Transport Pricing Of Electricity Networks:

Transport Pricing of Electricity Networks François Lévêque, 2013-06-29 Transport Pricing of Electricity Networks aims at providing a methodological and practical transmission tariff guide to those who are involved in the electricity business as managers engineers lawyers economists regulators or policy makers but are not specialists in electricity transport nor in tariff setting for public utilities It offers a synthesis of the recent economic research on the subject The volume is divided into three major parts each presenting a general aspect of transmission pricing its legal and accounting background its basic theory and its implementation successively How much does it cost to transmit electricity from a nuclear plant close to Lyon in France to a car manufacturer located in Stuttgart in Germany What price should a system operator in Canada charge a pulp and paper mill that uses the high voltage grid for only a few weeks per year Where in California is it more profitable to reinforce or build a new transmission line What is the best place to locate a power gas station in England in order to pay the lowest transmission cost Such questions are novel and crucial for American and European liberalised electricity markets Transport Pricing of Electricity Networks shows how the economics toolbox can be used to answer them *Competitive Electricity Markets and Sustainability* François Lévêque, 2007-01-01 This book responds to the opening up of electricity markets to competition which has completely changed the nature of power generation The building of new generation and transmission capacity and the setting of the energy mix between nuclear gas and renewable resources are mainly left to private initiative and investors The authors and the editor of this book explore whether or not market forces offer a sustainable future for electricity generation They employ economic theory and method to answer questions such as Will the market be able to ensure adequacy of generation capacity and security
