War and Genocide Martin Shaw, 2015-01-05 This comprehensive introduction to the study of war and genocide presents a disturbing case that the potential for slaughter is deeply rooted in the political economic social and ideological relations of the modern world Most accounts of war and genocide treat them as separate phenomena This book thoroughly examines the links between these two most inhuman of human activities It shows that the generally legitimate business of war and the monstrous crime of genocide are closely related This is not just because genocide usually occurs in the midst of war but because genocide is a form of war directed against civilian populations The book shows how fine the line has been in modern history between degenerate war involving the mass destruction of civilian populations and genocide the deliberate destruction of civilian groups as such Written by one of the foremost sociological writers on war War and Genocide has four main features an original argument about the meaning and causes of mass killing in the modern world a guide to the main intellectual resources military political and social theories necessary to understand war and genocide summaries of the main historical episodes of slaughter from the trenches of the First World War to the Nazi Holocaust and the killing fields of Cambodia Bosnia and Rwanda practical guides to further reading courses and websites This book examines war and genocide together with their opposites peace and justice It looks at them from the standpoint of victims as well as perpetrators It is an important book for anyone wanting to understand and overcome the continuing salience of destructive forces in modern society

The Origins and Dynamics of Genocide: Roddy Brett, 2016-05-17 This book rigorously documents and explains the genocide perpetrated by the Guatemalan state against indigenous Maya populations within the context of its counterinsurgency campaign against leftist guerrillas between 1981 and 1983 In doing so it brings to light a genocide that has remained largely invisible within both academic disciplines and the practitioner sphere In May 2013 former de facto president of Guatemala General Efraín Ríos Montt was for ten days indicted for genocide and crimes against humanity within Guatemala's domestic courts Based upon over a decade of ethnographic research including in survivors communities in Guatemala this book documents the historical processes shaping the genocide by analysing the evolution of both counterinsurgent and insurgent violence and strategy focusing above all on its impact upon the civilian population The research clearly evidences the impact of political violence upon non combatants how military and insurgent strategies gradually implicate civilians in conflict and the strategies civilians may adopt in order to survive them Convincingly framed within key theoretical scholarship from genocide studies and comparative politics it speaks to a broad audience beyond Latin Americanists

Dimitrios Kourtis holds a PhD and is a Post doctoral Researcher and Teaching Fellow in the Department of International Studies at the Faculty of Law of the Aristotle University in Thessaloniki Greece **Genocidal Violence** Frank Jacob, Kim Sebastian Todzi, 2023-11-06 This volume offers an introduction about theoretical concepts forms and the impact of genocidal violence It thereby intends to serve as a source of texts that can be used in a variety of introductory courses on genocide and the violence that occurs during genocidal events in particular It will consequently also offer a survey on debates and recent research about the history sociology and psychology of violence **Pacifism as War Abolitionism** Cheyney

Ryan, 2024-03-12 Responding to the unprecedented violence of our times and the corresponding interest in nonviolent solutions this book takes up the heart of pacifism its critique of what pacifists have termed the war system Pacifism as War Abolitionism provides an account of the war system that draws on contemporary sociology history and political philosophy The core of its critique of that system is that war begets war and hence war will not be ended or even constrained by finding more principled ways to fight war as many imagine War can only be ended by ending the war system which can only be done nonviolently This has been the message of pacifism s great voices like Gandhi Dr Martin Luther King Jr and Dorothy Day It is the principal message of this book Key Features Draws extensively on the sociological and historical research on war to expand the usual philosophical discussion beyond hypothetical accounts Expands the dialogues on the ethics of war beyond just war theory to its principal alternative pacifism Engages discussion of empire and imperialism in relation to the logic and

development of the war system Presents pacifism s response to the reality of war today including the idea of never ending war

