Worlds Without End The Many Lives Of The Multiverse:

Worlds without End Mary-Jane Rubenstein, 2014-01-28 A religion professor elucidates the theory of the multiverse its history and its reception in science philosophy religion and literature Multiverse cosmologies imagine our universe as just one of a vast number of others Beginning with ancient Atomist and Stoic philosophies Mary Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance One concerns the so called fine tuning of the universe nature s constants are so delicately calibrated that it seems they have been set just right to allow life to emerge For some thinkers these fine tunings are evidence of the existence of God for others however and for most physicists God is an insufficient scientific explanation Hence the multiverse s allure if all possible worlds exist somewhere then like monkeys hammering out Shakespeare one universe is bound to be suitable for life Of course this hypothesis replaces God with an equally baffling article of faith the existence of universes beyond before or after our own eternally generated yet forever inaccessible to observation or experiment In their very efforts to sidestep metaphysics theoretical physicists propose multiverse scenarios that collide with it and even produce counter theological narratives Far from invalidating multiverse hypotheses Rubenstein argues this interdisciplinary collision actually secures their scientific viability We may therefore be witnessing a radical reconfiguration of physics philosophy and religion in the modern turn to the multiverse Rubenstein s witty thought provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers Publishers Weekly A fun mind stretching read clear and enlightening San Francisco Book Review *The World of DC Comics* Andrew Friedenthal, 2019-04-26 The first sustained study of the DC Comics Multiverse this book explores its history meanings and lasting influence The multiverse is a unique exercise in world building a series of parallel and interactive worlds with a cohesive cosmology developed by various creators over more than 50 years In examining DC s unique worlds and characters the book illustrates the expansive potential of a multiverse full of characters histories geographies religions ethnographies and more and allowing for expressions of legacy multiplicity and play that have defined much of DC Comics output It shows how a multiverse can be a vital energizing part of any imaginary world and argues that students and creators of such worlds would do well to explore the implications and complexities of this world building technique Andrew J Friedenthal has crafted a groundbreaking engaging and thoughtful examination of the multiverse of interest to scholars and enthusiasts of not just comics studies but also the fields of media studies and imaginary world studies **Philip Pullman and the Historical Imagination** Kristen Poole, 2025-03-15 Philip Pullman and the Historical Imagination takes the general reader on a fascinating tour of seventeenth century thought exploring how this time period shaped Pullman s extraordinary trilogies His Dark Materials and The Book of Dust In Part One readers are taken into the mysteries of Renaissance allegory and hieroglyphics tracing how the alethiometer and Lyra s way of reading the device emerged from these traditions Part Two

enters the exciting and revolutionary world of seventeenth century science We see how the amber spyglass imitates Galileo's telescope how early modern fantasies of space travel led to ideas of multiple worlds how alchemy entered Lyra's later adventures in Oxford and Prague and how the concept of Dust shares in the physics and philosophies of early scientists like Margaret Cavendish Part Three invites readers into the thrilling epic poem *Paradise Lost* John Milton's dramatic account of the creation of the world following a violent war in Heaven that was Pullman's inspiration for *His Dark Materials* Pullman's vibrant re-telling of this core story brings us rebel angels recasts Satan as a brooding Lord Asriel and presents Lyra as the new Eve Written by an eminent scholar of seventeenth century literature and history Philip Pullman and the *Historical Imagination* is crafted in an engaging and accessible style aimed at popular readers and fans of Pullman's work It enlivens a historical period that has long attracted Pullman himself bringing to life intriguing figures and the richly complex ideas of the time This book is an exploration of history through the worlds and characters Pullman has invented Ultimately it not only reveals how seventeenth century history helps readers better understand Pullman's novels but shows how reading history through the lens of Pullman's imagination offers new ways of thinking about the past

