Warbird Factory John M. Fredrickson, 2015-11-02 Warbird Factory tells the American Aviation Inc's WWII war effort story through over 200 archival photographs directly from the NAA Boeing archive *The Dallas Story* Terrance Furgerson, 2023-03-15 During World War II the United States mobilized its industrial assets to become the great Arsenal of Democracy through the cooperation of the government and private firms The Dallas Story examines a specific aviation factory operated by the North American Aviation NAA company in Dallas Texas Terrance Furgerson explores the construction and opening of the factory its operation its relations with the local community and the closure of the facility at the end of the war Prior to the opening of the factory in 1941 the city of Dallas had practically no existing industrial base Despite this deficiency the residents quickly learned the craft of manufacturing airplanes and by the time of the Pearl Harbor attack the NAA factory was mass producing the AT 6 trainer aircraft The entry of the United States into the war brought about an enlargement of the NAA factory and the facility began production of the B 24 Liberator bomber and the famed P 51 Mustang fighter By the end of the war the Texas division of NAA had manufactured nearly 19 000 airplanes making it one of the most prolific U S factories Air Force Magazine, 2016-07 **Destination Moon** Richard Maurer, 2024-06-04 The history of NASA's Apollo program from Earth orbital missions to lunar landings in a propulsive nonfiction narrative Only now it is becoming clear how exceptional and unrepeatable Apollo was At its height it employed almost half a million people many working seven days a week and each determined that it will not fail because of me Beginning with fighter pilots in World War II Maurer traces the origins of the Apollo program to a few exceptional soldiers a Nazi engineer and a young eager man who would become president Packed with adventure new stories about familiar people and undeniable danger Destination Moon takes an unflinching look at a tumultuous time in American history told expertly by nonfiction author Richard Maurer

P-51B Mustang James William "Bill" Marshall, Lowell F. Ford, 2020-07-09 The story of the P 51B Mustang aircraft from its development prior to the American entry into the war through to D Day in June 1944 During World War II the United States Army Air Corps was led by a cadre of officers who believed implicitly that military aviation particularly fast heavy bombers at high altitude would be able to destroy strategic enemy targets during daylight with minimal losses However by 1942 the Flying Fortress was proving vulnerable to Luftwaffe fighters This title charts the United States Army Air Force's struggle to develop a Long Range Escort which would enable them to achieve the Combined Bomber Objectives and gain mastery of the skies over the Third Reich The commitment of the USAAF to the Mediterranean and European theatres saw an increasingly desperate need to find a fighter escort which reached crisis point in 1943 as losses suffered in the Tidal Wave offensive and Schweinfurt Regensburg Munster raids emphasised the mounting strength of the Luftwaffe The USAAF leaders increasingly accepted the probability of bomber losses and the deployment of the P 51B Mustang solved the problem of Germany's layered defence strategy as Luftwaffe fighters had been avoiding the P 47 Thunderbolt and P 38 Lightning escort

fighters by concentrating their attacks beyond the range of the Thunderbolt and Lightning The P 51B duly emerged as the The Bastard Stepchild that the USAAF Material Division did not want becoming the key Long Range Escort fighter alongside the P 38 and P 47 that defeated the Luftwaffe prior to D Day As well as the P 51B s history this title explores the technical improvements made to each of these fighters as well as the operational leadership and technical development of the Luftwaffe they fought against