Genocide, the World Wars and the Unweaving of Europe Donald Bloxham,2008 The murder of at least one million Armenian Christians in 1915 16 and of some six million Jews from 1939 45 were the most extreme instances of mass murder in the First and Second World Wars respectively This book examines the development and dynamics of both genocides While bringing out the many differences in the origins course and nature of the crimes the book argues that both need to be placed into the context of the wider violent agendas and demographic schemes of the perpetrator states In the earlier case it is important to consider the Ottoman violence against Assyrian Christians and Greek Orthodox subjects and programs of forced assimilation of non Turkish Muslim groups including many Muslims victimized by other states In the later case it is impossible to understand the development of the final solution of the Jewish question without paying attention to Nazi policy against Slavic groups the disabled and Europe s Romany population Both genocides furthermore need to be examined in the deeper contexts of the multi causal violence resulting from the collapse of the eastern and southeastern European dynastic empires from the late nineteenth century and from the establishment of new types of state in their aftermath Finally the book explains why these two major genocides occupy very different places in our contemporary memorial culture It argues that the memory politics of the Armenian genocide illustrate the very tight limits to what we can expect in the way of meaningful international concern for ongoing genocides Meanwhile the instrumentalization of the memory of the Holocaust can actually inhibit self criticism on the parts of the western states that increasingly foreground Holocaust memorial days and museums in their civic education

Genocide in the Age of the Nation State Mark Levene,2005-08-26 How should we understand genocide in the modern world As an aberration from the norms of a dominant liberal international society Or rather as a guide to the very dysfunctional nature of the international system itself The Meaning of Genocide is the first work of its nature to consider the phenomenon within a broad context of world historical development In this book Mark Levene sets out the conceptual issues in the study of genocide addressing the fundamental problems of defining genocide and understanding what we mean by perpetrators and victims before placing the phenomenon in the context of world history In an original and compelling argument Levene seeks to explain how state violence against a range of groups has emerged in tandem with the rise of the West to global dominance and the emergence of increasingly streamlined homogenous states Levene contends that it is in the relationship of these nation states to each other that we will find the well springs of some of the most poisonous tendencies in the modern world Thought provoking and beautifully constructed The Meaning of Genocide is the first of a major four volume survey Genocide in the Age of the Nation State which examines its subject within an extensive global and historical framework and which will become the definitive work on the subject

The Oxford Handbook of Terrorism Erica Chenoweth,Richard English,Andreas Gofas,Stathis N. Kalyvas,2019-03-19 The Oxford Handbook of Terrorism systematically integrates the substantial body of scholarship on terrorism and counterterrorism before and after 9

11 In doing so it introduces scholars and practitioners to state of the art approaches methods and issues in studying and teaching these vital phenomena This Handbook goes further than most existing collections by giving structure and direction to the fast growing but somewhat disjointed field of terrorism studies The volume locates terrorism within the wider spectrum of political violence instead of engaging in the widespread tendency towards treating terrorism as an exceptional act Moreover the volume makes a case for studying terrorism within its socio historical context Finally the volume addresses the critique that the study of terrorism suffers from lack of theory by reviewing and extending the theoretical insights contributed by several fields including political science political economy history sociology anthropology criminology law geography and psychology In doing so the volume showcases the analytical advancements and reflects on the challenges that remain since the emergence of the field in the early 1970s

The Oxford Handbook of Genocide Studies Donald Bloxham,A. Dirk Moses,2010-04-15 Genocide has scarred human societies since Antiquity In the modern era genocide has been a global phenomenon from massacres in colonial America Africa and Australia to the Holocaust of European Jewry and mass death in Maoist China In recent years the discipline of genocide studies has developed to offer analysis and comprehension The Oxford Handbook of Genocide Studies is the first book to subject both genocide and the young discipline it has spawned to systematic in depth investigation Thirty four renowned experts study genocide through the ages by taking regional thematic and disciplinary specific approaches Chapters examine secessionist and political genocides in modern Asia Others treat the violent dynamics of European colonialism in Africa the complex ethnic geography of the Great Lakes region and the structural instability of the continent s northern horn South and North America receive detailed coverage as do the Ottoman Empire Nazi occupied Europe and post communist Eastern Europe Sustained attention is paid to themes like gender memory the state culture ethnic cleansing military intervention the United Nations and prosecutions The work is multi disciplinary featuring the work of historians anthropologists lawyers political scientists sociologists and philosophers Uniquely combining empirical reconstruction and conceptual analysis this Handbook presents

