reflected in others until the individual poems begin to read like stanzas in some epic story of this country Robert Adamson
 Selected by one of Australia's most acclaimed poets this inspired collection captures the richness and scope of present day
 Australian verse It features innovative and exciting poems many published here for the first time from our best known poets
 as well as daring and insightful works from rising stars Together they create a lively sense of conversation of voices criss
 crossing the continent exploring the many themes that animated and inspired the nation's poets in 2010 Contributors include
 Chris Andrews Judith Beveridge Ken Bolton Peter Boyle David Brooks Pam Brown Joanne Burns Elizabeth Campbell Justin
 Clemens Ali Cobby Eckermann Luke Davies Bruce Dawe Laurie Duggan Stephen Edgar Anne Elvey Lionel Fogarty Lisa
 Gorton Robert Gray Martin Harrison Kevin Hart Barry Hill Sarah Holland Batt L K Holt Lisa Jacobson John Kinsella Anna
 Krien Anthony Lawrence Geoffrey Lehmann Kate Lilley Astrid Lorange Roberta Lowing Rhyll McMaster Jennifer Maiden Kate
 Middleton Peter Minter Derek Motion Les Murray Geoff Page Peter Rose Gig Ryan Jaya Savige Craig Sherborne Vivian Smith
 Peter Steele John Tranter Chris Wallace Crabbe Petra White and many more **National JobBank 2010** Adams
 Media,2010-09-15 Alphabetically arranged by state this indispensable annual directory to over 21 000 employers offers a
 variety of pertinent contact business and occupational data American Library Association Business Reference and Services
 Section BRASS Completely updated to include the latest industries and employers this guide includes complete profiles of
 more than 20 000 employers nationwide featuring Full company name address phone numbers and website e mail addresses
 Contacts for professional hiring A description of the company's products or services Profiles may also include Listings of
 professional positions advertised Other locations Number of employees Internships offered **Information Systems**
Security Somesh Jha,Anish Mathuria,2010-12-07 2 1 Web Application Vulnerabilities Many web application vulnerabilities
 have been well documented and the mitigation methods have also been introduced 1 The most common cause of those
 vulnerabilities is the insufficient input validation Any data originated from outside of the program code for example input data
 provided by user through a web form should always be considered malicious and must be sanitized before use SQL Injection
 Remote code execution or Cross site Scripting are the very common vulnerabilities of that type 3 Below is a brief introduction
 to SQL injection vulnerability though the security testing method presented in this paper is not limited to it
 SQL injection vulnerability allows an attacker to illegally manipulate database by injecting malicious SQL codes into the values of
 input parameters of http requests sent to the victim web site 1 Fig 1 An example of a program written in PHP which contains
 SQL Injection vulnerability Figure 1 shows a program that uses the database query function mysql_query
 to get user information corresponding to the user specified by the GET input parameter username and then print the result to the
 client browser A normal http request with the input parameter username looks like http://example.com/index.php?username=bob
 The dynamically created database query at line 2 is SELECT FROM users WHERE username=bob AND usertype=user
 This program is vulnerable to SQL Injection attacks because mysql_query uses the input value of username without

sanitizingmalicious codes A malicious code can be a stringthatcontains SQL symbols ork words Ifan attacker sendarequest with SQL code alice jected http example com index php username alice the query becomes SELECT FROM users WHERE username alice AND usertype user

Correcting the Scholarly Record for Research Integrity M. V.

Dougherty,2018-11-09 This volume is the first book length study on post publication responses to academic plagiarism in humanities disciplines It demonstrates that the correction of the scholarly literature for plagiarism is not a task for editors and publishers alone each member of the research community has an indispensable role in maintaining the integrity of the published literature in the aftermath of plagiarism If untreated academic plagiarism damages the integrity of the scholarly record corrupts the surrounding academic enterprise and creates inefficiencies across all levels of knowledge production By providing case studies from the field of philosophy and related disciplines the volume exhibits that current post publication responses to academic plagiarism are insufficient It catalogues how humanities disciplines fall short in comparison with the natural and biomedical sciences for ensuring the integrity of the body of published research This volume provides clarity about how to conceptualize the scholarly record surveys the traditional methods for correcting it and argues for new interventions to improve the reliability of the body of published research The book is valuable not only to those in the field of philosophy and other humanities disciplines but also to those interested in research ethics meta science and the sociology of research