Entangled Worlds Catherine Keller, Mary-Jane Rubenstein, 2017-08-08 Historically speaking theology can be said to operate materiaphobically Protestant Christianity in particular has bestowed upon theology a privilege of the soul over the body and belief over practice in line with the distinction between a disembodied God and the inanimate world He created Like all other human social and natural sciences religious studies imported these theological dualisms into a purportedly secular modernity mapping them furthermore onto the distinction between a rational enlightened Europe on the one hand and a variously emotional primitive and animist non Europe on the other The new materialisms currently coursing through cultural feminist political and queer theories seek to displace human privilege by attending to the agency of matter itself Far from being passive or inert they show us that matter acts creates destroys and transforms and as such is more of a process than a thing *Entangled Worlds* examines the intersections of religion and new and old materialisms Calling upon an interdisciplinary throng of scholars in science studies religious studies and theology it assembles a multiplicity of experimental perspectives on materiality What is matter how does it materialize and what sorts of worlds are enacted in its varied entanglements with divinity While both theology and religious studies have over the past few decades come to prioritize the material contexts and bodily ecologies of more than human life *Entangled Worlds* sets forth the first multivocal conversation between religious studies theology and the body of the new materialism Here disciplines and traditions touch transgress and contaminate one another across their several carefully specified contexts And in the responsiveness of this mutual touching of science religion philosophy and theology the growing complexity of our entanglements takes on a consistent ethical texture of urgency

Theologies of Creation Thomas Jay Oord, 2014-10-02 Humans have long wondered about the origin of the universe And such questions are especially alive today as physicists offer metaphysical theories to account for the emergence of creation Theists have

attributed the universe's origin to divine activity and many have said God created something from absolute nothingness. The venerable doctrine of *creatio ex nihilo* especially emphasizes God's initial creating activity. Some contributors to this book explore new reasons *creatio ex nihilo* should continue to be embraced today. But other contributors question the viability of creation from nothing and offer alternative initial creation options in its place. These new alternatives explore a variety of options in light of recent scientific work, new biblical scholarship, and both new and old theological traditions.

The(y)ology Max Yeshaye Brumberg-Kraus, 2023. Every body contains multitudes but no body is immune to the ideology of oneness: one true self, one sexuality, one gender, one vision of the world, one true God. For many who identify or who have been named by others as transgender, queer, and nonbinary, the refusal to fit within the illusion of one set of sex and gender expectations has been met with violence and suppression. While the myth of oneness is a powerful story that shapes the contours of our societies and our selves, it is not the only myth. Performances, fictions, rituals, and theologies can transform current realities. *The(y)ology: Mythopoetics for Queer Trans Liberation* is a manifesto for artists, teachers, theologians, clergy, and activists looking for ways to resist rigid paradigms of gender, sexuality, self, and the sacred. In these pages, we are called to tell new stories about who we are and how we relate to each other within our ecosystems. The myths discussed wrestle with and transform the complex mythohistories that have birthed and often harmed us. No story comes from nothing, and more radically perhaps, no story is fully irredeemable. In *The(y)ology*, feminist philosophies join with trans poetics, literary theory with liberation theologies, drag performance with kabbalah ecologies with pornographies, and ancient theater with queer autobiographies. However ambitious its scope might be, *The(y)ology* is fundamentally about encouraging us all to think playfully and to play thoughtfully with the mythologies that define our lives. Max Yeshaye Brumberg-Kraus is a poet, playwright, drag artist, and independent scholar living in Saint Paul, Minnesota. They are the co-founder of the House of Larva Drag Co., performing as drag ogress icada L'Amour, producing one-acts, full-length shows, and cabarets since 2014. In and out of drag, Max has performed at the Guthrie Theatre, Pangea World Theatre, 20% Theatre, In the Heart of the Beast Puppet and Mask Theatre, Rimon, The Minnesota Jewish Arts Council, the Rochester Arts Center, and have also directed a full-length show, *Circe: Twilight of a Goddess with Siren Island*, in Point San Pablo, California. After majoring in classics and theatre at Beloit College, they received their MA in Theology and the Arts from United Theological Seminary of the Twin Cities. Max is former fellow and facilitator with Arts Religion Culture ARC and a member of the Green Sabbath Project. They are currently pursuing their MFA in Interdisciplinary Arts at Goddard College with a focus on queerness and the medieval imagination.