and analyses regions of genocide and the entire field of genocide studies in one substantial volume *The Crime of All Crimes* Nicole Rafter, 2016-03-29 Cambodia Rwanda Armenia Nazi Germany History remembers these places as the sites of unspeakable crimes against humanity and indisputably of genocide Yet throughout the twentieth century the world has seen many instances of violence committed by states against certain groups within their borders from the colonial ethnic cleansing the Germans committed against the Herero tribe in Africa to the Katyn Forest Massacre in which the Soviets shot over 20 000 Poles to anti communist mass murders in 1960s Indonesia Are mass crimes against humanity like these still genocide And how can an understanding of crime and criminals shed new light on how genocide the crime of all crimes transpires In *The Crime of All Crimes* criminologist Nicole Rafter takes an innovative approach to the study of genocide by comparing eight diverse genocides large scale and small well known and obscure through the lens of criminal behavior Rafter explores different models of genocidal activity reflecting on the popular use of the Holocaust as a model for genocide and ways in which other genocides conform to different patterns For instance Rafter questions the assumption that only ethnic groups are targeted for genocidal cleansing and she also urges that actions such as genocidal rape be considered alongside traditional instances of genocidal violence Further by examining the causes of genocide on different levels Rafter is able to construct profiles of typical victims and perpetrators and discuss means of preventing genocide in addition to delving into the social psychology of genocidal behavior and the ways in which genocides are brought to an end A sweeping and innovative investigation into the most tragic of events in the modern world *The Crime of All Crimes* will fundamentally change how we think about genocide in the present day *Responsibility to Protect* Alex J. Bellamy, 2014-10-02 The Responsibility to Protect R2P principle is the international community's major response to the problem of genocide and mass atrocities a problem seen in Bosnia Rwanda and more recently in Syria This book argues that although it is far from perfect R2P offers the best chance we have of building an international community that works to prevent these crimes and protect vulnerable populations To make this argument the book sets out the logic of R2P and its key ambitions examines some of the critiques of the principle and its implementation in situations such as Libya and sets out ways of overcoming some of the practical problems associated with moving this principle from words into deeds *Architectures of Violence* Kate Ferguson, 2022-05-01 Paramilitary or irregular units have been involved in practically every case of identity based mass violence in the modern world but detailed analysis of these dynamics is rare Exploring the case of former Yugoslavia the genocides in Rwanda and Darfur and the ongoing violence in Syria Kate Ferguson exposes the relationships between paramilitaries state commands local communities and organized crime She presents these architectures of violence as a way of comprehending how the various structures of command and control fit together into domestic and international webs of support enabling and encouraging irregular and paramilitary violence Visible paramilitary participation in modern mass atrocities has succeeded in masking the continued dominance of the state in a number of violent crises Irregular combatants have participated so significantly in committing

atrocities crimes because political elites benefit from using unconventional forces to fulfil ambitions that violate international law and international policy responses are hindered when responsibility for violence is ambiguous Ferguson's inquiry into these overlooked dynamics of mass violence unveils substantial loopholes in current atrocity prevention architecture Until these are addressed state authorities will likely continue to use irregular combatants as perpetrators of atrocity

The Army and the Indonesian Genocide Jess

Melvin, 2018-01-19 For the past half century the Indonesian military has depicted the 1965-66 killings which resulted in the murder of approximately one million unarmed civilians as the outcome of a spontaneous uprising This formulation not only denied military agency behind the killings it also denied that the killings could ever be understood as a centralised nation wide campaign Using documents from the former Indonesian Intelligence Agency s archives in Banda Aceh this book shatters

the Indonesian government's official propaganda account of the mass killings and proves the military's agency behind those events. This book tells the story of the 3 000 pages of top secret documents that comprise the Indonesian genocide files. Drawing upon these orders and records along with the previously unheard stories of 70 survivors, perpetrators and other eyewitnesses of the genocide in Aceh province, it reconstructs for the first time a detailed narrative of the killings using the military's own accounts of these events. This book makes the case that the 1965-66 killings can be understood as a case of genocide as defined by the 1948 Genocide Convention. The first book to reconstruct a detailed narrative of the genocide using the army's own records of these events, it will be of interest to students and academics in the field of Southeast Asian Studies, History, Politics, the Cold War, Political Violence and Comparative Genocide.
