World Gardens John Dixon Hunt:

A World of Gardens John Dixon Hunt, 2014-05-14 A Japanese garden is immediately distinct to the eye from the traditional gardens of an English manor house just as the manicured topiaries of Versailles contrast with the sharp cacti of the American Southwest Though gardening is beloved the world over the style of gardens themselves varies from region to region determined as much by culture as climate In this series of illustrated essays John Dixon Hunt takes us on a world tour of different periods in the making of gardens Hunt shows here how cultural assumptions and local geography have shaped gardens and their meaning He explores our continuing responses to land and reworkings of the natural world encompassing a broad range of gardens from ancient Roman times to early Islamic and Mughal gardens from Chinese and Japanese gardens to the invention of the public park and modern landscape architecture A World of Gardens looks at key chapters in garden history reviewing their significance past and present and tracing the recurrence of different themes and motifs in the design and reception of gardens throughout the world A World of Gardens celebrates the idea that similar experiences of gardens can be found in many different times and places including sacred landscapes scientific gardens urban gardens secluded gardens and symbolic gardens Featuring two hundred images this book is a treasure trove of ideas and inspiration whether your garden is a window box a secluded backyard or a daydream *Gardens and the Picturesque* John Dixon Hunt, 1992 A collection of Hunt's essays many previously unpublished dealing with the ways in which men and women have given meaning to gardens and landscapes especially with the ways in which gardens have represented the world of nature picturesquely [Greater Perfections](#) John Dixon Hunt, 2000 Greater Perfections explores the meanings of garden and its relationship to other interventions into the natural world But above all it offers a new and challenging account of the role of representation in garden art Journal *Garden and Grove* John Dixon Hunt, 1996 This is a major work and I think Hunt's best Once picked up the book cannot be put down for it is an exciting exegesis of the continuing Italian influence upon English garden art Country Life *Garden and Grove* John Dixon Hunt, 2016-02-15 Garden and Grove is a pioneering study of the English fascination with Italian Renaissance gardens John Dixon Hunt studies reactions of English visitors in their journals and travel books to the exciting world of Italian gardens its links with classical villas with Virgil and farming with Ovid and metamorphosis its association with theater its variety its staged debates between art and nature Then he looks at what English visitors made of these Italian garden experiences upon their return home and at how they created Italianate gardens on their estates on their stages and in their poems With a wealth of literary and visual materials previously untapped Hunt provides a new history of an intriguing and vital phase of English garden history Not only does he suggest the centrality of the garden as a focus for many social aesthetic political and philosophical ideas but he argues that the so called English landscape garden before Capability Brown in the late eighteenth century owed much to a long and continuing emulation of Italian Renaissance models *The Making of Place* John Dixon Hunt, 2015-11-15 Gardening is rich in tradition and many

gardens are explicitly designed to refer to or honor the past But garden design is also rich in innovation and in *The Making of Place* John Dixon Hunt explores the wide varieties of approaches aesthetics and achievements in garden design throughout the world today The gardens Hunt explores offer surprising new ideas about how we can carve out a space for respite in nature Taking readers to gardens public and private busy and hidden away to botanical gardens small parks university campuses and vernacular gardens Hunt showcases the differences between cultures and countries around the globe including the United States United Kingdom France Germany China and Australia Richly illustrated *The Making of Place* is sure to enchant and inspire even the most modest of home gardeners

