounts of events in the Revolutionary War are rare The expedition to Quebec led by Benedict Arnold is an exception with 35 such accounts In this book Stephen Darley has compiled 13 unknown journals and 6 pension applications written by men who were participants on that famous march These accounts provide details of the trek through the untamed wilderness of Maine and Canada the New Years Eve assault on Quebec and being held as prisoners in Quebec These personal narratives present the extreme hardships and difficulties each writer experienced being part of a unique and historic march from Cambridge to make Canada the 14th American Colony and deprive the British of its North American base of operations One historian concludes that the march of Hannibal over the Alps has nothing in it of superior merit to the March of Arnold he goes on to conclude that the men who were on the march have been left an heir to oblivion almost unwept unhonored and sung only in a minor key This book will help to understand and appreciate the sacrifices made by its participants

Waiting for the East Wind Elise Van Loon, This dissertation explains stick charts from the Marshall Islands and how each one is unique to the navigator who created it Stick charts are navigational tools that map the ocean's geography by illustrating how the atolls interrupt the ocean swells without giving any significant detail to the landmasses themselves Examining these instruments may lead to an understanding of how the Marshallese people perceive maritime space The stick charts are frequently compared to cartesian maps and the physical geography of the area However as time is a large factor in sailing I examined the varied elements of several stick charts as a matter of time rather than space The geographic distance between two atolls is constant but the placement of the atolls on each chart fluctuates The possibility for the different placements is due to the influences of the sea causing and outward journey to take more or less time than the return Through investigating the charts and linking elements of seafaring the artefacts may convey abstract illustrations or literal representations of their environment This dissertation aims to not only analyse the Marshallese stick charts but to collate components of their culture and heritage in order to explain the environment these charts were used in This supports the idea that maritime space can be derived from how these charts were created Based on each person's view of the sea the information they deliver will be built on perception of time distance and obstacles
