Fighting Toxics Barry National Toxics Campaign, 2013-04-16 Fighting Toxics is a step by step guide illustrating how to investigate the toxic hazards that may exist in your community how to determine the risks they pose to your health and how to launch an effective campaign to eliminate them

Recycling and the Politics of Urban Waste Matthew Gandy, 2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection

Whose Backyard, Whose Risk Michael B. Gerrard, 1996 In Whose Backyard Whose Risk environmental lawyer professor and commentator Michael B Gerrard tackles the thorny issue of how and where to dispose of hazardous and radioactive waste In Whose Backyard Whose Risk environmental lawyer professor and commentator Michael B Gerrard tackles the thorny issue of how and where to dispose of hazardous and radioactive waste Gerrard who has represented dozens of municipalities and community groups that have fought landfills and incinerators as well as companies seeking permits clearly and succinctly analyzes a problem that has generated a tremendous amount of political conflict emotional anguish and transaction costs He proposes a new system of waste disposal that involves local control state responsibility and national allocation to deal comprehensively with multiple waste streams Gerrard draws on the literature of law economics political science and other disciplines to analyze the domestic and international origins of wastes and their disposal patterns Based on a study of the many failures and few successes of past siting efforts he identifies the mistaken assumptions and policy blunders that have helped doom siting efforts Gerrard first describes the different kinds of nonradioactive and radioactive wastes and how each is generated and disposed of He explains historical and current siting decisions and considers the effects of the current mechanisms for making those decisions including the hidden economics and psychology of the siting process A typology of permit rules reveals the divergence between what underlies most siting disputes and what environmental laws actually protect Gerrard then looks at proposals for dealing with the siting dilemma and examines the successes and failures of each He outlines a new alternative for facility siting that combines a political

solution and a legal framework for implementation A hypothetical example of how a siting decision might be made in a particular case is presented in an epilogue

Asian and Latino Immigrants in a Restructuring Economy Marta López-Garza, 2002-06-01 Experiencing both the enormous benefits and the serious detriments of globalization and economic restructuring Southern California serves as a magnet for immigrants from many parts of the world This volume advances an emerging body of work that centers this region's future on the links between the two fastest growing racial groups in California Asians and Latinos and the economic and social mainstream of this important sector of the global economy The contributors to the anthology scholars and community leaders with social science urban planning and legal backgrounds provide a multi faceted analysis of gender class and race relations They also examine various forms of immigrant economic participation from low wage workers to entrepreneurs and capital investors *Asian and Latino Immigrants in a Restructuring Economy* documents the entrenchment of various immigrant communities in the socio political and economic fabric of United States society and these communities role in transforming the Los Angeles region

Seeking Spatial Justice Edward W. Soja, 2013-11-30 In 1996 the Los Angeles Bus Riders Union a grassroots advocacy organization won a historic legal victory against the city's Metropolitan Transit Authority The resulting consent decree forced the MTA for a period of ten years to essentially reorient the mass transit system to better serve the city's poorest residents A stunning reversal of conventional governance and planning in urban America which almost always favors wealthier residents this

decision is also for renowned urban theorist Edward W Soja a concrete example of spatial justice in action In *Seeking Spatial Justice* Soja argues that justice has a geography and that the equitable distribution of resources services and access is a basic human right Building on current concerns in critical geography and the new spatial consciousness Soja interweaves theory and practice offering new ways of understanding and changing the unjust geographies in which we live After tracing the evolution of spatial justice and the closely related notion of the right to the city in the influential work of Henri Lefebvre David Harvey and others he demonstrates how these ideas are now being applied through a series of case studies in Los Angeles the city at the forefront of this movement Soja focuses on such innovative labor community coalitions as Justice for Janitors the Los Angeles Alliance for a New Economy and the Right to the City Alliance on struggles for rent control and environmental justice and on the role that faculty and students in the UCLA Department of Urban Planning have played in both developing the theory of spatial justice and putting it into practice Effectively locating spatial justice as a theoretical concept a mode of empirical analysis and a strategy for social and political action this book makes a significant contribution to the contemporary debates about justice space and the city

Smoke on the Water Dario Fazzi, 2023-10-31 The U S government military and industry once saw ocean incineration as the safest and most efficient way to dispose of hazardous chemical waste Beginning in the late 1960s toxic chemicals such as PCBs and other harmful industrial byproducts were taken out to sea to be destroyed in specially designed ships equipped with high temperature combustion chambers and smokestacks But public outcry arose after the environmental and health risks of ocean incineration were exposed and the practice was banned in the early 1990s *Smoke on the Water* traces the rise and fall of ocean incineration showing how a transnational environmental movement tested the limits of U S political and economic power Dario Fazzi examines the anti ocean incineration movement that emerged on both sides of the Atlantic arguing that it succeeded by merging local advocacy with international mobilization He emphasizes the role played at the grassroots level by women migrant workers and other underrepresented groups who were at greatest risk Environmental groups for their part gathered and shared evidence about the harms of at sea incineration building scientific consensus and influencing international debates *Smoke on the Water* tells the compelling story of a campaign against environmental degradation in which people from marginalized communities took on the might of the U S military industrial complex It offers new insights into the transnational dimensions of environmental regulation the significance of nonstate actors in international history and the making of environmental justice movements

