Wastewater Operators Frank R. Spellman, 2000-04-10 Spellman's Standard Handbook for Wastewater Operators is a three volume study guide and readily accessible source of information for review in preparing wastewater personnel for operator certification and licensure. These handbooks are resource manuals and troubleshooting guides that contain a compilation of wastewater treatment information, data, operational material, process control procedures, and problem solving safety and health information, new trends in wastewater treatment administration and technology, and numerous sample problem solving practice sets, many based on actual tests. The Handbook volumes review the wastewater operator's job related knowledge as job requirements identified by the examination developers as essential for a minimally competent Class IV through Class I or Grade I through Grade V wastewater treatment plant operator. Every attempt has been made to make the three Handbook volumes as comprehensive as possible while maintaining their compact practical format.

Third Century of Biochemical Oxygen Demand Rodger Baird, Roy Keith Smith, 2002 The most comprehensive summary and literature review of Biochemical Oxygen Demand (BOD) on the market. BOD is one of the fundamental concepts in wastewater treatment. Throughout the 1800s and the 1900s BOD was exhaustively studied and refined both as a concept and as an analytical procedure. Review all previous BOD work including why technicians, scientists, plant operators, regulators, and engineers have complained about the BOD test for many years. This book is intended to serve three purposes: first and foremost is to describe BOD as a test procedure and biological phenomenon; secondly to describe the place of BOD within the complex of testing that is used to evaluate treatment processes; lastly is to present the development of BOD and preserve all peer reviewed literature citations that mark the road to the current test. Written by Rodger B Baird and Roy Keith Smith. Mr Baird is Manager of Laboratories for the Los Angeles County Sanitation Districts where he has worked in laboratory supervision and management for more than 30 years. Dr Smith has written over 60 published articles and is the author of eight books, one in the 4th edition on environmental analysis. Chapters detailing sediment oxygen demand, chemical oxygen demand, and total organic carbon testing and their relationship to BOD testing, as well as extensive coverage of the interferences encountered during oxygen demand testing, makes this a must have reference.
