Watching The World Change The Stories Behind The Images Of 911:

Watching the World Change David Friend, 2009-02-03 The terrorist attack on the World Trade Center was the most universally observed news event in human history That the event was so visual is owing to the people who facing disaster took photographs of it imperiled office workers horrified tourists professional photographers risking their lives Conceived by Osama bin Laden as the toppling of an image of America right before the world's eyes the tragedy swiftly came to be defined by photography as families posted snapshots of their loved ones police sought terrorists faces on security camera videotapes and officials recorded the devastation and identified the dead In *Watching the World Change* David Friend tells the stories behind fifty of the images that altered our sense of our world forever from the happenstance shots taken by bystanders as the first tower was struck to the scene of three firemen raising the Stars and Stripes at the site He tells unforgettable stories of photographers and rescuers victims and survivors He shows how advances in television digital photography and the Internet produced an effect whereby more than two billion people saw the terrible events as they happened He explores the controversy about whether images of 9/11 are redemptive or exploitative and he shows how photographs help us to witness to grieve and finally to understand the unimaginable Screening American Nostalgia Susan Flynn, Antonia

Jenny Edkins, 2011-09-06 Stories of the missing offer profound insights into the tension between how political systems see us and how we see each other The search for people who go missing as a result of war political violence genocide or natural disaster reveals how forms of governance that objectify the person are challenged Contemporary political systems treat persons instrumentally as objects to be administered rather than as singular beings the apparatus of government recognizes categories not people In contrast relatives of the missing demand that authorities focus on a particular person families and friends are looking for someone who to them is unique and irreplaceable In *Missing* Jenny Edkins highlights stories from a

range of circumstances that shed light on this critical tension the aftermath of World War II when millions in Europe were displaced the period following the fall of the World Trade Center towers in Manhattan in 2001 and the bombings in London in 2005 searches for military personnel missing in action the thousands of political disappearances in Latin America and in more quotidian circumstances where people walk out on their families and disappear of their own volition When someone goes missing we often find that we didn't know them as well as we thought there is a sense in which we are missing even to our nearest and dearest and even when we are present not absent In this thought provoking book Edkins investigates what this more profound missingness might mean in political terms