Environmentalism Unbound Robert Gottlieb, 2002-08-02 A call for a broadened environmental movement that addresses issues of everyday life In *Environmentalism Unbound* Robert Gottlieb proposes a new strategy for social and environmental change that involves reframing and linking the movements for environmental justice and pollution prevention According to Gottlieb the environmental movement's narrow conception of environment has isolated it from vital issues of everyday life such as workplace safety healthy communities and food security that are often viewed separately as industrial community or

agricultural concerns This fragmented approach prevents an awareness of how these issues are also environmental issues After tracing a history of environmental perspectives on land and resources city and countryside and work and industry Gottlieb focuses on three compelling examples of this new approach to social and environmental change The first involves a small industry dry cleaning and the debate over pollution prevention approaches the second involves a set of products janitorial cleaning supplies that may be hazardous to workers and the third explores the obstacles and opportunities presented by community or regional approaches to food supply in the face of an increasingly globalized food system

Environment and Social Justice Dorceta E. Taylor, 2010-08-26 The environmental justice movement an organized social and political force in America in the 80s is a global phenomenon today as activists worldwide try to understand the relationship between environment race ethnicity and social inequality This volume examines domestic and international environmental issues

From Workshop to Waste Magnet Diane Sicotte, 2016-09-21 Like many industrialized regions the Philadelphia metro area contains pockets of environmental degradation neighborhoods littered with abandoned waste sites polluting factories and smoke belching incinerators However other neighborhoods within and around the city are relatively pristine This eye opening book reveals that such environmental inequalities did not occur by chance but were instead the result of specific policy decisions that served to exacerbate endemic classism and racism From Workshop to Waste Magnet presents Philadelphia s environmental history as a bracing case study in mismanagement and injustice Sociologist Diane Sicotte digs deep into the city s past as a titan of American manufacturing to trace how only a few communities came to host nearly all of the area s polluting and waste disposal land uses By examining the complex interactions among economic decline federal regulations local politics and shifting ethnic demographics she not only dissects what went wrong in Philadelphia but also identifies lessons for environmental justice activism today Sicotte s research tallies both the environmental and social costs of industrial pollution exposing the devastation that occurs when mass quantities of society s wastes mix with toxic levels of systemic racism and economic inequality From Workshop to Waste Magnet is a compelling read for anyone concerned with the health of America s cities and the people who live in them

Making a Green Machine Finn Arne Jørgensen, 2011-07-11 Consider an empty bottle or can one of the hundreds of billions of beverage containers that are discarded worldwide every year Empty containers have been at the center of intense political controversies technological innovation processes and the modern environmental movement Making a Green Machine examines the development of the Scandinavian beverage container deposit refund system which has the highest return rates in the world from 1970 to present Finn Arne Jørgensen investigates the challenges the system faced when exported internationally and explores the critical role of technological infrastructures and consumer convenience in modern recycling His comparative framework charts the complex network of business and political actors involved in the development of the reverse vending machine RVM and bottle deposit legislation to better understand the different historical trajectories empty

beverage containers have taken across markets including the U S The RVM has served as more than a hole in the wall it began simply as a tool for grocers who had to handle empty refillable glass bottles but has become a green machine to redeem the empty beverage container helping both business and consumers participate in environmental actions *Urban Environment and Smart Cities in Asian Countries* Uday Chatterjee, Anzhelika Antipova, Shovan Ghosh, Sushobhan Majumdar, Martiwi Diah Setiawati, 2023-05-27 This book offers a thorough description of the challenges posed by increasing global urbanization In addition comprehensive perspectives are offered on how the contemporary urban challenges of our time are tackled by existing designers architects urban planners and landscape architects thereby considering climate change migration resilience politics and environmental degradation It includes insights from environmental design geography strategic planning and engineering design It goes beyond the jargon of technical innovation and exposes the political social and physical effects of digitalizing the world in smart cities The book focuses on the application of geospatial technology of smart cities including system design for basic services real time control and the Internet of Things It highlights the planning of land use strategic development and ecosystem based knowledge to enhance economic growth and healthy urban environment and smart city management The book also shows the contradictory aspects of smart city studies and provides useful insights into the creation and execution of policies to strengthen decision making processes in smart cities This book leads the reader to a greater understanding of smart city growth both theoretical and realistic and as such it provides an interesting read for urban geographers urban designers and planners environmental specialists practitioners students *The Oxford Handbook of Corporate Social Responsibility* Abigail McWilliams, Deborah E. Rupp, Donald S. Siegel, Günter K. Stahl, David A. Waldman, 2019-10-29 Corporate social responsibility CSR continues to grow as an area of interest in academia and business Encompassing broad topics such as the relationship between business society and government environmental issues globalization and the social and ethical dimensions of management and corporate operation CSR has become an increasingly interdisciplinary subject relevant to areas of economics sociology and psychology among others New directions in CSR research include advanced micro based investigations in organizational behaviour and human resource management additional studies of environmental social responsibility and sustainability further research on strategic CSR connections between social responsibility and entrepreneurship and improvements in methods and data analysis as the field matures Through authoritative contributions from international scholars across the social sciences this Handbook provides a cohesive overview of this recent expansion It introduces new perspectives new methodologies and new evidence from a range of disciplines to encourage and facilitate interdisciplinary research and global implementation of corporate social responsibility *Down to Earth* Theodore Steinberg, 2019 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of the United States a history that places the environment at the very center of the narrative Now in a new edition Down to Earth reenvisions the story of America from the ground up It

reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good he reminds readers that many critical episodes in U S history were in fact environmental events The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson s surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities
