When Technology Fails Matthew Stein, 2008-08-18

There's never been a better time to be prepared. This book is an indispensable basic manual for the real-life issues that await us in the decades to come. A treasure trove of practical wisdom, James Howard Kunstler, author of *The Geography of Nowhere*, and Matthew Stein's comprehensive primer on sustainable living skills, from food and water to shelter and energy, to first aid and crisis management skills, prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live green in seemingly stable times, but to live in the face of potential disasters lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. *When Technology Fails* covers the gamut. Inside, you'll learn:

- The basics of installing a renewable energy system for your home or business.
- How to find and sterilize water in the face of utility failure.
- How to keep warm if you've been left temporarily homeless.
- Practical information for dealing with water quality issues.
- Alternative health and first aid techniques.

Each chapter describes skills for self-reliance in good times and bad. Chapters include:

- A survey of the risks to the status quo.
- Supplies and preparation for short and long term emergencies.
- Emergency measures for survival.
- Prepping: water, food, shelter, and clothing.
- First aid, low tech medicine, and healing.
- Securing energy, heat, and power.
- Metalworking.
- Utensils and storage.
- Low tech chemistry.
- Engineering, machines, and materials.

Fully revised and expanded, *When Technology Fails* ends on a positive, proactive note with a chapter on *Making the Shift to Sustainability*, which offers practical suggestions for changing our world on personal, community, and global levels. *When Technology Fails* is a massive project done well. First, the book gives a superb presentation of *WHY* one should be more aware and prepared, and then *HOW* one should go about this. The scope of this book is thorough.