Gardens in the Modern Landscape Christopher Tunnard, 2014-07-11 Between 1937 and 1938 garden designer Christopher Tunnard published a series of articles in the *British Architectural Review* that rejected the prevailing English landscape style Inspired by the principles of Modernist art and Japanese aesthetics Tunnard called for a new technique in garden design that emphasized an integration of form and purpose The functional garden avoids the extremes both of the sentimental expressionism of the wild garden and the intellectual classicism of the formal garden he wrote it embodies rather a spirit of rationalism and through an aesthetic and practical ordering of its units provides a friendly and hospitable milieu for rest and recreation Tunnard's magazine pieces were republished in book form as *Gardens in the Modern Landscape* in 1938 and a revised second edition was issued a decade later Taken together these articles constituted a manifesto for the modern garden its influence evident in the work of such figures as Lawrence Halprin Philip Johnson and Edward Larrabee Barnes Long out of print the book is here reissued in a facsimile of the 1948 edition accompanied by a contextualizing foreword by John Dixon Hunt *Gardens in the Modern Landscape* heralded a sea change in the evolution of twentieth century design and it also anticipated questions of urban sprawl historic preservation and the dynamic between the natural and built environments Available once more to students practitioners and connoisseurs it stands as a historical document and an invitation to continued innovative thought about landscape architecture

The Afterlife of Gardens John Dixon Hunt, 2013-12-15 Most books on the history of gardens describe the way that gardens have been created by contrast *The Afterlife of Gardens* examines the way that gardens have been experienced Using examples from many sites around the world John Dixon Hunt examines responses to gardens from Renaissance sites to Baroque creations to modern motorway landscaping Examining how a garden has been experienced extends its history beyond the physical into cultural terms and the author describes how this afterlife of gardens as they are understood and experienced by many generations is often redesigned in visitors imaginative and cultural responses The author looks at many aspects of the subject including the enigmatic *Hypnerotomachia Polifili* of 1499 part fictional narrative and part scholarly treatise this fascinating early narrative of garden reception paves the way for an exploration of subsequent landscapes and their reception in later periods He also looks at Italian Renaissance gardens the Picturesque the architectural and inscriptional elements of gardens the ways experiences of gardens have been recorded and the different kinds of

movement within gardens from the strolling pedestrian to the motorway traveller who experiences landscapes at speed In this ambitious new book the author shows how the complete history of a garden must extend beyond the moment of its design and the aims of the designer to record its subsequent reception He raises questions about the preservation of historical sites and provides lessons for the contemporary designer who may perhaps be more attentive to the life of a work after its design and implementation This book will interest all who have a professional interest in gardens as well as the wide general audience for gardens and landscapes of past and present **The Doctor's Garden** Clare Hickman,2021-10-26 A

richly illustrated exploration of how late Georgian gardens associated with medical practitioners advanced science education and agricultural experimentation As Britain grew into an ever expanding empire during the late eighteenth and early nineteenth centuries new and exotic botanical specimens began to arrive within the nation s public and private spaces Gardens became sites not just of leisure sport and aesthetic enjoyment but also of scientific inquiry and knowledge dissemination Medical practitioners used their botanical training to capitalize on the growing fashion for botanical collecting and agricultural experimentation in institutional semipublic and private gardens across Britain This book highlights the role of these medical practitioners in the changing use of gardens in the late Georgian period marked by a fluidity among the ideas of farm laboratory museum and garden Placing these activities within a wider framework of fashionable scientific and economic interests of the time historian Clare Hickman argues that gardens shifted from predominately static places of enjoyment to key gathering places for improvement knowledge sharing and scientific exploration **A Short History of**

Gardens Gordon Campbell,2016-10-27 Gardens take many forms and have a variety of functions They can serve as spaces of peace and tranquility a way to cultivate wildlife or as places to develop agricultural resources Globally gardens have inspired comforted and sustained people from all walks of life and since the Garden of Eden many iconic gardens have inspired great artists poets musicians and writers In this short history Gordon Campbell embraces gardens in all their splendour from parks and fruit and vegetable gardens to ornamental gardens and takes the reader on a globe trotting historical journey through iconic and cultural signposts of gardens from different regions and traditions Ranging from the gardens of ancient Persia to modern day allotments he concludes by looking to the future of the garden in the age of global warming and the adaptive spirit of human innovation **The Education of the Eye** Peter De Bolla,2003 The Education of the Eye examines the

origins of visual culture in eighteenth century Britain setting out to reclaim visual culture for the democracy of the eye and to explain how aesthetic contemplation may once more be open to all who have eyes to look **The Poem and the Garden in**

