Media Strategy and Military Operations in the 21st Century Michal Shavit,2016-07-15 This book applies the concept of mediatization to the contemporary dynamic between war media and society with a focus on the Israel Defence Forces IDF Since the beginning of the 21st century the IDF has undergone an intensive process of mediatization that has transformed the media into an interpretative grid for many of its military activities and increasingly utilized media to garner public support and construct civilian perceptions of conflict and security through media activity and strategy This process can be divided into four distinct chronological phases in accordance with the operational challenges confronted by the IDF during this period from the Al Aqsa Intifada of 2000 through Israeli unilateral disengagement from Gaza in 2005 and the second Lebanon war of 2006 to the series of Gaza confrontations of 2008 2014 The work shows how the IDF s media policy evolved from a narrow perception of its role and separation between operational and media actions to a cohesive and coherently articulated media strategy that is increasingly intertwined with military action and operational strategy and a vital component of strategic military aims and objectives This strategic stance has led the IDF to adopt a global media perspective using the most advanced new media platforms designed to influence public opinion and improve national narratives both in Israel and the international community By applying the concept of mediatization to the Israeli case this book fills a research lacuna and offers a new prism for the study of media military relations in contemporary conflicts The book will be of much interest to students of civil military relations strategic studies Middle Eastern Studies media and communication studies sociology and IR in general

Law Andrew Bartles-Smith, Kate Crosby, Peter Harvey, Asanga Tilakaratne, Daniel Ratheiser, Noel Maurer Trew, Stefania Travagnin, Elizabeth J. Harris, Mahinda Deegalle, Christina A. Kilby, 2023-09-20 What guidance can Buddhism provide to those involved in armed conflict and to belligerents who must perhaps kill or be killed or defend their families communities or countries from attack How moreover does Buddhism compare with international humanitarian law IHL otherwise known as the law of armed conflict which protects non combatants and restricts the means and methods of warfare to limit the suffering it causes Despite the prevalence of armed conflict in parts of the Buddhist world few contemporary studies have addressed these questions While there is a wealth of material on Buddhist conflict prevention and resolution remarkably little attention has been paid to what Buddhism says about the actual conduct of war IHL is also still relatively little known in the Buddhist world and might not therefore influence the behaviour of belligerents who self identify as Buddhists and are

perhaps more likely to be guided by Buddhist principles This ground breaking volume is part of an International Committee of the Red Cross project which seeks to fill this gap by exploring correspondences between Buddhist and IHL principles and by identifying Buddhist resources to improve compliance with IHL and equivalent Buddhist or humanitarian norms This book will be of much interest to students and researchers of International Law Buddhism Ethics as well as War and Conflict studies The chapters in this book were originally published as a special issue of Contemporary Buddhism The Open Access version of this book available at <https://www.taylorfrancis.com/books/oa-edit/10.4324/9781003439820/buddhism-international-humanitarian-law-andrew-bartles-smith-kate-crosby-peter-harvey-asanga-tilakaratne-daniel-ratheiser-noel-maurer-trew-stefania-travagnin-elizabeth-harris-mahinda-deegalle-christina-kilby> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license A version of the open access title is also available on the OAPEN platform <https://library.oapen.org/handle/20.500.12657/75921> **Cyberspace Sovereignty** Binxing

and War in the Middle East Richard Davis, 2016-02-05 This book offers a new understanding of the nature of power seeking insurgent groups by empirically examining the use of violence by Hamas in the Palestinian Israeli Conflict Though Hamas has learned to ride the tides of popular support it remains suspended between its quest to achieve the values of its ardent supporters reclamation of land through force and the desire to grow popular support This tension is reflected in how and when the group exercises violent resistance The theoretical framework applied in this volume provides a simple construct to understand the dynamics that result in use and non use of violence under changing environmental conditions by Hamas but could be applied more broadly to other power seeking insurgent groups including ISIL The book weaves together the dynamics between violent actions and internal and external influences on Hamas including expressed values of the group Palestinian popular support measures leaders personalities and innovation weapons and tactics Israeli influence and targeted killings peace processes and conflicts in Gaza Syria Iraq and Egypt With newly assembled datasets on Hamas violent acts and public statements Israeli Targeted Killings historical measures of popular support and extensive field interviews the book offers a fresh perspective on insurgent group violence by demonstrating under what conditions the group exercises violence or refrains from doing so This book will be of much interest to both policy makers and students of the Arab Israeli conflict
