Sustainable cities Alexandra M. Zapata,Keith A. Weitz,2015-11-09 Cities often have limited financial resources for sustainability planning including sustainable solutions for municipal solid waste management In this paper we investigate municipal solid waste management strategies designed to meet two common environmental goals reducing greenhouse gas emissions and achieving zero waste by maximizing materials recovery We analyzed strategies using data collected from a range of low to high income cities around the world We inputted these data into RTI s Municipal Solid Waste Decision Support Tool and used the tool to identify the waste management strategies for each city that best met these two environmental goals We compared results among the cities and strategies and then highlighted the limitations of designing sustainable programs based on a single goal Strategies for minimizing greenhouse gas emissions and for maximizing materials recovery can have significantly different environmental impacts in the same city ranging from net savings under one strategy to net emissions under another We were able to explain many of these differences by considering the regional differences in waste composition in particular the amount of recyclable commodity materials and the energy and emissions savings associated with displacing conventional fuels in waste to energy processes for the strategies that included these processes

The Globalization of Adoption Becca McBride,2016-07-14 This book expands our understanding of a growing yet largely unstudied phenomenon the flow of children across borders through intercountry adoption What explains the spread of intercountry adoption through the international system over time McBride investigates the interconnected networks of states individuals and adoption agencies that have collaborated to develop the practice of

intercountry adoption we see today This book tells the story of how adoption agencies mediate between individuals and states in two ways first by teaching states about intercountry adoption as a policy and second by helping states implement intercountry adoption as a practice McBride argues that this process of states learning about intercountry adoption from adoption agencies has facilitated the global development of the practice in the past seventy years

At Europe's Edge Cetta Mainwaring, 2019-09-05 The Mediterranean Sea is now the deadliest region in the world for migrants Although the death toll has been rising for many years the EU response remains fragmented and short sighted Politicians frame these migration flows as an unprecedented crisis and emphasize migration control at the EU's external boundaries In this context At Europe's Edge investigates why the EU prioritizes the fortification of its external borders why migrants nevertheless continue to cross the Mediterranean and to die at sea and how EU member states on the southern periphery respond to their new role as migration gatekeepers The book addresses these questions by examining the relationship between the EU and Malta a small state with an outsized role in migration politics as EU policies place it at the crosshairs of migration flows and controls The chapters combine ethnographic methods with macro level analyses to weave together policymaker practitioner and migrant experiences and demonstrate how the Mediterranean is an important space for the contested construction of Europe This book provides rich insight into the unexpected level of influence Malta exerts on EU migration governance as well as the critical role migrants and their clandestine journeys play in animating EU and Maltese migration policies driving international relations and producing Malta's political power By centring on the margins the book pushes the boundaries of our knowledge of the global politics of migration asylum and border security
