regional stock exchanges international companies Labor Contestation at Walmart Brazil Scott B. Martin, João Paulo
Cândia Veiga, Katuscia Moreno Galhera, 2021-09-10 This book explores how and why the labor practices of the world s
largest employer supermarket giant Walmart were contested by unions and government regulators as it expanded to Latin
America starting in the 1990s With an in depth case study of Brazil and a comparative chapter examining Argentina Chile
and Mexico this book analyzes the problematic encounter between diffusion of home office anti labor practices and evolving
national institutional contexts that are quite varied and in some cases enable considerable resistance by unions and or
regulators Walmart s repressive familial and anti union model is found to generate costs and conflicts that contributed to its
unprofitability and ultimate exit from Brazil in 2018 This experience contrasted with country situations where Walmart s
overall competitive and labor and human resource practices fit better with national markets and institutions underlines the
brittle problematic nature of diffusionist corporate models lacking adaptive capacity to significant cross national variations

Making Global Value Chains Work for Development Daria Taglioni,Deborah Winkler,2016-06-10 Economic technological and political shifts as well as changing business strategies have driven firms to unbundle production processes and disperse them across countries Thanks to these changes developing countries can now increase their participation in global value chains GVCs and thus become more competitive in agriculture manufacturing and services This is a paradigm shift from the 20th century when countries had to build the entire supply chain domestically to become competitive internationally For policymakers the focus is on boosting domestic value added and improving access to resources and technology while advancing development goals However participating in global value chains does not automatically improve living standards and social conditions in a country This requires not only improving the quality and quantity of production factors and redressing market failures but also engineering equitable distributions of opportunities and outcomes including employment wages work conditions economic rights gender equality economic security and protecting the environment The internationalization of production processes helps with very few of these development challenges Following this perspective Making Global Value Chains Work for Development offers a strategic framework analytical tools and policy options to address this challenge The book conceptualizes GVCs and makes it easier for policymakers and practitioners to discuss them and their implications for development It shows why GVCs require fresh thinking it serves as a repository of analytical tools and it proposes a strategic framework to guide policymakers in identifying the key objectives of GVC participation and in selecting suitable economic strategies to achieve them
