Traditional Domestic Architecture Of The Arab Region:

Traditional Domestic Architecture of the Arab Region Friedrich Ragette, 2003-06-11 1 Introduction 2 The Arab Region 3 The origins of architecture 4 Traditional materials for construction 5 Traditional structures 6 Shelter in the Arab Region 7 The planning elements 8 Water and waste management 9 Traditional design strategies 10 Exceptions to the rule 11 Case studies 12 Western vs Eastern ways 13 Appendix *The Courtyard House* Nasser O. Rabbat, 2017-07-05 The courtyard house is one of the most enduring architectural forms transcending regional historical and cultural boundaries Its balance of simple appropriate construction environmental control and social and familial structures continues to engage architects and architectural historians That the courtyard house is still relevant today is indicated through its ability to accommodate continual transformation without losing any of its formal integrity and cultural roots This book presents a series of viewpoints on courtyard houses from different periods and in different regions around the world from the Harem courtyards of the Topkapi Palace and the low cost housing settlements of Protectorate Casablanca to contemporary design strategies for courtyard houses in the arid Gulf region Together the essays illuminate issues of particular relevance in architectural art historical and conservation discourses today **Building in Hot and Humid Regions** Napoleon Enteria, Hazim Awbi, Mat Santamouris, 2019-04-26 This book presents an in depth analysis covering climatic and weather conditions house and building development history construction methods and technologies and environmental conditions It provides relevant house and building information and highlights recent advances in hot and humid regions as well as developments in other regions that are relevant to hot and humid climates The countries in hot and humid regions which include the tropical countries the Middle Eastern countries around the Mediterranean and many countries of Central Asia and Africa are home to some of the most challenging conditions in the world in terms of house and building design and construction and in terms of maintaining indoor thermal comfort and air quality in an energy efficient way The book's respective chapters prepared by expert contributors cover essential concepts designs and construction methodologies for houses and commercial buildings As such the book offers a valuable resource for undergraduate and graduate students in architecture and engineering house and building designers and building sciences researchers Building contractors manufacturers and distributors of building equipment and devices and government policymakers and legislators will also benefit from the information provided in this book *Islamic Heritage Architecture and Art III* J. Casares, S. Dominguez Amarillo, 2020-08-11 Islamic architecture has enriched design with a wide variety of structural shapes including among others unique arches a wide variety of vaults and domes which allow for new forms to be developed The influence that these structural forms have in non Islamic countries was one of the themes of the 3rd International Conference on Islamic Heritage Architecture and Art at which the included papers were presented There is much to learn from past experiences to arrive at solutions which are environmentally sound and sustainable in the long term As conventional energy resources become scarce the Islamic design heritage can offer

invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning As a consequence many regions are losing their identity It will become increasingly important for new developments to take light of what the classical Islamic urban designs and architectures have to offer modern society An equally important aspect covered is the analysis of the materials employed and the types of structural elements particularly those unique to Islamic architecture Preserving this heritage requires the development of appropriate conservation techniques in response to the different materials used and the ways structural forms work including under extreme conditions such as earthquakes These papers deal with the design of many types of buildings in Islamic countries including not only the better known public buildings like mosques mausolea citadels and forts but also houses and gardens engineering works such as bridges and dams irrigation systems and many others which have also had a profound impact on society

Houseways in Southern Oman Marielle Risse, 2022-12-30 This book explores how houses are created maintained and conceptualized in southern Oman Based on long term research in the Dhofar region it draws on anthropology sociology urban studies and architectural history The chapters consider physical and functional aspects including regulations governing land use factors in siting houses architectural styles and norms for interior and exterior decorating The volume also reflects on cultural expectations regarding how and when rooms are used and issues such as safety privacy social connectedness and ease of movement Houses and residential areas are situated within the fabric of towns comparison is made with housing in other countries in the Arabian peninsula and consideration is given to notions of the Islamic city and the Islamic house The book is valuable reading for scholars interested in the Middle East and the built environment

The Poetics of Arabian Sūqs Jasmine Shahin, 2022-11-18 This book investigates the history of Arabian sūqs from their pre Islamic beginnings to the present Collecting evidence from archaeological ruins Islamic towns modern cities Arabic poetry philosophical debates political conflicts puppet shows and the insights of modern day market goers the book presents new and unforeseen interpretations of the Arabian sūq's meaning and its transformation through time and place The finding that such meaning is tied to ancient trade rituals where temple and market presented a holistic socio urban unit re questions some instrumental assumptions regarding the value of sūqness in Arabia's everyday practices Such a finding which locates the fada tareeq duality as a central theme in Arabia's socio urban discourse emphasizes the importance of lived experiences and poetics as key sources for understanding socio urban phenomena

Crusading and Archaeology Vardit R. Shotten-Hallel, Rosie Weetch, 2020-11-03 Between the eleventh and fifteenth centuries the social and cultural worlds of medieval Europe and the Eastern Mediterranean were transformed by the religious impetus of the crusades Today we bear witness to these transformations in the material and environmental record revealed by new archaeological excavations and reappraisals of museum collections This volume highlights new archaeological knowledge being developed by scholars
