Water and Society Terje Tvedt,2015-12-22 Despite the central importance that water has held for civilizations both ancient and modern its social significance has made surprisingly little impact on our contemporary understanding of human history and development Dominant interpretations of the relationship between society and nature have remained water blind In Water and Society historian and leading water expert Terje Tvedt argues for a change that acknowledges the significant role played by water in societal development Reflecting his expertise as a geographer historian and a political scientist and drawing on his wide experience of water issues around the world Terje Tvedt s Water and Society provides a long overdue reappraisal of the relationship between water and society one that gives water its rightful place as central to any true understanding of human history and development

Water Policy and Governance in South Asia M. Anwar Hossen,2017-03-16 Dr Hossen

carried out an exceptional program of research in Bangladesh which focused on water governance in relation to human rights international water law and environmental sustainability His major argument is that eco agricultural system encounters major disruptions due to a number of factors including regional hydropolitics and neoliberal and highly centralized approaches to water resource management that follow the principles of ecocracy In this context Dr Hossen explores three major questions i How can local ecological knowledge be incorporated into national water policy ii What strategies and reforms are required at the international watershed governance level and iii How can human rights principles including the principle of water as a human right be used to formulate more effective water policy and governance principles To answer these questions Dr Hossen explores the effects of regional hydropolitics on water management focusing on three large engineering projects the Farakka Barrage built by India on the Ganges River and the Ganges Kobodak GK and Gorai River Restoration GRR Projects in Bangladesh This analysis is based on his research into local knowledge and farming practices during a year of fieldwork in 2011 12 focus group discussions in depth case studies and social survey methods In addition to this primary data he looks at extensive secondary documents from the government of Bangladesh pertaining to water management agricultural modernization and institutional structures The arguments herein are applicable particularly to the Ganges Brahmaputra Basin countries in South Asia but also to the river basins of other parts of the world

Proceedings of the 7th International Symposium on Water Resource and Environmental Management Haoqing Xu, 2026-07-16 This book features select peer reviewed proceedings from 7th International Symposium on Water Resource and Environmental Management WREM2024 It comprises articles written by researchers practitioners policymakers and entrepreneurs that examine recent advancements in water resource and environmental management The book covers a range of topics including the ecosystem services and the water energy nexus and water and environment protection It provides readers with comprehensive information on the principles of sustainable water resources management as well as recent advances directions for future research and policy development for sustainable water resources management

Rethinking Water Management Caroline Figueres, Johan Rockstrom, Cecilia Tortajada, 2012-05-23 If water resources are to be distributed efficiently equitably and cost effectively in this rapidly changing world then it is clear that current water management practices are no longer feasible Innovative approaches are required to meet the increasing water demands of a growing world population and economy and the needs of the ecosystems supporting them New approaches have to be employed at global national and local levels In Rethinking Water Management a new generation of water experts from around the world examine the critical challenges confronting the water profession including rainwater and groundwater management recycling and reuse water rights transboundary access to water and financing of water They offer important new perspectives on the use management and conservation of fresh water in terms of both quantity and quality for the domestic agricultural and industrial sectors and show how a new set of paradigms can be applied to successfully manage