Science and Wisdom Jürgen Moltmann, 2003. Moltmann's new book offers a careful theological reading of our contemporary scientific worldview and directly addresses the related cultural dilemmas. Moltmann begins by analyzing the identification of science with the modern spirit and the religious assumptions that inform Western science. He affirms the positive side of scientific advancement, sees the present crisis clearly,

and looks for wisdom that can guide our scientific and religious future The heart of Moltmann's work is a theological understanding and assessment of contemporary cosmology Core chapters look at creation as an open system the self emptying or kenosis of God in the history of the universe eschatology the problems of time and eternity and the idea of God and space In the final chapters he addresses specific questions in bioethics historical conflicts between religion and science and cosmology in a world religious context Southern Humanities Review ,1999 **Science** John Michels (Journalist),2004 A weekly record of scientific progress **Pascal's Fire** Keith Ward,2006-06 Keith Ward's Pascal's Fire is guaranteed to reignite the timeless dispute of whether scientific advancement threatens religious belief Turning the conventional debate on its head Ward suggests that the existence of God is actually the best starting point for a number of the most famous scientific positions BOOK JACKET Dark Matter Ian Douglas,2014-05-27 An enemy might just have to become an ally in order to save humankind The United States of North America is now engaged in a civil war with the Earth Confederation which wants to yield to the demands of the alien Sh daar limit human technology and become a part of the Sh daar Galactic Collective USNA President Koenig believes that surrendering to the Sh daar will ultimately doom humankind But when highly advanced seemingly godlike aliens appear through an artificial wormhole in the Omega Centauri Cluster 16 000 light years from Earth President Koenig is faced with a tremendous choice continue fighting the Sh daar or ally with them against the newcomers in a final war that will settle the fate of more than one universe Japan Echo ,2008 New Scientist and Science Journal ,2008 **New Scientist** ,2008 *The Nation* ,1920 **The Education of Henry Adams** Henry Adams,1918 Henry Adams great grandson of John Adams and grandson of John Quincy Adams asserts that his conventional education was defective because it did not prepare him to live in a world transformed by the new science and technology This autobiography provides an insightful exploration of the tumultuous age in which he lived *Your Stars: An Empowering Guide For 2020* Carolyne Faulkner,2019-09-05 Your Stars is a daily Dynamic Astrology journal for 2020

Pantheologies Mary-Jane Rubenstein,2018-11-06 Pantheism is the idea that God and the world are identical that the creator sustainer destroyer and transformer of all things is the universe itself From a monotheistic perspective this notion is irremediably heretical since it suggests divinity might be material mutable and multiple Since the excommunication of Baruch Spinoza Western thought has therefore demonized what it calls pantheism accusing it of incoherence absurdity and with striking regularity monstrosity In this book Mary Jane Rubenstein investigates this perennial repugnance through a conceptual genealogy of pantheisms What makes pantheism monstrous at once repellent and seductive is that it scrambles the raced and gendered distinctions that Western philosophy and theology insist on drawing between activity and passivity spirit and matter animacy and inanimacy and creator and created By rejecting the fundamental difference between God and world pantheism threatens all the other oppositions that stem from it light versus darkness male versus female and humans versus every other organism If the panic over pantheism has to do with a fear of crossed boundaries and demolished

hierarchies then the question becomes what a present day pantheism might disrupt and what it might reconfigure Cobbling together heterogeneous sources medieval heresies their pre and anti Socratic forebears general relativity quantum mechanics nonlinear biologies multiverse and indigenous cosmologies ecofeminism animal and vegetal studies and new and old materialisms Rubenstein assembles possible pluralist pantheisms By mobilizing this monstrous mixture of unintentional God worlds Pantheologies gives an old heresy the chance to renew our thinking *The Philosophical Review* Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1907 An international journal of general philosophy