Early Modern England Deborah Solomon,2022-12-30 This book draws attention to the pervasive artistic rivalry between Elizabethan poetry and gardens in order to illustrate the benefits of a trans media approach to the literary culture of the period In its blending of textual studies with discussions of specific historical patches of earth The Poem and the Garden demonstrates how the fashions that drove poetic invention were as likely to be influenced by a popular print convention or a

particular garden experience as they were by the formal genres of the classical poets By moving beyond a strictly verbal approach in its analysis of creative imitation this volume offers new ways of appreciating the kinds of comparative and competitive methods that shaped early modern poetics Noting shared patterns both conceptual and material in these two areas not only helps explain the persistence of botanical metaphors in sixteenth century books of poetry but also offers a new perspective on the types of contrastive illusions that distinguish the Elizabethan aesthetic With its interdisciplinary approach The Poem and the Garden is of interest to all students and scholars who study early modern poetics book history and garden studies

Green Worlds of Renaissance Venice Jodi Cranston, 2019-03-04 From celebrated gardens in private villas to the paintings and sculptures that adorned palace interiors Venetians in the sixteenth century conceived of their marine city as dotted with actual and imaginary green spaces This volume examines how and why this pastoral vision of Venice developed Drawing on a variety of primary sources ranging from visual art to literary texts performances and urban plans Jodi Cranston shows how Venetians lived the pastoral in urban Venice She describes how they created green spaces and enacted pastoral situations through poetic conversations and theatrical performances in lagoon gardens discusses the island utopias found invented and mapped in distant seas and explores the visual art that facilitated the experience of inhabiting verdant landscapes Though the greening of Venice was relatively short lived Cranston shows how the phenomenon had a lasting impact on how other cities including Paris and London developed their self images and how later writers and artists understood and adapted the pastoral mode Incorporating approaches from eco criticism and anthropology Green Worlds of Renaissance Venice greatly informs our understanding of the origins and development of the pastoral in art history and literature as well as the culture of sixteenth century Venice It will appeal to scholars and enthusiasts of sixteenth century history and culture the history of urban landscapes and Italian art

experiences narrated by him that are indicative of his metamorphosing interiority It analyses the relationship between Poliphilo and his external surroundings in sequences of the narrative pertaining to thresholds the symbolic architectural topographical and garden forms and spaces and Poliphilo's transforming interior passions including his love of antiquarianism language and Polia the latter of which leads to his elegiac description of lovesickness besides examinations of numerosophical symbolism in number form and proportion of the architectural descriptions and how they relate to the narrative

Constructing Gardens, Cultivating the City Amanda Shoaf Vincent, 2023-05-16 Constructing Gardens Cultivating the City is the first cultural history of major new parks developed in Paris in the late twentieth century as part of the city's program of adaptive reuse of industrial spaces Thanks to laws that gave the city more political autonomy Paris's local government launched a campaign of park creation in the late 1970s that continued to the turn of the millennium The parks in this book represent this campaign and illustrate different facets of their cultural and historical context Archival research interviews and analyses of the parks reveal how postmodern debates about urban planning the historic city public space and nature's presence in an urban setting influenced their designs In sum the city adopted the garden as a model for public parks investing in complex richly symbolic and representational spaces These parks were intended to represent contemporary twists on traditional designs and serve local residents as much as they would contribute to Paris's role as a world city The parks development process often included points of conflict pointing to differing views on what Parisian space should represent and fundamental contradictions between the characteristics of public space and the garden as it is traditionally defined These parks demonstrate the ongoing cultivation of the city over time in which transformed sites not only fulfil new functions but also engage with history and their surroundings to create new meaning They stand for landscape as a form of signifying cultural production that directly engages with other art forms and ways of knowing Just as the Luxembourg Gardens the Tuileries and the Buttes Chaumont parks exemplify their eras cultural dynamics such parks as the Jardin Atlantique Parc Andr Citro n and the Jardin des Halles express contemporary French culture within the archetypal space of their era the city Finally they point the way to current trends in landscape architecture such as citizen gardening and ecological initiatives