water for the future Caroline Figueres is Head of the Urban Infrastructure Department at UNESCO IHE Water Education Institute in The Netherlands Cecilia Tortajada is Vice President of the Third World Centre for Water Management in Mexico and Vice President elect of the International Water Resources Association Johan Rockström is Water Resources Expert at UNESCO IHE UNU Publications United Nations University,2005 Review of Hydro-economic Models to Address River Basin Management Problems: Structure, Applications and Research Gaps Maksud Bekchanov,Aditya Sood,Marc Jeuland,2015-12-31 Arid Lands Water Evaluation and Management Robert Maliva,Thomas Missimer,2012-06-09 A large part of the global population lives in arid lands which have low rainfall and often lack the water required for sustainable population and economic growth This book presents a comprehensive description of the hydrogeology and hydrologic processes at work in arid lands It describes the techniques that can be used to assess and manage the water resources of these areas with an emphasis on groundwater resources including recent advances in hydrologic evaluation and the differences between how aquifer systems behave in arid lands versus more humid areas Water management techniques are described and summarized to show how a more comprehensive approach to water management is required in these areas including the need to be aware of cultural sensitivities and conditions unique to many arid regions The integration of existing resources with the addition of new water sources such as desalination of brackish water and seawater along with reusing treated wastewater will be required to meet future water supply needs Also changing climatic conditions will force water management systems to be more robust so that future water supply demands can be met as droughts become more intense and rainfall events become more intense A range of water management techniques are described and discussed in order to illustrate the methods for integrating these measures within the context of arid lands conditions **Water Management** Iqbal M. Mujtaba,Thokozani Majozi,Muti Kolade Amosa,2018-11-05 Exponential growth in population and improved standards of living demand increasing amount of freshwater and are putting serious strain on the quantity of naturally available freshwater worldwide Water Management Social and Technological Perspectives discusses developments in energy efficient water production management wastewater treatment and social and political aspects related to water management and re use of treated water It features a scientific and technological perspective to meeting current and future needs discussing such technologies as membrane separation using reverse osmosis the use of nanoparticles for adsorption of impurities from wastewater and the use of thermal methods for desalination The book also discusses increasing the efficiency of water usage in industrial agricultural and domestic applications to ensure a sustainable system of water production usage and recycling With 30 chapters authored by internationally renowned experts this work offers readers a comprehensive view of both social and technological outlooks to help solve this global issue **Urban Water Reuse Handbook** Saeid Eslamian,2016-01-05 Examining the current literature research and relevant case studies presented by a team of international experts the Urban Water Reuse Handbook discusses the pros and cons of water reuse and explores new and

alternative methods for obtaining a sustainable water supply The book defines water reuse guidelines describes the historical and current **Handbook of Water Resources Management: Discourses, Concepts and Examples** Janos J. Bogardi, Joyeeta Gupta, K. D. Wasantha Nandalal, Léna Salamé, Ronald R.P. van Nooijen, Navneet Kumar, Tawatchai Tingsanchali, Anik Bhaduri, Alla G. Kolechkina, 2021-06-12 This book provides an overview of facts theories and methods from hydrology geology geophysics law ethics economics ecology engineering sociology diplomacy and many other disciplines with relevance for concepts and practice of water resources management It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates The book refers to case studies in the form of boxes sections or as entire chapters They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes Based on consolidated state of the art knowledge it has been conceived and written to attract a multidisciplinary audience The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi level decision making processes Knowing more about water but also about concepts methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making **Data Mining: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2012-11-30 Data mining continues to be an emerging interdisciplinary field that offers the ability to extract information from an existing data set and translate that knowledge for end users into an understandable way Data Mining Concepts Methodologies Tools and Applications is a comprehensive collection of research on the latest advancements and developments of data mining and how it fits into the current technological world **Transferable Groundwater Rights** Andreas N. Charalambous, 2013-10-28 The principle of transferable groundwater rights is that by making water rights capable of being traded in the market water resources can be used more sustainably and efficiently Groundwater would achieve its economic value by switching from the high volume low value irrigation which is prevalent with many farmers particularly in South Asia to low volume high value urban supply or the growing of intensive horticultural or cash crops This book discusses transferable groundwater rights in their broader context It starts with a detailed description of the physical aspects of groundwater which non technical readers should find useful followed by a discussion of legal and economic aspects Water transfers and the international experiences in transferable groundwater rights are dealt with in detail in two subsequent chapters A model is presented to guide those involved in water resources management and planning in their decision process to introduce transferable groundwater rights and water rights trading The author concludes that transferable groundwater rights potentially offer a better alternative to land based water rights systems However he casts serious doubt on whether groundwater rights trading on its own can achieve water resources sustainability environmental protection and social equity Government intervention seems to be almost always needed to assist the water rights market and take responsibility for any of its adverse consequences **Water Conflicts and Resistance** Venkatesh

Dutta,2021-07-29 This book presents a systematic study of transboundary regional and local water conflicts and resistance across several river basins in South Asia Addressing hydro socio economic aspects in competing water sharing and transfer agreements as well as conflicting regimes of legal plurality property rights and policy implementation it discusses themes such as rights over land and natural resources resettlement of dam displaced people urban rural conflicts over water allocation peri urbanisation land use conflicts and water security tradeoffs and constraints in restoration of ecological flows in rivers resilience against water conflicts in a river basin and irrigation projects and sustainability of water resources Bringing together experts professionals lawyers government and the civil society the volume analyses water conflicts at local regional and transboundary scales reviews current debates with case studies and outlines emerging challenges in water policy law governance and institutions in South Asia It also offers alternative tools and frameworks of water sharing mechanisms conflict resolution dialogue and models of cooperation and collaboration for key stakeholders towards possible solutions for effective equitable and strategic water management This book will be useful to scholars and researchers of development studies environment studies water studies public policy political science international relations conflict resolution political economy economics sociology and social anthropology environmental law governance and South Asian studies It will also benefit practitioners water policy thinktanks and associations policymakers diplomats and NGOs

Indigenous and Local Water Knowledge, Values and Practices Mrityika Basu,Rajarshi DasGupta,2023-03-01 This book provides a knowledge base of the existing indigenous and local water knowledge values and practices and how this water knowledge can be mainstreamed into the decision making process The book not only demonstrates the perks of using indigenous knowledge but also illustrates the barriers and gaps that should be considered while planning for mainstreaming traditional knowledge and values at a local scale The chapters incorporate case studies from various parts of the world demonstrating how indigenous and religious and cultural values of water have translated into water use and conservation behavior among indigenous people ensuring resource sustainability over a long period of time There has been global attention towards combining indigenous and local knowledge with new information and innovation to attain future water security In this regard this book is timely relevant and significant as it is the first attempt as per the best of our knowledge to publish a book that solely addresses indigenous and local knowledge values and practices regarding water management quality monitoring use and conservation With increasing emphasis on the inclusion of indigenous and local knowledge into natural resource governance and conservation by international agencies like the Intergovernmental Science Policy Platform on Biodiversity and Ecosystem Services IPBES the proposed book will significantly contribute to the existing knowledge base and demonstrate the importance of mainstreaming indigenous water knowledge and practices into water governance and decision making The UN SDGs recognizing the significance of indigenous knowledge systems emphasized its inclusion in most aspects and principles of SDGs Apart from direct links with SDGs like zero hunger SDG 2 no poverty SDG 1 and climate

action SDG 13 indigenous and local knowledge system is considered to be directly connected to clean water and sanitation SDG 6 The book will be useful to researchers and students in the field of indigenous knowledge and education water governance community level planning and water sustainability The book can be referred to for postgraduate courses and beyond as well as policymakers conservationists non governmental organizations development practitioners and local government officials

International Law and Islamic Law Mashood A. Baderin, 2017-07-05 The relationship between modern international law and Islamic law has raised many theoretical and practical questions that cannot be ignored in the contemporary study and understanding of both international law and Islamic law The significance and relevance of this relationship in both academic and practical terms especially after the terrorist attacks of 11 September 2001 is now well understood Recent international events in particular corroborate the need for a better understanding of the relationship between contemporary international law and Islamic law and how their interaction can be explored and improved to enhance modern international relations and international law The articles reproduced in this volume examine the issues of General Principles of International Law International Use of Force International Humanitarian Law International Terrorism International Protection of Diplomats International Environmental and Water Law Universality of Human Rights Women's Rights Rights of the Child Rights of Religious Minorities and State Practice The essays have been carefully selected to reflect as much as possible the different Islamic perspectives on each of these aspects of international law

International Bibliography of Political Science British Library of Political and Economic Science, 2003-10-23 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

The Enigmatic Realm of **Water Management In Islam Water Resources Management And Policy Series**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing lacking extraordinary. Within the captivating pages of **Water Management In Islam Water Resources Management And Policy Series** a literary masterpiece penned by way of a renowned author, readers set about a transformative journey, unlocking the secrets and untapped potential embedded within each word. In this evaluation, we shall explore the book's core themes, assess its distinct writing style, and delve into its lasting impact on the hearts and minds of those that partake in its reading experience.
